PREFACE

The development of this resource notebook was one of the major activities of the "Project to Promote Economic Development Through Entrepreneurship Education and Training." To achieve economic development through entrepreneurship education and training, collaboration is needed among all the entities involved in the education and training of the entrepreneur, the development of the enterprise, and the development of an environment suitable for economic growth. The U.S. Department of Education, Office of Vocational and Adult Education, and the U.S. Department of Commerce, Minority Business Development Agency, have collaborated in funding this project which was operated by the School of Occupational and Adult Education, College of Education, Oklahoma State University.

The major project objectives were:

- ° To promote entrepreneurial education in vocational education at the secondary, postsecondary and adult levels, and to increase coordination with Minority Business Development Center service providers
- ° To assist vocational educators and Minority Business Development Center representatives in developing, improving, and expanding entrepreneurial training programs by developing program models, training strategies and bibliographies of resource materials
- ° To develop and disseminate entrepreneurial education materials for use by vocational educators and Minority Business Development Center service providers

This resource notebook has been designed for use by vocational administrators and educators and by Minority Business Development Center representatives. Direction and recommendations have been sought from members of both groups across the nation through a series of local and state seminars. We have attempted to incorporate as much of their input as time and space would allow. We encourage the use of this "hands-on" notebook as a beginning in the development and improvement of entrepreneurship education and training programs. We can guarantee that the resources we have provided in this notebook will lead you to a vast number of additional resources sufficient to meet any training needs you may have.

Material designed to supplement the notebook is contained in the Entrepreneurship Education Training Package also developed through this project. The Package describes the process of bringing education, government, and the private sector together in communities to collaborate on entrepreneurship education programs and offers strategies for accomplishing this gleaned from twenty-one seminars held around the nation. Appendix J provides instructions for ordering the Guide.

Our best wishes are extended to you in your endeavor to promote entrepreneurship education in your community.

ACKNOWLEDGEMENTS

The staff for a "Project to Promote Economic Development Through Entrepreneurship Education and Training" would like to express their thanks to all those individuals who have contributed to the development of the resource notebook. We gratefully acknowledge the work of Dr. Richard L. Lynch and colleagues, Virginia Polytechnic Institute and State University, and Jerry W. Gilley, Oklahoma State University, in conducting the formal literature review; of Dr. Garry R. Bice, Oklahoma State Department of Vocational-Technical Education, for the development of the Entrepreneurship Education Model as well as for the writing of various notebook sections; and of Dr. Raymond W. LaForge, Oklahoma State University, College of Business Administration, for the development of several sections of the notebook.

Dr. Donald W. Robinson, Dean, College of Education, Oklahoma State University, has been a source of support and encouragement throughout the project. We extend our appreciation to him for the creation of an environment conducive to our success.

The staff of the Oklahoma State Department of Vocational-Technical Education have also contributed generously of their time and resources to assist us with computer services, graphic design, printing services, and curriculum materials. We express our gratitude to all of these individuals. We extend our gratitude also to the members of the Project's Panel of Experts for the generous donation of their time in providing us with direction in the preparation of the notebook. Panel of Expert members include: Dr. Marion B. Holmes, Dr. Paul G. Larkin, Mr. Leo E. Presley, Dr. Gail Trapnell, Ms. Constance Gipson, Dr. Benjamin C. Whitten, Ms. Rita Gonzales, Mr. William H. Bailey, The Honorable Wes Watkins and Dr. M. Catherine Ashmore.

We have also received continued assistance and support in the way of research, materials and recommendations from Ms. Betsy Schwammberger, National Federation of Independent Business; Ms. Carol Eliason, National Small Business Training Network; Ms. Virginia McBride, National Association of Women Business Owners, Los Angeles Chapter; Ms. Arlene Priest, National Association of Homebased Businesswomen; Mr. John F. Robinson, National Minority Council, Inc.; as well as from the National Center for Research in Vocational Education, Ohio State University; the Center for Entrepreneurship and Small Business Management, Wichita State University; and The Center for Private Enterprise and Entrepreneurship, Baylor University.

To all those individuals and organizations that have so generously shared their ideas, materials, research and time, we extend our thanks. The enthusiastic support of numerous individuals and organizations has made the development of the resource notebook both a productive and an enriching experience.

INTRODUCTION

WHAT IS THE ROLE OF THIS RESOURCE NOTEBOOK: HOW CAN YOU USE IT?

Taken in a large context, entrepreneurship is just one avenue of economic growth and development within the American economy. It is, however, receiving increasing attention from the state and federal governments, as well as from the private sector, as perhaps one of the most important factors in the future economic development of our postindustrial society. Assuming that entrepreneurship plays a vital role in the present and future economic health of our nation, it becomes important to learn how to foster entrepreneurial behavior as well as how to provide an economic environment conducive to the success of new enterprises. Some of the questions this poses are:

- ° What are the personal characteristics needed by an individual to become a successful entrepreneur and can these characteristics be taught?
- ° What business and other skills are essential to the success of an entrepreneur and how can they best be infused into existing educational/service programs?
- ° What motivates individuals to become entrepreneurs and can such motivation occur in the classroom?
- ° What is the social and economic environment most conducive to the implementation and success of new business ventures and is it possible to create such an environment intentionally?
- ° What process should be used to obtain answers to these questions and subsequently to implement programs using the information obtained?

The amount of literature that has been produced in the last three years addressing these issues is greater than the sum of all that was written on the topic in the preceding thirty years according to the Center for Entrepreneurship and Small Business Management at Wichita State University. Despite this abundance of information, there is still no widely accepted definition of entrepreneurship, no consensus on the characteristics of entrepreneurs and whether or not they can be taught, no definitive answer to the question concerning what motivates individuals to become entrepreneurs and whether or not such motivation can be accomplished through education, little agreement on the socioeconomic climate most conducive to entrepreneurial success, and no overall plan or process for implementing what we do know or for researching what we do not.

Under these conditions, how can vocational educators and administrators move ahead in the area of entrepreneurship education? How can they justify the use of already limited resources for programs that are as yet largely experimental? These and other issues pertaining to entrepreneurship education will be addressed throughout this resource notebook in an attempt to clarify the role entrepreneurship plays in our economy and how education can contribute to its growth and success. You will find that this is a practical, "how-to" approach to this somewhat controversial issue. The notebook emphasizes the implementation of educational programs to teach those aspects of entrepreneurship that will be useful to students as life skills and which already have proven value. It was designed to assist vocational educators, Minority Business Development Centers, and other groups to assume leadership roles in promoting effective entrepreneurial education programs. Following are specific suggestions on how to use each section of the notebook.

Chapter I contains definitive information about the need for successful entrepreneurs and enterprises that will help clarify your understanding of the essential nature of entrepreneurship and free enterprise in our economy. You and your coworkers need these facts in order to highlight the importance and relevance of entrepreneurship education in your community.

Chapter II provides a conceptual model for a comprehensive entrepreneurial education approach. The responsibility of educational institutions for entrepreneurial training at each learning level is depicted along with the interrelated roles of business, industry, government, and the individual. You can help to bring this interaction to fruition at each learning level, i.e., elementary, secondary, postsecondary and adult. Strategies for supporting a comprehensive entrepreneurship education system in your community must encompass the five stages for entrepreneur and enterprise development, namely, awareness, development, application, venture, and assessment.

Chapter III describes the Entrepreneurship and Enterprise Development Process and provides a guide for you to examine the present status of entrepreneurship education in your community. You will need to identify basic target groups and training objectives for each of the five stages in the development of entrepreneurs and enterprises. Vocational educators need to enlist the support of the local Minority Business Development Center (MBDC) representative and/or other groups to infuse entrepreneurial training opportunities into existing prevocational and vocational programs, or to initiate separate programs at each learning level. In addition, part-time programs must be designed to provide incubator-type environments for adults venturing into businesses and for owners of growing businesses. Examples of model programs are included in the resource notebook to illustrate various instructional strategies and delivery systems used to facilitate the development of entrepreneurs and enterprises at each learning level, i.e., elementary, secondary, postsecondary and adult programs.

Chapter IV discusses minority entrepreneurship and explores what, if any, special training needs minority entrepreneurs may have at each of the five developmental stages. MBDC directors need to be aware of these needs and work with vocational educators and other groups to ensure that they are met at every educational level.

Chapter V suggests evaluation strategies for you to examine and improve the present status of entrepreneurial education in your community. You will need to focus evaluation strategies on the effectiveness of programs as well as on the individual student's aptitude, attitudes, motivation and entrepreneurial competencies.

Chapter VI includes specific information about agencies that can provide you with assistance in the development of entrepreneurs, enterprises and a healthy economic environment in your community. A variety of services are available to assist vocational educators and MBDC representatives. The mission and goals of the MBDC and the vocational education system are described along with the kinds of services provided for the development of entrepreneurs and enterprises. You will need to consider the suggested strategies which vocational educators can use in collaborating with Minority Business Development Centers and other groups in the community. Ideas are included to help you in obtaining the support of various local, state, and national sources of assistance for entrepreneurial programs at each learning level.

The Appendices are an additional feature of the resource notebook. The annotated bibliography includes available learning materials related to the various aspects of entrepreneurship education. Eight areas of vocational education are addressed: agriculture, business and office, health occupations, home economics, industrial arts, marketing and distribution, technical, and trade and industrial. Some of the materials are minority-oriented and some are suited to technical business assistance through MBDCs and other groups in the community involved in entrepreneur and enterprise development. A matrix is provided to guide you in identifying those materials best suited to your needs. The matrix is keyed to the five stages in the development of entrepreneurs and enterprises: specifically, awareness, development, application, venture, and assessment.

Also included in the Appendices is an annotated listing of assistance agencies, model program descriptions, an entrepreneurship program planning guide, and various other information which supplements the notebook chapters. A complete index of the content of the Appendices is located in the Table of Contents.

CHAPTER I

ENTREPRENEURSHIP: WHAT IS IT AND WHY IS IT IMPORTANT?

WHAT IS ENTREPRENEURSHIP?

Entrepreneurship is a word that has been defined and used in a variety of ways. Although no single definition for entrepreneurship has been widely accepted by the education community, there do seem to be certain elements which are present in a large number of the descriptions found in the literature. The definitive characteristics of entrepreneurship used as a basis for this project are taken from the work of Shapero and Sokol (1982). These authors have reviewed the literature and they suggest that entrepreneurship has five specific aspects:

- Initiative-taking: One or more individuals take the responsibility of founding a new business
- Consolidation of resources: The founders assemble resources and develop a business structure to accomplish some objective
- Management: The founders are actively involved in the management of the business
- Relative autonomy: The founders have a great deal of freedom in using the resources of the business
- Risk-taking: The founders are directly responsible for the success or failure of the business

A careful analysis of these characteristics suggests the similarity between entrepreneurship and the development and management of most small businesses. Small business owners typically take initiative, consolidate resources, manage with relative autonomy, and assume the risks of the business venture. Although one might argue that all small business owners/managers are not entrepreneurs, the terms are sufficiently synonymous to be used interchangeably throughout this notebook.

WHY IS ENTREPRENEURSHIP IMPORTANT?

Why is it important that entrepreneurs develop new business ventures? What is the contribution of entrepreneurship to the economy and society? The Preface to the Encyclopedia of Entrepreneurship (Kent, Sexton and Vesper 1982) states:

Humanity's progress from caves to campuses has been explained in numerous ways. But central to virtually all of these theories has been the role of the "agent of change," the force that initiates and implements material progress. Today we recognize that the agent of change in human history has been and most likely will continue to be the entrepreneur.

A similar view has been expressed by Frank Carney, the founder of Pizza Hut, Inc. (Christy and Jones 1982): "Entrepreneurs are the cornerstone of the American Enterprise System, the self renewing agents for our economic environment."

Although these statements provide eloquent support for the importance of entrepreneurship, they do not present specific illustrations of the contribution entrepreneurship makes to the economy and society. However, statistical evidence from a variety of sources (Christy and Jones 1982; Kent, Sexton, and Vesper 1982; Naisbitt 1982; The State of Small Business 1983) suggests that small business/entrepreneurship is important because:

- Most businesses in the United States are considered to be small businesses (approximately 95%)
- New business ventures are being formed at a rapid rate (approximately 600,000 per year)
- Small businesses generate almost half of the sales produced by all firms in the United States (approximately 45%)
- Small businesses employ almost half of the workers in all American firms (approximately 48%)
- The development of new ventures and the expansion of existing small businesses have accounted for the majority of new jobs added to the economy in recent years (approximately 60%)
- Small businesses have been responsible for the development of many active products and processes (approximately 2.5 times as many as large firms)

of small business/entrepreneurship to the economy and society. Small businesses are responsible for providing a wide range of services, and jobs necessary for economic development. They are also responsible for producing many of the goods and services that make up the picture and functioning of society. As a result, an emphasis on services, the role and importance of entrepreneurship should increase because small

businesses are especially dominant in the service sector of the economy. It is natural to assume that it is important to preserve and foster the continuing success of small business in America.

WHAT IS THE ROLE OF EDUCATION IN ENTREPRENEURSHIP?

Education can play at least three legitimate roles in the development of entrepreneurship. One role is as an advocate for entrepreneurship. Educators and trainers can ensure that students are presented with entrepreneurship options in their career choices. Students should be encouraged to investigate the possibility of starting new businesses or going to work for small businesses as they plan their educational programs. This encouragement should occur at all levels of the educational process, but appears to be especially critical at the secondary and postsecondary levels. Most vocational programs have been oriented toward preparing students as employees. Only in recent years has there been a substantial increase in the number of colleges and universities offering courses or programs in entrepreneurship/small business (Vesper 1982). More emphasis on the desirability and feasibility of entrepreneurial careers at all levels of education should lead to the establishment and success of an increased number of small business ventures.

The second role of educators/trainers is to ensure that students have the necessary business and technical skills to be successful in entrepreneurial careers. There is considerable evidence to support the fact that the failure rate of small business is very high and that many of these failures are due to poor management (The State of Small Business 1983). Larry Jones, President of the Coleman Company, Inc., has observed:

To be successful in any business, big or small, the entrepreneurial spirit is essential. However, one's drive must be tempered by a working knowledge of sound management practices. A recent Dun and Bradstreet study shows that poor management accounts for the vast majority of failures of new businesses. Management, then, is the fiber which holds all successful businesses together, and is a subject of the most careful study. (Christy and Jones, 1982)

Management in an entrepreneurial venture includes knowledge and skills covering all business functional areas (marketing, accounting, finance, etc.) as well as the technology of the product/service being offered by the business (welding, computers, sporting goods, etc.). Although there is some disagreement as to how many of the ingredients of successful entrepreneurship can be taught and learned, there are many important mechanical components to developing and managing a small business (Timmons 1982). These mechanical components (designing an accounting system, performing cash flow analysis, developing a business plan, etc.) are learnable and should be emphasized by those educating entrepreneurs.

At some future time, researchers may agree upon the personal characteristics of successful entrepreneurs and what it is that motivates them to initiate new enterprises. As indicated by examples in Appendix G, information is available on these topics and they continue to generate a great

deal of interest. Once a consensus has been reached, educators will have to address the problem of feasibility: i.e., can these personal characteristics be taught effectively in the classroom; can motivation occur; and if so, how? Until these questions have been more satisfactorily resolved than is presently the case, they cannot be seen as subjects of serious concern for program planners within the public vocational education system who must carefully justify the use of their resources. It would seem reasonable to encourage educators and others involved in entrepreneurship education and training to concentrate their efforts on ensuring that students understand the free enterprise system, are fully aware of the possibility/acceptability of entrepreneurship as a career option, and possess the basic business and technical skills they will need to form a solid foundation for advanced business/technical training. Students who show an interest in pursuing entrepreneurial careers could then be channeled into smaller programs which would address their specific developmental needs.

The third, and probably most important, role that vocational educators can play in the development of entrepreneurship is one of leadership at the national, state and local levels. It appears that entrepreneurship education has reached the proverbial crossroads (Sexton 1984). If it is to grow as an academic discipline with a somewhat consistent delivery system reaching all educational levels, some agency/institution must serve in the leadership role to address the issues of research, curriculum development and coordination, teacher training, and delivery systems. Vocational education has a long history of successful collaboration with government, community, and business/industry and can use this expertise and existing network to initiate collaborative efforts for the development, expansion and improvement of entrepreneurship education programs.

Successful entrepreneurship is a product of the existence of willing and able entrepreneurs, enterprise opportunities, and a healthy economic environment, as illustrated in Figure 1. This necessitates collaboration among the entities which comprise each of these areas. Political entities such as city council members, mayors, state legislators, and governors must introduce legislation and economic planning programs which enhance economic development in the private sector and which support entrepreneurship education in the public sector. Government agencies and the private sector must make venture capital available to promote the initiation and growth of businesses likely to succeed in that area. Education must prepare students to successfully own, manage, and work in those businesses. Economic development will result only if all of the factors for business success coexist, and education can play a key role in promoting entrepreneurial behavior and new enterprise development by opening the channels of communication with other agencies and institutions concerned with the development of entrepreneurs and enterprises.

Through the collaboration of the agencies and organizations
 healthy economic development environment,
 identifying and developing successful
 promote and receive the benefits of economic
 available to collaborate in the support
 development includes the myriad of
 institutions represented at the local, state,

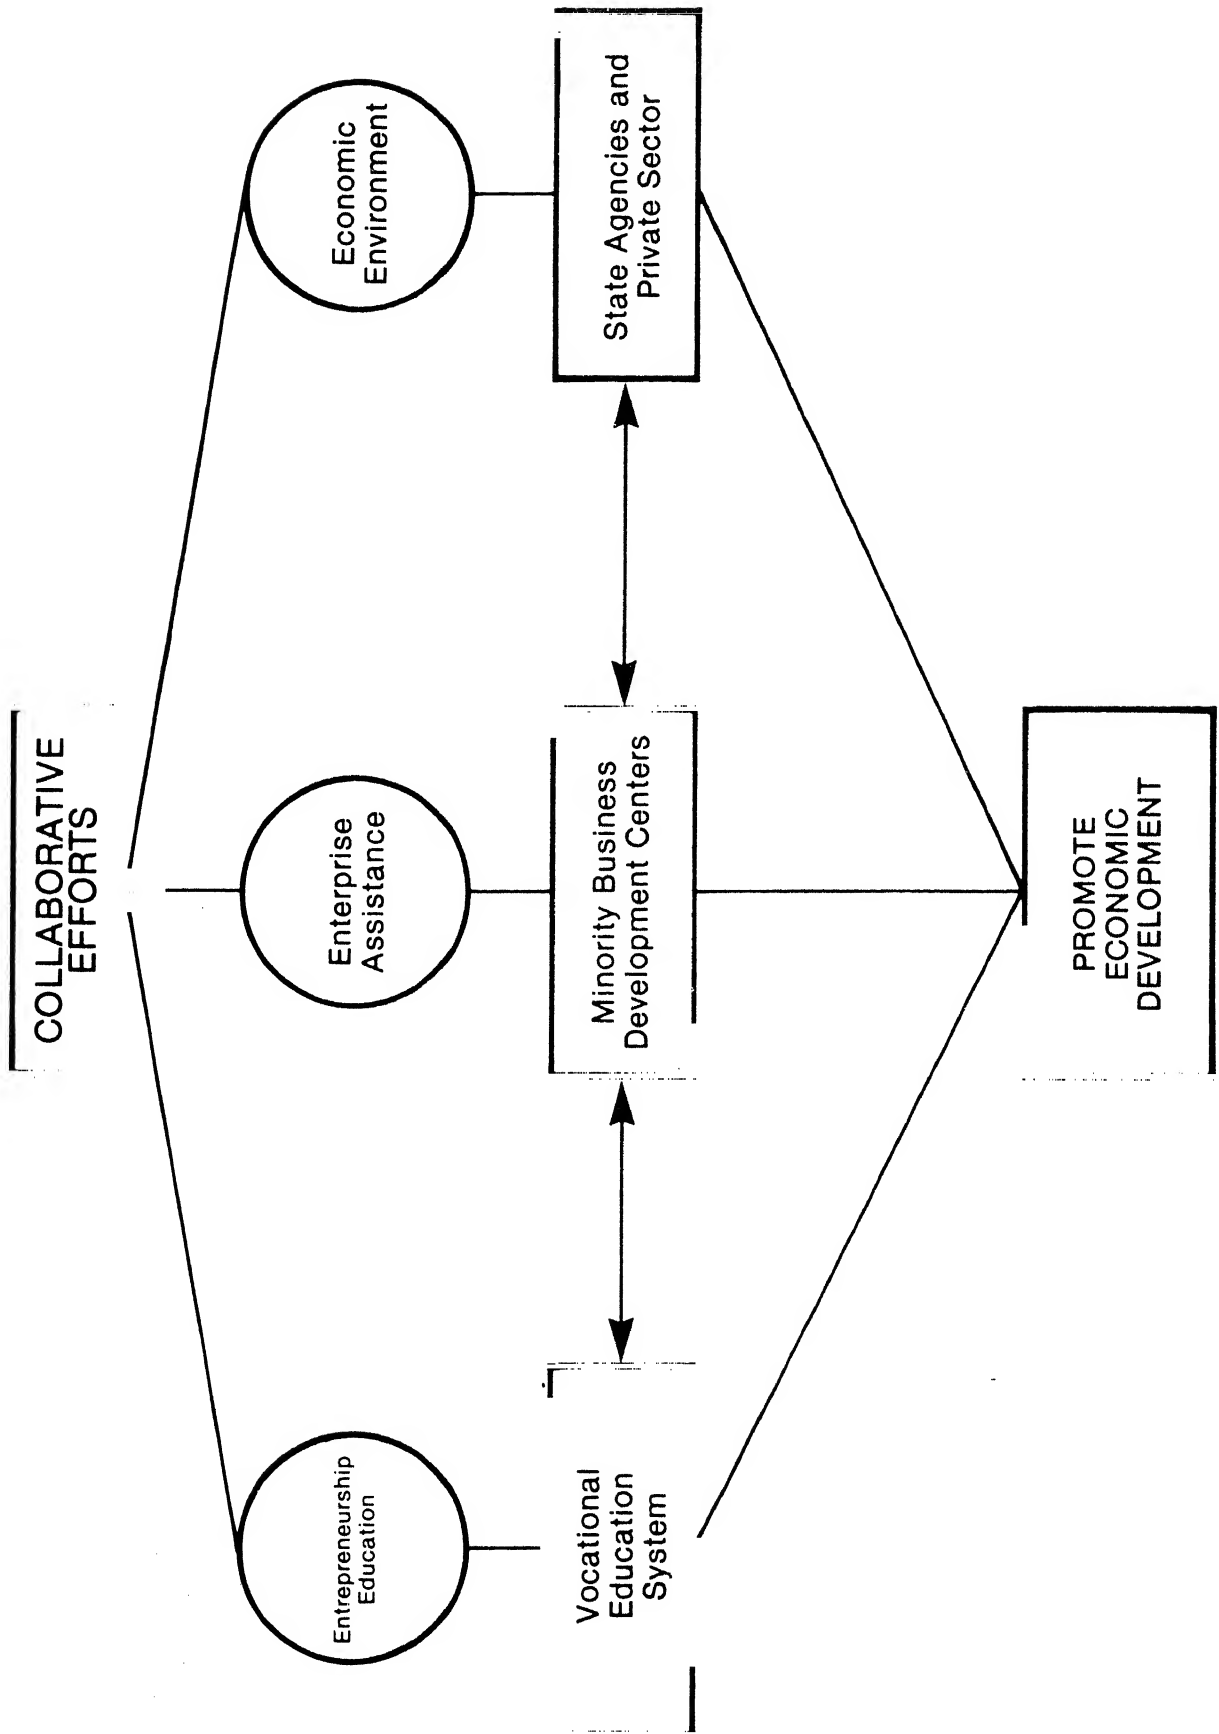

Figure 1

The following chapter contains a conceptual model for entrepreneurship education which illustrates its cooperative nature and presents five developmental stages required for individuals to become successful entrepreneurs. The Entrepreneurship and Enterprise Development Process is expanded in Chapter III to describe these five developmental stages, along with target groups, basic training objectives, educational/instructional strategies, and selected model programs. Chapter IV outlines some of the training needs of minority entrepreneurs. A general plan for evaluation of individual achievement and program results is included in Chapter V, and Chapter VI summarizes assistance programs for the Entrepreneurship and Enterprise Development Process. Additional information is located in the Appendices, including an annotated bibliography which lists current resource materials available on entrepreneurship and an annotated listing of assistance agencies.

CHAPTER II

ENTREPRENEURSHIP EDUCATION: WHERE DOES IT FIT?

Although there is not yet a universally accepted definition of the term "entrepreneur," considerable resources have been expended for curricula, instructional materials, and programs to encourage the development of entrepreneurs and enterprises. There is an obvious need for helping an educated citizenry to move toward and to keep pace with trends of the future. If entrepreneurship is to become an even more significant part of our future, it becomes imperative that the educational system devise a means whereby entrepreneurial awareness and skills can be taught as a part of a total educational program. Furthermore, students must be made aware that entrepreneurship is a viable alternative to seeking employment and working for someone else.

ENTREPRENEURSHIP EDUCATION MODEL

A conceptual model for entrepreneurship education was viewed as a primary basis for designing and completing the tasks associated with the project for "Promoting Economic Development Through Entrepreneurship Education and Training." The project staff believed that development of a conceptual model would in turn provide a framework for organizing, developing, and implementing various activities and tasks inherent in this particular project. In fact, it has become just that. The notebook and products of this project are all based on and directed toward the model described in this chapter.

In developing the Entrepreneurship Education Model, several general concepts were considered to be fundamental and overriding determinants of strategies for developing entrepreneurial businesses in the United States. Those concepts include the following:

- ° Society (including business, industry, government, and technology) is moving toward an entrepreneurship context
- ° A change process model must be employed as a strategy to encourage vocational education instructors to include entrepreneurship training as a major focus of their programs (a shift away from the basic tradition of preparing individuals to work for someone else)
- ° Development of favorable attitudes toward entrepreneurship, as well as creativeness and innovativeness, must be a focus of future training programs

- The individual's personal development is linear. At the same time it is recognized that each individual's processes or steps vary and do not follow a lock-step approach
- Personal, technical, and managerial skills for entrepreneurial activities must be developed
- Education, business, industry, government, and the individual each has a key role to play in the development of the entrepreneur
- Development of programs, materials, and strategies must result from public/private collaborative efforts, planning, and participation

In further consideration of the model, historical data regarding entrepreneurial activity were studied. In addition, barriers to successful entrepreneurship establishment, particularly those affecting minorities, were identified. These efforts led to the conclusion that the single most important problem in entrepreneurship development is the lack of an integrated, coordinated, and systematic plan to mobilize all of the available resources and to focus efforts on the points of greatest potential payoff. The importance of collaboration and networking was clearly identified, and these needs were consistent with the design of our project. Vocational education has a history of seeking advice from business and industry. That advice, however, has generally been oriented toward technical skills needed by students to work for someone else. This advice-seeking role needs to be expanded to include the preparation of individuals to go to work for themselves. By developing a model that delineates who is to be served, what types of needs must be met at what time, and how those needs should be filled, a format involving public/private collaboration began to take shape.

The model presented on the next page (Figure 2) has five stages which are a part of the process whereby individuals become successful entrepreneurs. To achieve this outcome, individuals must develop an awareness (Stage One) of entrepreneurial career options in the free enterprise system together with an information base and basic literacy, currently a part of our educational system. The model depicts this as usually happening at the elementary age level and continuing through the secondary, postsecondary, and adult levels depending upon individual needs, motivation, interests, and other factors. On the left side of the model it is noted that the individual has the prime responsibility for this development, with educational institutions and agencies also playing a role (e.g., the public school system delivers the program for teaching reading, writing and arithmetic). Further exposure to entrepreneurial ideas often occurs at the middle, junior high, and early secondary levels, and continues throughout an individual's lifespan. Development of technical and business skills (Stage Two) most often begins at or about the secondary educational level. It is here that technical skill development, including specific occupational skills such as welding, computer programming and accounting, and entrepreneurial business skills, such as cash flow management and insurance needs, are initially developed through vocational education. On the left side of the model, we note that the individual still has the major responsibility for acquiring these competencies through programs and services offered by educational institutions. At the same time, business, industry, government, and trade and professional

Figure 2

programs can be developed for each stage of the total entrepreneurial development process. It is then possible to direct efforts toward producing awareness of and interest in entrepreneurial careers at an early age and then providing the proper guidance, training, and education to ensure successful progression through each stage of the process. The model also leads to an integrated approach to entrepreneurship training by incorporating and coordinating the expertise of various organizations at the appropriate stage. For example, the model suggests that the regular education system should be the basic conduit for entrepreneurial training since most individuals have direct and continuous contact with it throughout their lives. Other sources of entrepreneurial assistance (government and private) are viewed as auxiliary and should be infused at the appropriate stage to supplement the regular education system. As an integrated approach, the model depicts entrepreneurial development beginning at an early age and potentially continuing throughout the productive life of the entrepreneur.

The following chapter outlines specific strategies for implementing entrepreneurship education programs at all educational levels and at each developmental stage in the Entrepreneurship Education Model. It includes examples of model programs which have successfully incorporated entrepreneurship training into existing educational programs as well as programs which have been successful as free-standing, self-contained units of entrepreneurship instruction.

CHAPTER III

ENTREPRENEURSHIP AND ENTERPRISE DEVELOPMENT PROCESS: HOW DO I DO IT?

The Entrepreneurship Education Model introduced in Chapter II (Figure 2) provides a framework for developing comprehensive and integrative approaches to entrepreneurship training. The framework divides the process of creating successful new ventures into several sequential stages and relates each to the typical progression of an individual through the regular educational system. The purpose of Chapter III is to provide a handbook-type approach for vocational educators to use as a basis for developing effective self-contained entrepreneurship training programs, as well as for infusing training into each existing program across the spectrum of vocational education service fields at the prevocational/elementary, vocational/secondary/postsecondary and adult levels.

IMPLEMENTATION OF ENTREPRENEURSHIP EDUCATION MODEL

The Entrepreneurship and Enterprise Development Process depicted in Figure 3 indicates the three stages related to the development of entrepreneurs and the two stages concerned with the development of enterprises. Thus, it is possible to identify distinct training needs and to develop educational and instructional strategies for each stage in the process. This approach leads to comprehensive entrepreneurship training since specific training strategies and programs can be developed for each stage of the total entrepreneurial development process. Efforts can be directed toward producing awareness of and interest in entrepreneurial careers at an early age and then providing the proper guidance, training, and education to ensure that individuals progress successfully through each stage of the process.

Viewing entrepreneurial development in this manner suggests important training implications. The long-run development of a continuous supply of successful entrepreneurial ventures requires the implementation and coordination of training beginning at the elementary level and continuing through the postsecondary/adult levels. In the short run, however, the development of effective training programs requires that the individual's current stage of entrepreneurial development be ascertained (COMMITMENT) and then specific instruction provided to assist the individual through the remaining stages in the process. For example, some individuals will possess the competencies and commitment to be entrepreneurs and will need assistance only in developing the enterprise. Other individuals at the same age level may have deficiencies in basic business and/or technical skills and should receive the training suggested for stages two or three before progressing to stage four.

ENTREPRENEURSHIP AND ENTERPRISE DEVELOPMENT PROCESS IMPLEMENTATION MODEL

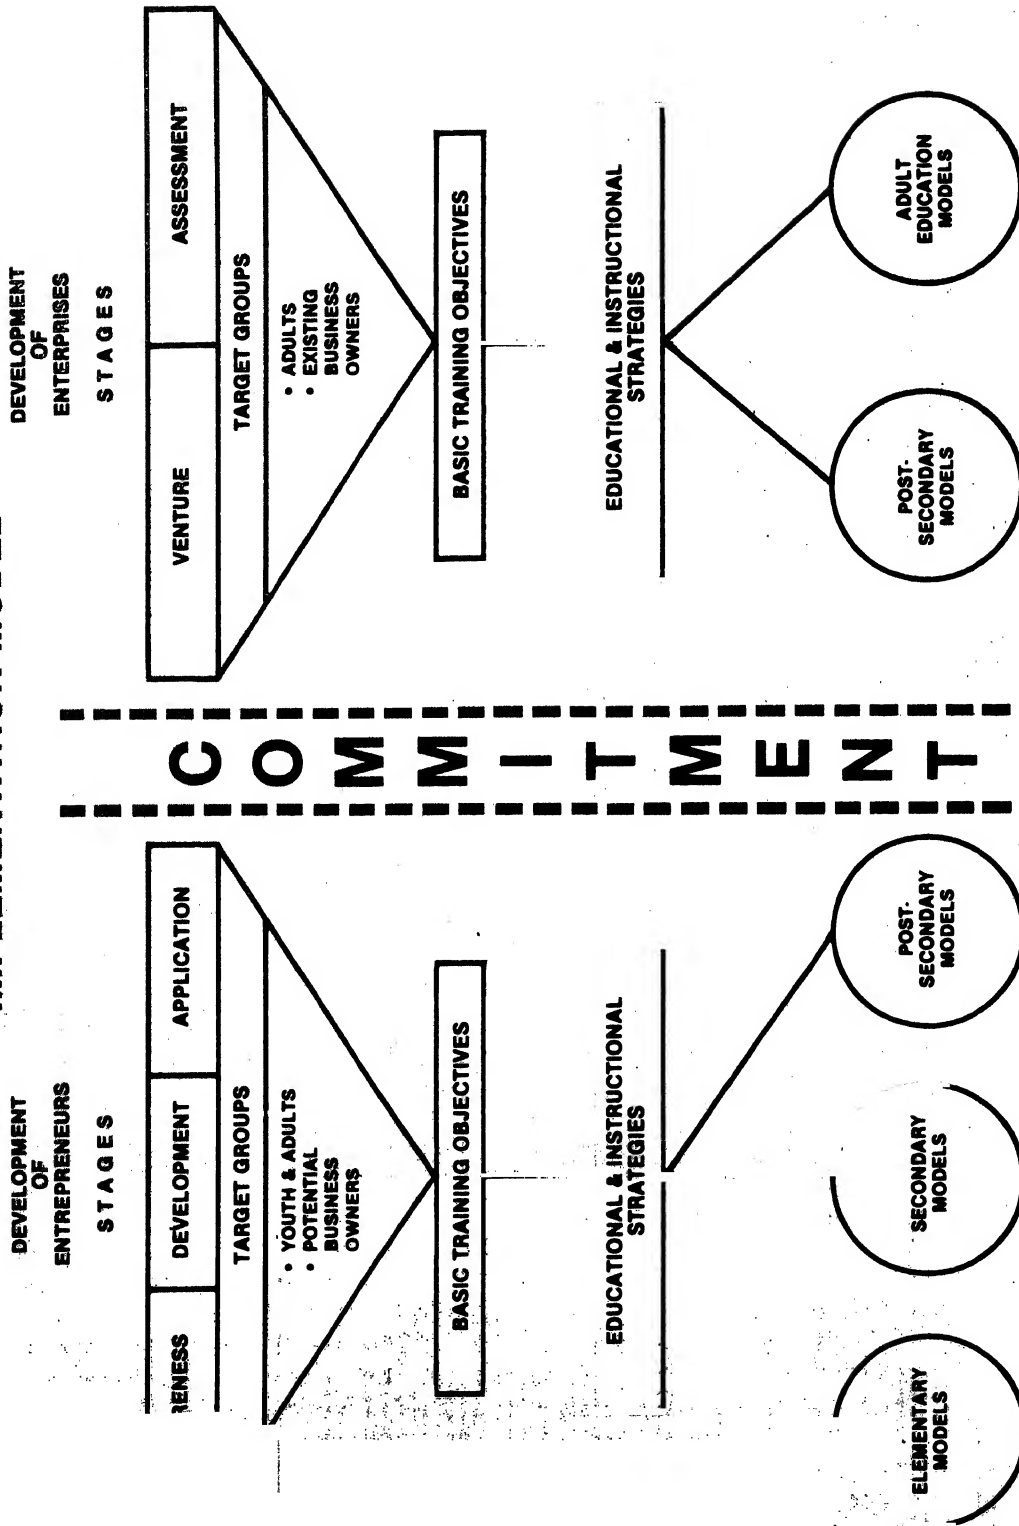

Figure 3

Program planners and curriculum developers in vocational education systems need to identify basic target groups and establish major training objectives for entrepreneurship programs at each learning level in the educational system. Some alternative approaches for organizing entrepreneurship training strategies are suggested by Davis and Zelinko (1982) in their Guide for Program Planning. They point out the primary responsibility of vocational educators for extended entrepreneurship training as follows:

...to provide students with the wherewithal to earn a living as an employer or employee..... The first task is to identify the environment within the local setting that will best meet the needs of the students who are being served...There are a number of possible combinations that exist for entrepreneurship training at all school levels and in all settings where vocational, technical and adult education occur. Three examples are suggested as follows: as a separate program in high school; as a part of an existing occupational program; and as a part-time program for adults.

Target populations, instructional goals and delivery system options must be identified in order to design and implement effective entrepreneurship programs at the local level. The five essential steps in developing entrepreneurship training are designated by Davis and Zelinko (1982) as: (1) Assessing the Status of Your Situation; (2) Defining the Problem; (3) Selecting the Solution; (4) Implementing the Solution; and (5) Monitoring the Solution. Guidelines for each step are included in the excerpts from Davis and Zelinko's book (1982) in Appendix D, along with a partial list of instructional techniques which may be used in achieving entrepreneurial training objectives related to the developmental stages and to basic target groups.

A variety of educational instructional strategies may be used in achieving effective entrepreneurship training at each learning level. Many of these instructional techniques are illustrated in the model programs selected as examples at each educational level in the development of entrepreneurs and enterprises. The following criteria were used to identify model entrepreneurship programs:

- 1) Model represents one of the developmental stages, i.e., awareness, development, application, venture, and/or assessment
- 2) Model represents one of the learning levels, i.e., elementary, secondary, postsecondary, and/or adult
- 3) Model represents one of the types of vocational programs--i.e., agriculture, home economics, marketing and distribution, trade and industrial, technical, health occupations, business and office, and industrial arts--or is generic in nature and can be adapted to various programs
- 4) Model represents a creative, unique use of instructional strategies, techniques, or activities

A matrix of the selected model programs is shown in Figure 4, with an indication of the developmental stages and educational levels each program represents. Reference is made to the model program examples in the following discussion of training objectives and instructional strategies suggested for each stage in the development of entrepreneurs and enterprises. The 15 model programs selected as examples are described in more detail in Appendix B.

DEVELOPMENT OF ENTREPRENEURS

Stage One: Awareness

Target Group. The first objective in the entrepreneurial training process is to ensure that individuals possess an adequate information base of basic communication, mathematical and computer skills, and are exposed to entrepreneurial ideas. Typically, this knowledge and these skills would be provided by the regular educational system beginning at the elementary level and continuing through postsecondary programs. The basic target group for this type of training is youth, but individuals in other age groups may be deficient in some of these areas and require specialized training before pursuing entrepreneurial careers.

Training Objectives. Effective written and oral communication skills and sound foundations in basic mathematical and computer operations are important in most vocations and are critical to entrepreneurial success. Entrepreneurs must be able to communicate effectively with many different groups: customers, employees, bankers, government officials, community leaders, etc. The development and operation of a business is essentially a series of exchanges between two parties. Communication skills are required to successfully transact these exchanges, and mathematical and computer skills are necessary to evaluate potential exchanges and assess business performance. Some specific examples of the need for communication and mathematical skills in the development and management of a business enterprise are as follows:

- ° Oral and written communication skills are required to inform employees of the important policies, plans and procedures that affect the performance of their jobs
- ° Obtaining financing for a new venture typically requires written communication and mathematical skills to develop a business plan and oral communication skills to present this plan to potential investors and/or financial institutions
- ° Mathematical skills are required to read and evaluate financial statements, and computer skills can be used to develop forecasts and budgets in business planning

MODEL PROGRAMS FOR ENTREPRENEURSHIP EDUCATION AND TRAINING

EDUCATIONAL LEVELS

	PREVOCATIONAL/ELEMENTARY	VO-TECH SECONDARY	VO-TECH POSTSECONDARY	ADULT
DEVELOPMENTAL STAGES	AWARENESS: Basic Skills and Entrepreneurial Ideas	Model 1 A Free Enterprise Elementary Career Education Project: Academic Skills Application (1980) Model 2 The Kinder Economy: A Case Study of Kindergarten Pupils' Acquisition of Economic Concepts (1977)	Model 3 Exploration of Entrepreneurship as a Career Option (1983) Model 4 Entrepreneurship and Black Youth (1980)	Model 5 Southeast Oklahoma Rural Entrepreneurship/Industry Program (1981) Model 6 Entrepreneurship for Kids (1984) Model 7 Entrepreneurship Awareness and Training for Public School Teachers (1983)
	DEVELOPMENT: Technical and Business Skills		Model 8 Steps to Starting a Small Business (1981)	Model 5 Southeast Oklahoma Rural Entrepreneurship/Industry Program (1981)
	APPLICATION: Occupational Skills and Entrepreneurship Competencies		Model 9 Entrepreneurship Preparation for Vocational Education Programs (1978) Model 10 Junior Achievement (1919)	Model 5 Southeast Oklahoma Rural Entrepreneurship/Industry Program (1981)

COMMITMENT

VENTURE: Enterprise Development			Model 12 Small Business College (1980)	Model 11 The Hawaii Entrepreneurship Training and Development Institute (1977)
ASSESSMENT: Management, Development, Expansion and/or Redirection			Model 13 Small Business Management: Vocational Programs (1980)	Model 14 Educational Assistance Programs for Retail Entrepreneurs (1983) Model 15 Minnesota Entrepreneur's Club (1989)

* Each Model Program is described in more detail in Appendix B.

Figure 4

Shapero and Sokol (1982) argue that two factors related to the company formation decision are the individual's perceptions of a) the desirability and b) the feasibility of an entrepreneurial career. These perceptions are largely determined by the cultural background and social situation of the individual. When cultural and social influences place a high value on entrepreneurial activity, it is more likely that the individual will perceive entrepreneurship as desirable and feasible and seriously consider the formation of a new venture.

This suggests that one important factor in increasing the entrepreneurial development of minority groups is to increase minority members' perceptions of the desirability and feasibility of entrepreneurial careers. The first step in developing these perceptions is the generation of awareness of and interest in entrepreneurship at an early age. Minority and other potential entrepreneurs need to believe that forming entrepreneurial ventures is highly valued in their cultural/social system and that it is possible for them to overcome any barriers to venture formation. Youth as potential entrepreneurs should be made aware of appropriate educational tracks so that they can plan programs of preparation for entrepreneurial careers.

Educational/Instructional Strategies. Vocational education leaders and program planners should identify the environment within the school system that will meet the needs of the individuals to be served. K-12 and postsecondary/adult education programs should be examined for current activities relating to entrepreneurial awareness. Particular attention should be given to the importance of basic skills and exposure to the entrepreneurial concept for local minority groups. The potential for infusing entrepreneurship training should be considered by vocational educators, school administrators and staff, citizen groups, and other assistance agencies such as MBDCs, SBA, and SCORE.

1. Prevocational/Elementary Level: Elementary students are forming values and attitudes which influence career choices. An emphasis on economic and career education has already been incorporated into the K-12 curriculum in many public schools. Exposure to the entrepreneurial role in the American economy, the free enterprise system, and opportunities for entrepreneurship as a career goal should be introduced in the elementary grades. The development of programs such as the "Kinder-Economy" and the "Mini-Society" referred to by Kent (Materials for Entrepreneurship Education 1981) affords an opportunity for the inclusion of the entrepreneurial role in the free enterprise system.

Delivery System Alternatives:

- ° Create opportunities for elementary students to relate to role models who are successful entrepreneurs, including representatives from minority groups in the community. Kent (Materials for Entrepreneurship Education 1981) notes that entrepreneurs often are not accorded the same status as athletes, politicians, military heroes, and professionals in the community or in literature used at elementary and junior high levels

- Adapt the "Mini-Society" approach referred to by Kent (Materials for Entrepreneurship Education 1981) to help elementary and junior high school students set up a functioning community with political structure as well as business firms and financial institutions which provide examples of the entrepreneurial roles of both minority and nonminority leaders in the local area

Examples of Model Programs:

- The Free Enterprise Elementary Career Education Project*(Model 1) represents an attempt to help elementary students learn more about our economic system and various jobs involved in the operation of the system. Students see how to apply skills learned in academic classes to practical situations and also learn job skills
- The Kinder-Economy Program (Model 2) is a teacher-guided program which introduces basic economic concept activities. The experimental program is based on the belief that young children can identify and comprehend economic concepts and apply them to real situations using their own laws. Nine decision-making and analytical concepts are explored

2. Vocational/Secondary Level: High school students are viewing career opportunities and can compare the roles of employers and employees. Awareness of entrepreneurship as a vital ingredient of the free enterprise system and expansion of basic entrepreneurial skills can be a part of the existing vocational-technical education curricula at the secondary level. Students at this level may be potential entrepreneurs and should have an opportunity to understand the complexity and the pitfalls, as well as the possible rewards, of small business ownership. The role of small business in the community should be stressed as a factor in nurturing entrepreneurship and in generating jobs and technological advancement in the private sector.

Delivery System Alternatives:

- Incorporate an entrepreneurial concept and career opportunities unit into an existing occupational program as an extension of economic and career education. School stores and other sales projects in many vocational programs form an ideal base for encouraging the entrepreneurial spirit among high school students
- Initiate a special entrepreneurial opportunities course as a marketing and distributive education elective for students who may want to stay in rural areas with limited employment opportunities, specifically minority students who have gained basic occupational skills

* Detailed descriptions of all model training programs are located in Appendix B.

- ° Plan a series of entrepreneurship speaker seminars in order to accelerate the exposure of high school students to a variety of successful entrepreneurs representing minority and nonminority groups in the community. An entrepreneurial advisory group could be established to facilitate the selection of speakers and to plan field trips to small businesses owned by representatives of local minority groups

Examples of Model Programs:

- ° Exploration of Entrepreneurship as a Career Option (Model 3), planned at the high school level, aids students in exploring entrepreneurship opportunities through ongoing vocational education programs. Entrepreneurial concepts are infused into the curriculum through photography, food service, horticulture, and auto mechanics classes. One hour per day of a regular three-hour period is devoted for six weeks to outside speakers representing both single-owner and larger businesses and to learning activities which encourage students to look at business ownership as a career option
- ° Entrepreneurship and Black Youth (Model 4) is offered at the secondary level to acquaint students with the idea of entrepreneurship, and motivates students towards entrepreneurship as a career goal. Students are exposed to successful Black role models

3. Postsecondary/Adult Levels: Adult education programs are viable avenues for creating awareness of entrepreneurial opportunities in the free enterprise system. Attention should be focused on adults who are unemployed and on those who are employed part-time or full-time and may wish to upgrade their skills and become self-employed. Awareness of opportunities to become employers rather than employees should be one of the aims of adult education programs.

Delivery System Alternatives:

- ° Schedule seminars on entrepreneurship opportunities at local employment centers such as shopping malls. Cosponsor seminars with groups interested in encouraging entrepreneurial careers, such as MBDCs, SBA, and SCORE. Individuals who are currently managing small businesses and are interested in owning their own businesses comprise a good participant group
- ° Schedule seminars for adults at various times during the day or evening on specific topics relating to entrepreneurial opportunities. Leaders of organizations of small business owners, especially minority entrepreneurs, should be invited, along with a variety of other successful entrepreneurs in the community. Many individuals need role models to challenge them to consider becoming employers rather than employees

Examples of Model Programs:

- ° The Southeast Oklahoma Rural Entrepreneurship/Industry Program (Model 5) includes an exploration unit in Phase 1 which focuses on free enterprise and entrepreneurship--discovering the world of small enterprise, examining entrepreneurship as a career, and finding new enterprise ideas
- ° Entrepreneurship for Kids (Model 6) is an inservice program designed to make teachers aware of the importance of small business and entrepreneurship in our economy. Information, resources and learning activities are provided to help K-12 students consider and evaluate the career goal of owning their own businesses
- ° The Teacher Practicum - Entrepreneurship Awareness and Training for Public School Teachers (Model 7) provides elementary and secondary public school teachers with opportunities to update their knowledge of entrepreneurship. The program involves two weeks of classroom activity at the University of Texas and four additional weeks of observation at sponsoring businesses

Stage Two: Development

Target Group. The second stage in the entrepreneurial training process involves the development of the required technical and business skills. Technical skills involve the occupational area of the proposed venture (welding, engineering, etc.). Business skills include general management procedures as well as specific skills in each of the major business functional areas (marketing, finance, accounting, etc.). The major target group for this type of training is potential business owners who can generally be reached at the secondary and postsecondary educational levels.

Training Objectives. Since most new business ventures start with very few employees, the entrepreneur typically must perform most of the business and technical activities required in the operation of the venture. This means that the entrepreneur must have skills in a variety of areas included in Table 1.

Although an entrepreneur may have employees who specialize in some of these areas or may purchase certain specialized services (e.g., accounting and law), a broad knowledge of technical and business skills is necessary to effectively manage a new venture. The entrepreneur is responsible for the performance of the business and must either personally perform the required business and technical activities or be able to evaluate how well the activities have been performed by others.

Educational/Instructional Strategies. Vocational education leaders and program planners should assess the availability of technical and business skills in existing curricula at the secondary and postsecondary/adult levels. In settings where vocational and technical education occurs, it may be necessary to refocus technical and business skill courses toward entrepreneurial competency requirements which address student needs as potential employers rather than employees.

TABLE 1 - EXAMPLES OF ENTREPRENEURIAL SKILLS AREAS

Technical Skills

- How to operate the latest technology in a business area
- How to perform all activities related to presenting products/services to consumers
- How to evaluate the quality of products/services produced

General Management

- How to develop a strategic plan
- How to implement the strategic plan
- How to evaluate and control the strategic plan

Marketing

- How to analyze the potential of markets
- How to develop sales forecasts
- How to determine the appropriate prices for products/services
- How to promote the business

Finance

- How to calculate the expected rate of return on potential investments
- How to perform financial ratio analysis
- How to determine capital needs

Risk Management

- How to identify growing risk exposures in business
- How to measure, analyze, and manage risk factors
- How to purchase commercial insurance against risk
- How to manage and finance self-insurance/reinsurance aspects

Accounting

- How to prepare and interpret income statements
- How to prepare and interpret balance sheets
- How to perform cash flow analysis

1. Vocational/Secondary Level: High school youth are developing technical and business skills in existing occupational programs. Several approaches to entrepreneurship training should be considered in settings where vocational and technical programs exist.

Delivery System Alternatives:

- ° Existing occupational programs could be utilized to provide opportunities for the development of entrepreneurial skills:
 - Instructional content could be part of a capstone program available either concurrent with, or after, occupational training. Students would be involved for several class periods each week throughout the year
 - Instructional content could be included as a part of every occupational program to provide students with creative experiences and knowledge related to opening small businesses
- ° Separate programs could be designed to focus on entrepreneurship skills for advanced secondary students:
 - Team-teaching situations with students rotating among technical and business skill courses could be utilized
 - A senior seminar could be offered to emphasize entrepreneurial skills gained in technical and business courses

Examples of Model Programs:

- ° The Steps to Starting a Small Business Program (Model 8) was developed by the Business Education Council in the Department of Public Instruction for the Madison City Schools in Wisconsin. The free-standing program structure provides for a daily one-semester course for eleventh and twelfth-grade students. Business Education Council members assist in teaching the in-school and outside activities

2. Postsecondary/Adult Levels: Adults who are opening small businesses, or who own existing businesses, may need to develop/improve their business and technical skills. Individuals who are employed full-time may wish to upgrade their skills. Davis and Zelinko (1982) suggest several options that could be made available as part-time programs for adults, as illustrated in the following delivery system alternatives.

Delivery System Alternatives:

- Seminars offered at various times during the day or evening on specific topics related to entrepreneurial skills, i.e., management procedures, bookkeeping, marketing, and technical skills in occupational areas of the business venture can be scheduled
- Individualized, self-paced modules can be completed at home with assistance and evaluation by a school facilitator

Examples of Model Programs:

- The Southeast Oklahoma Rural Entrepreneurship/Industry Program (Model 5) is a five-year pilot project and provides a basic skills program in three area vocational/technical schools for youth and other individuals who have dropped out of school or who have a pattern of severe unemployment/underemployment. The format for the program is the open-entry/open-exit system in which students start at different times, are self-paced, and exit independently as competency objectives are completed

Stage Three: Application

Target Group. The third stage in the entrepreneurial training process is focused on the practice and refinement of technical and business skills. On-the-job experience appears to be an important component in the development of successful entrepreneurs. It provides the potential business owner with the opportunity to "practice" the business before actually starting the venture and may lead to the generation of ideas for developing new business concepts. The target groups at this stage in the entrepreneurial process are youth and adults who want to establish their own businesses. Advanced secondary and postsecondary programs should provide opportunities to reach these two target groups.

Training Objectives. Business experience is extremely important for at least two reasons. First, it provides the entrepreneur with opportunity to apply, practice and refine the skills learned during training. This experience appears to be critical since lack of experience is often cited as a major cause of small business failure (Scott, and Trueblood 1978). Secondly, Cooper (1978) suggests that experience in a specific business is a "catalyst" for the development of ideas that lead to new business. Thus, working in a specific business seems to provide the potential entrepreneur to identify new and market specific goods/services.

Educational/Instructional Strategies. Vocational education leaders and program planners should be aware of the need for practice and refinement of technical and business skills. This vital stage is an integral part of the development of entrepreneurs and should be considered an outgrowth of early developmental stages one and two. The potential for infusing application and refinement of entrepreneurial skills for youth and adults interested in business ownership should be considered by vocational leaders, school administrators and staff, citizen groups, and other assistance agencies such as MBDCs, SBA, and SCORE.

Secondary/Postsecondary/Adult Levels: Mature students and adults interested in becoming entrepreneurs may need highly individualized educational and assistance programs in order to achieve realistic business experiences relative to their potential for entrepreneurial success, and to insure their ability to apply the technical and business skills requisite to the implementation of new ventures.

Delivery System Alternatives:

- ° Existing occupational programs could be utilized to provide opportunities for application and refinement of entrepreneurial skills:
 - Individualized, self-paced modules could be available in learning resource centers for students interested in specific entrepreneurial career areas
 - Work experience opportunities and field-study experiences could be planned to help students apply entrepreneurial skills in real situations
- ° A separate program in entrepreneurship training could be taught as a marketing and distribution elective for high school students who have gained technical skills in a craft or trade by experience or training outside the traditional school curriculum; for example, students who grew up in family-owned business settings or students who have completed vocational and technical training but have not completed high school, i.e., trained typists, plumbers, carpenters, and chefs
 - A team-teaching situation with students rotating among minicourses in marketing and business finance focused on application and refinement of entrepreneurial skills is a useful technique
 - A semester-length minicourse offered as a senior seminar could emphasize application and refinement of entrepreneurial skills
- ° Seminars can be cosponsored by groups interested in supporting small business in the community (i.e., MBDCs, SBA, SCORE, and Chambers of Commerce) and can be focused on problem-solving skills and application in specific entrepreneurial ventures

- ° Counseling seminars in postsecondary/adult programs should provide personal assessment guides based on entrepreneurial competency areas for adults interested in entrepreneurial ventures
- ° Assistance programs such as MBDCs and SBA should provide opportunities for screening potential entrepreneurs to determine the personal assessment and the commitment levels of adults seeking help in planning and implementing new business ventures

Examples of Model Programs:

- ° Entrepreneurship Preparation for Vocational Education Program (Model 9) includes assistance for students starting their own businesses. The program is in twenty-two comprehensive high schools in Montgomery County, Maryland. The entrepreneurial unit was infused into the existing vocational programs in the areas of marketing, distribution, and industrial education. Competency-based materials are used along with some self-development modifications
- ° Junior Achievement (Model 10) is a national program which provides students the opportunity to initiate business ventures, experience the decision-making responsibilities of stockholders and boards of directors, and acquire practical, realistic education concerning the private enterprise system
- ° At the postsecondary/adult level, the Southeast Rural Oklahoma Entrepreneurship/Industry Program (Model 5) provides an application of entrepreneurial skills in the incubator stage for students starting their own businesses. Assistance in assessment and commitment is included in the five-year pilot project directed by the Oklahoma State Department of Vocational-Technical Education
- ° The Hawaii Entrepreneurship Training and Development Institute (Model 11), established by a private business community, has a training workshop format. The recruitment and selection of participants is based on intensive assessment and commitment procedures

COMMITMENT: Personal Assessment of Entrepreneurial Skills

This critical event in the entrepreneurial development process is an evaluation period to determine the training needs of an individual. It represents a decision point in the process and is typically encountered at the postsecondary/adult level prior to the actual start-up of a business venture.

The basic question to be answered for this period is: Does the individual possess the competencies and commitment to be a successful entrepreneur? If the answer is yes, training should be directed toward developing the entrepreneurial venture as described in stages four and five. If the answer is no, training should be directed toward remaining basic technical or business skill deficiencies as discussed in stages two and three.

Vocational education leaders and program planners should be aware of the need for personal assessment and commitment on the part of youth or adults who are potential entrepreneurs. This critical event is an integral part of the development of entrepreneurs; however, it should be considered an outgrowth of early developmental stages two and three and/or a starting point for stages four and five. Vocational educators, school administrators and staff, citizen groups, and assistance agencies such as MBDCs, SBA, and SCORE should consider avenues which can be utilized to ensure that assistance is provided for youth and adults during the personal assessment and commitment period before going on with entrepreneurial training programs at Stage Four: Venture, and Stage Five: Assessment.

DEVELOPMENT OF ENTERPRISES

Stage Four: Venture

Target Group. The fourth stage in the entrepreneurial training process provides the knowledge necessary to develop and implement a new venture plan. This type of training should be directed toward those who are committed to establishing new businesses and can be provided as part of a course at the postsecondary level or outside the regular educational system.

Training Objectives. Developing and implementing a new venture plan is a time-consuming process that requires potential entrepreneurs to use their technical and business skills to create and manage the venture on paper. Table 2 illustrates one way to look at this process. (Appendix F gives a more personalized and detailed implementation process.) The common elements in most implementation approaches are: a) the need to assess the feasibility of the new venture from both a marketing and a financial perspective, and b) the need to plan and evaluate all management aspects of the venture prior to implementation.

The critical training objectives are to make sure that potential entrepreneurs know what to do and how to perform the necessary activities. Previous technical and business skill training and experience should ensure that the potential entrepreneur possesses the various skills to perform the desired analysis. Training should emphasize the organizational sequence of a feasibility study and new venture plan as well as how to schedule the various activities for successful implementation of the new venture plan.

PLANNING AN ENTREPRENEURIAL VENTURE

Source: Gillingham and Loucks (1982)

TABLE 2

Educational/Instructional Strategies. Vocational educators and program planners need to identify the opportunities or lack of opportunities for adults to obtain educational assistance in the actual planning and implementation stages of new ventures. The knowledge necessary to plan and implement a new business venture is essential for successful entrepreneurship. Youth and adults who may be working part-time or full-time and who are interested in and/or committed to becoming entrepreneurs need educational assistance at the postsecondary and adult educational levels. Vocational educators, citizen groups, and assistance agencies should coordinate joint efforts to provide educational assistance in planning and implementing business ventures for youth and adults who are committed to entrepreneurial careers. Particular attention should be paid to potential entrepreneurs in local minority groups.

Postsecondary/Adult Levels: Part-time vocational programs and local assistance programs, such as those provided by MBDCs, SBA, and SCORE, provide valuable help to advanced secondary students and adults who want to start their own businesses. Personal assessment and commitment are vital steps prior to the actual planning and implementation stage in entrepreneurial development.

Delivery System Alternatives:

- ° A special course or series of units could be planned involving potential entrepreneurs in the actual step-by-step procedures necessary to develop and implement new venture plans
- ° A team-teaching situation with students rotating among minicourses in the marketing, management, and business finance aspects of the development of new venture plans is another strategy
- ° Seminars could be offered at various times during the day and evening on special topics involved in planning and starting a business. Local, state and federal agencies, i.e., MBDCs, SBA, SCORE, and Chambers of Commerce, could cosponsor such seminars
- ° Learning materials of an individualized, self-paced nature could be utilized by a school facilitator to assist adults in the planning stage of a new venture
- ° Full-time classes for six to twelve weeks could be scheduled in adult vocational programs, or three-hour blocks for twelve to twenty-four weeks could be arranged for adults already employed. Classes and seminars of this type could be offered in major employment centers, such as shopping malls and trade centers

Examples of Model Programs:

- The Small Business College (Model 12) is designed to serve the needs of the community and give small business owners assistance in improving business skills, profits and growth. The emphasis is on an experiential approach
- The Southeast Area Rural Oklahoma Entrepreneurship/Industry Program (Model 5) includes an advanced incubator stage which assists adults in the planning and implementation of new business ventures. A follow-up consulting phase provides technical assistance for six months to one year. Fledgling companies will leave the incubator as private enterprises
- The Hawaii Entrepreneurship Training and Development Institute (Model 11) demonstrates an intensive workshop training program for adults. The format provides evening and Saturday sessions for a two-three month period. The "how-to" and "hands-on" approach incorporates the development of a business plan (surrogate for equity and capital litmus tests). A seven-month, follow-up consulting period is included in the program

Stage Five: Assessment

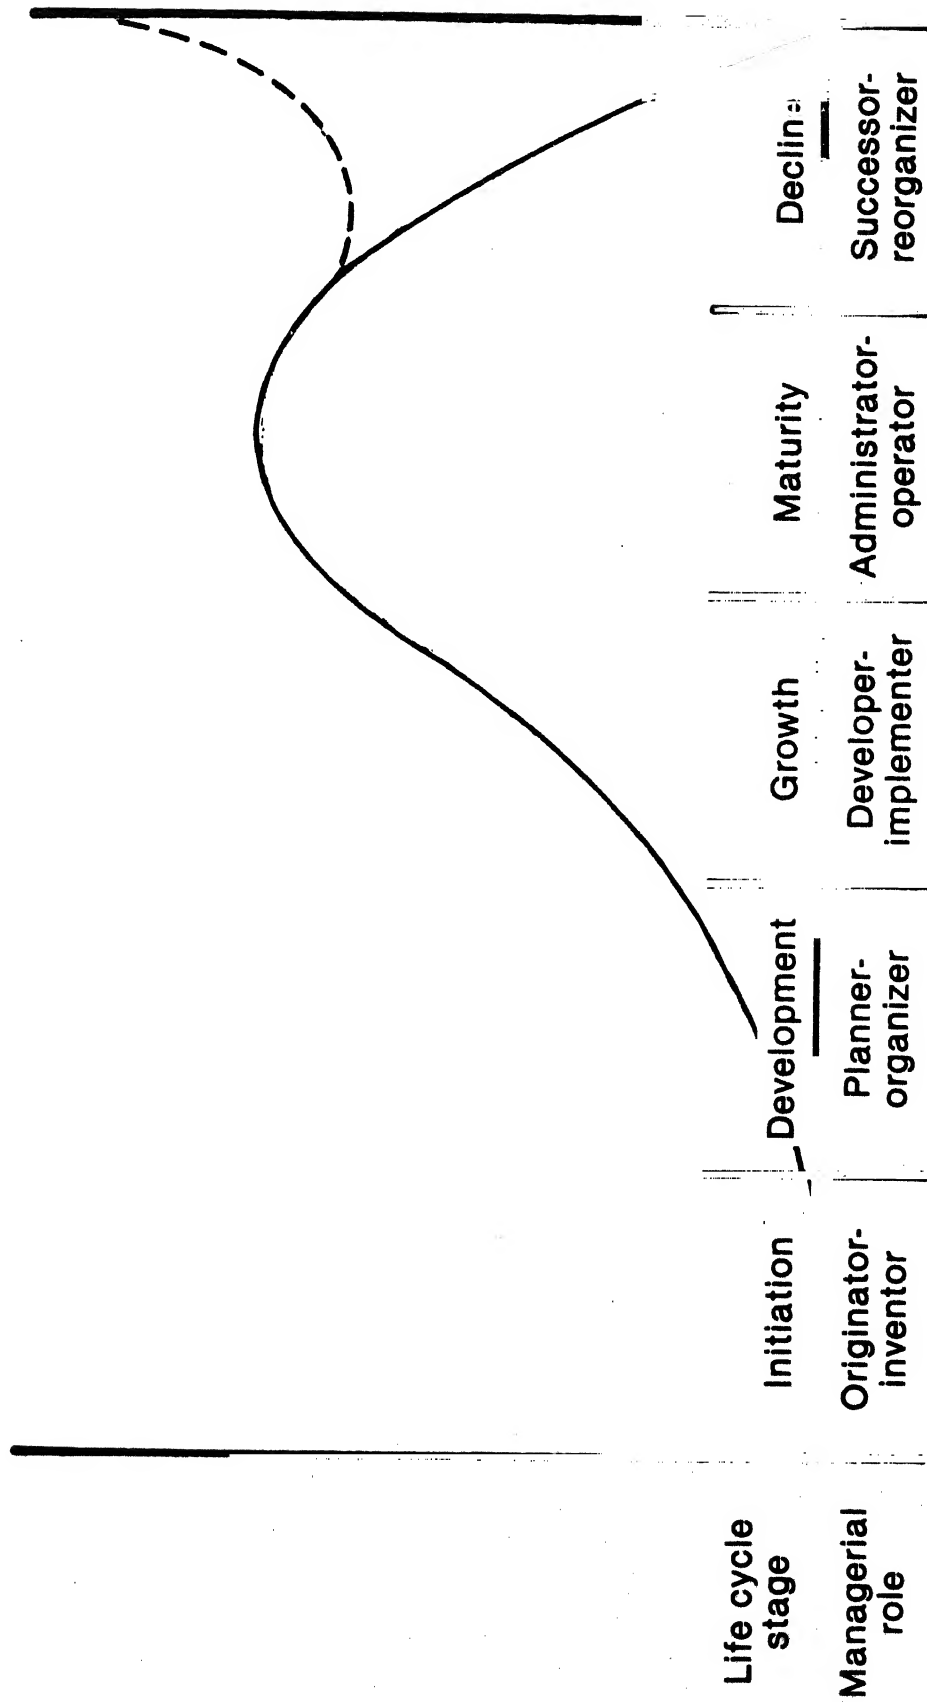

Target Group. The fifth stage in the entrepreneurial training process provides existing business owners with the business and technical skills to properly develop the venture after its inception. Training for these skills can occur during formal courses in postsecondary educational institutions, adult vocational education programs, or it can be provided by other sources outside the regular educational system.

Training Objectives. The appropriate management activities and required management skills are different as a new venture proceeds through its life cycle. This process is illustrated in Figure 5. Entrepreneurial activities predominate during the conception and initiation of the new venture. The entrepreneur is typically engaged in all business activities. Because there are few employees and little specialization of functions, most of the entrepreneur's energy is directed toward the day-to-day activities of producing and selling the product/service. There is usually little time for planning and other long-range considerations. Many firms do not develop much beyond this point and either fail or maintain a marginal existence.

grow, and this growth places different demands on the growth requires careful planning and must be hired, trained and supervised.

al resources must be obtained and efficiently how is critical for the survival of the firm entrepreneur can no longer be involved in all to delegate responsibility and perform

MANAGEMENT ACTIVITIES AND THE BUSINESS LIFE CYCLE

Managerial roles related to the life cycle of the firm.

SOURCE: Hollingsworth, A. Thomas and Herbert W. Hand (1979), *A Guide to Small Business Management*, Philadelphia, Pennsylvania: W. B. Sanders Co., pp. 20.

As a firm develops through growth to maturity, management activities closely resemble those in a bureaucratic large firm rather than those associated with the initial new venture. The entrepreneur becomes more divorced from the tactical aspects of the business and becomes more of an administrator concerned with developing policies, plans and procedures to guide the continued development of the firm.

Although a firm may remain in the maturity stage for a considerable length of time, some firms may reach a point of saturation and begin to decline. In response to this, the entrepreneur may want to find a successor for his/her role, sell the business, or possibly even "go public" to generate the capital necessary to reverse the decline. The knowledge and skills required to determine the proper course of action and to carry it out effectively are considerably different from those necessary in the other stages of the business life cycle.

Even though all firms do not proceed through all stages, and each stage is not the same length or easily identified, the business life cycle is a useful way to illustrate how a firm might develop over time and how management activities are likely to change with this development. The important training implications are that entrepreneurs need to have knowledge of the business life cycle, and the skills to adapt their management to the different needs of developing firms.

Educational/Instructional Strategies. Vocational leaders and assistance agencies and institutions in the community should examine the availability of aid for small business owners during the development and growth period of new ventures. Entrepreneurs need support and expertise to succeed in new ventures. Particular attention should be given to the entrepreneurial assistance needs of minority groups through the joint efforts of vocational educators, citizen groups, and assistance agencies in the community such as MBDCs, SBA, and SCORE.

Postsecondary/Adult Levels: Adult education programs could serve the entrepreneurial population in the community by providing a networking center to ensure the joint efforts of the available resources of both public and private groups.

Delivery System Alternatives:

- ° Local alumni who have succeeded as entrepreneurs in various business ventures could be involved in Entrepreneurship Career Advisory Groups which are called into action as experts when needed by individuals or groups in the community

- Assistance programs such as those provided by MBDCs, SBA, and SCORE, can provide valuable support for vocational programs at the postsecondary/adult levels
- Faculty in community colleges, junior colleges and nearby universities are valuable resources for entrepreneurs with special problem situations
- Formal courses and seminars could be developed in postsecondary/adult programs to provide business owners with the advanced business and technical skills needed to expand or redirect ventures
- Updated information can be disseminated informally by entrepreneurial consultants, adult programs, and private institutions. Newsletters published by vocational programs could keep alumni updated
- Bankers and other financial assistance groups can cosponsor update seminars in areas which involve additional technology in order for entrepreneurs to obtain the financing necessary for the growth of ventures
- Successful entrepreneurs can be solicited by vocational educators to provide expertise and advisement for new ventures in a cycling kind of involvement on both a formal and an informal basis

Examples of Model Programs:

- Small Business Management (Model 13) provides opportunities for business owners to upgrade small business skills with an emphasis on financial analysis and record keeping. The program helps businessmen to retain present employee jobs and to hire additional employees
- The Educational Assistance Program for Retail Entrepreneurs (Model 14) developed at Oklahoma State University through the Center for Apparel Marketing and Merchandising is facilitated by the University Extension Service. The format consists of a workshop which presents examples and miniproblems to encourage individual involvement by retail participants. The content of the workshops focuses on the improvement of inventory, management, the development of seasonal merchandise plans, and promotional strategies for increasing sales and profits
- Minnesota Entrepreneurs Club (Model 15) is a program established to provide a forum for fellow entrepreneurs to share ideas and experiences. Opportunities are available for entrepreneurs to learn from consultants, professionals, and business experts about business management

KEY CONCEPTS

The training needs and suggested instructional strategies for each stage of the Entrepreneurship and Enterprise Development Process have been discussed in detail in this chapter along with selected model programs. The key concepts are summarized in the following statements.

First, three basic target groups are the focus of the Entrepreneurship and Enterprise Development Process: youth regularly enrolled in the public education system, potential business owners regularly enrolled in the public education system and/or employed in the work force, and existing business owners striving to develop or expand successful enterprises.

Secondly, basic training needs must be identified at each educational level in relation to the three stages associated with the development of the entrepreneur and the two stages focused on the development of the enterprise. Personal assessment and commitment is a critical period in the continuation of the Entrepreneurship and Enterprise Development Process.

Thirdly, educational/instructional strategies must be directed toward the infusion of entrepreneurship programs into existing prevocational (elementary) and vocational programs at the secondary, postsecondary, and adult levels. In addition, efforts must be made to introduce separate programs at each educational level in order to focus on the unmet needs of local target groups.

Fourthly, successful implementation of entrepreneurial training programs necessitates concentrated efforts at each stage of the development process in order to identify potential entrepreneurs at an early age and to assist them in the creation and development of successful enterprises.

Finally, a variety of different types of training and assistance programs are required for the continuous development of successful entrepreneurs. The regular education system is in a position to provide much of the education and training. However, other training sources and assistance programs are needed to supplement and assist the educational system and to reach individuals not engaged in formal education programs.

Additional information about the model programs is provided in Appendix B. Other resource materials pertaining to entrepreneurship education are included in the annotated bibliography located in Appendix A. A bibliography matrix is provided to facilitate the review of resource materials available for each stage of entrepreneurship education; the coding system enables the reader to identify the vocational education field of service to which the material applies as well as the suitability of the material for technical business application. The succeeding chapters deal with the training needs of minority entrepreneurs, the assessment of entrepreneurship programs, and existing assistance agencies of various types.

CHAPTER IV

MINORITY ENTREPRENEURS: DO THEY HAVE SPECIAL TRAINING NEEDS?

Traditionally, minority business has been stereotyped in such a way that historical prejudices and limitations on minority participation in small business ownership have been perpetuated. Although much progress has been made over the last two decades, the Minority Business Development Agency (MBDA) Research Division (1982, 1984) indicates that minority business enterprises remain greatly underrepresented in the American business population. The participation rate of minority business as a whole is only one-fifth that of nonminority business, although the statistics vary substantially between different minority groups. There are approximately 63 firms per 1,000 nonminority persons as compared to 9 for Blacks, 20 for Hispanics and 29 for Asians. The vast majority of these firms are truly small businesses, many of them employing fewer than five people. New research indicates that minority businesses do not have the overwhelming failure rate they were once purported to have and may indeed experience as few as 4% more failures than nonminority firms. It would seem, then, that the critical issue facing minority small business continues to be the low formation rate.

In 1982, the Minority Business Development Agency began a research effort to determine why minorities participate less in business ownership and their findings to date have interesting implications for education. The purpose of this chapter is to translate those findings into training needs and strategies for minorities that may have a positive impact on their business formation rate and subsequent success.

It is important to stress that the basic training needs are the same for all potential entrepreneurs and vary as individual needs, experience, motivation and interest vary. Minorities do not have unusual or special training needs as individuals and are not deficient or unique in terms of their personal abilities. What minorities require is the opportunity to overcome historical cultural and social limitations that are still affecting how they are perceived in the business world and how they perceive themselves. In this respect, nonminority women share many of these same training needs, and although this chapter addresses minority needs in particular, the literature indicates that many of the items discussed pertain equally, if not more so, to nonminority women.

The factors believed to influence the issue of minority participation in business are largely sociological, psychological and educational in nature

and are the subject of ongoing MBDA research. They tend to be complex and sometimes controversial, but they must be addressed if an environment allowing minority entrepreneurs equal opportunity and access in the business world is to be created. The training needs and suggested strategies identified in this chapter indicate how education can contribute to this effort.

STAGE ONE: AWARENESS

Training Need: Creation of an awareness of business opportunities open to minority entrepreneurs

Research indicates that many potential minority entrepreneurs lack exposure to the variety of business opportunities available to them. They need to have information about high-quality, successful minority businesses along with projections about the future of minority business, consumer needs, and other factors likely to create business opportunities.

Strategy: Administrators, program planners and instructors need to develop a sensitivity to the needs of minority students and take steps to include examples of successful minority-owned and managed businesses within the community in the awareness materials and activities that they plan. Local MBDCs, Chambers of Commerce, Small Business Development Centers or Institutes and other such agencies can assist educators in identifying those minority entrepreneurs who would be willing to act as speakers, open their businesses for field trips, act as consultants in curriculum/program development, sponsor activities, and so on. Involvement of this type is perhaps the most effective means of conveying to minority students that business opportunities are open to them, what those opportunities are, and what they need to know to pursue careers as entrepreneurs.

Training Need: Exposure to minority entrepreneurs who are role models

Successful minority business owners and managers communicate the message, "You can do it!" to potential minority entrepreneurs. They may also help dispel fears that entrepreneurship is not as culturally or socially acceptable as other careers.

The need for minority role models can be addressed in much the same way as the awareness of business opportunities. Research clearly indicates that minority entrepreneurs have had exposure to role models or have role models that have made owning and managing a small business more attractive to working for someone else. Role models help dispel the unknown that many people experience when faced with the prospect of becoming an entrepreneur by familiarizing both the demands and the rewards of "being" a minority entrepreneur. This can be done through Junior Achievement free enterprise courses, field trips, school

companies, and so on, not only provides role models for minority and nonminority students but also creates opportunities for educators to expand their collaborative networks of individuals/agencies involved in entrepreneurship education. This would also allow educators and students to have direct access to information about the needs, opportunities, and barriers experienced by minority entrepreneurs.

Training Need: Exposure to formal and informal business networks

Networking has always been a successful business technique. Minority entrepreneurs need to be introduced to existing formal and informal business networks and encouraged to develop contacts of their own that will prove useful to them in business. Networks can provide a variety of assistance to entrepreneurs in the form of information, capital, advocacy, technical assistance, etc. The more positive exposure to available networks which minority entrepreneurs experience, the more likely it is that they will utilize them in developing and operating enterprises.

Strategy: Educators can become informed about those agencies/organizations in their communities and states which offer assistance of various types to minority entrepreneurs and then plan activities that will expose students to them. People seek assistance from those sources with which they are familiar and comfortable, and the comparatively small number of minority-owned small businesses gives potential minority entrepreneurs less opportunity for direct exposure to role models, making association with both formal and informal business networks imperative.

STAGE TWO: DEVELOPMENT

Training Need: Conveyance of the importance of the basic skills (communication, computation, and computer literacy) to the successful management of an enterprise

An understanding of how basic skills are used in the development and management of a business should increase learner motivation as well as result in more effective instruction. If the basic skills are taught using the medium of business-related skills, the learner progresses in two aspects of training at the same time.

Strategy: Involving members of the minority business community in classroom activities seems to be the most appropriate strategy to meet this training need. Guest speakers, field trips, and simulated business activities which tie practice and theory together would be useful.

STAGE THREE: APPLICATION

Training Need: Instruction in business skills using an experiential approach

Research indicates that experiential learning is the key to entrepreneurial behavior; therefore, formal courses may not be as useful to entrepreneurs as hands-on, intensified programs related directly to the development or management of a specific enterprise (Sexton 1984). Minority students generally have less personal experience with the business world and may therefore benefit from a wide variety of experiential learning activities. Programs of this type will most likely need to be tailored to the needs of each participant, or to small groups of participants with similar backgrounds and needs, in order to encompass each individual's strengths and interests.

Strategy: This training need is simply an extension of the previous two. The opportunities for minority students to have previously experienced the business world are few, making it highly desirable to tie instruction to experience. This not only makes theory more meaningful, but it expands the personal experiences of the students. This may lead to an increase in motivation and enhancement of self-esteem. We tend to engage in those activities in which we are fairly certain we can succeed, and the enlargement of our personal experiences therefore increases our options. Programs such as Junior Achievement, Pepsi DECA Learn and Earn, Foxfire, 4-H, Future Farmers of America and so on have tremendous potential to assist educators in this area.

Training Need: Instruction to upgrade technical skills

In some instances, potential entrepreneurs are not sufficiently informed concerning the business world to know what technical training they require to function successfully within it, a condition which must be addressed by training programs prior to the actual skill development process. Students who have not previously considered entrepreneurship as a career option may need guidance in selecting courses which emphasize those skills that will be most useful to them in small business, and they should be encouraged to progress to more advanced levels of development than they might for other career options. MBDA research indicates that the successful formation of new enterprises within the minority community has been very positively influenced by the increasing numbers of minority managers and other professional people available in the workforce who have sufficient education to assume responsible positions within small businesses.

As potential minority entrepreneurs begin to practice their technical business skills, they must have the flexibility and the motivation to upgrade their skills continually. In order to accomplish this, they must have sufficient information to evaluate their current skills. Lack of information about the business world can create a situation in which a student is unable to assess his/her development and may require assistance to do so. Educators must be prepared to assess student development and supply needed upgrading, which means that they must stay abreast of major changes in the business world. This can best be accomplished through communication with the business community and through their own continuing education.

Training Need: The application of advanced business and technical skills training in realistic settings

Theory and practical application can be worlds apart in the business field, making on-the-job and incubator-type training experiences essential to entrepreneurship education. This is expressly appropriate for minority entrepreneurs for whom this may be the first exposure to the world of business.

Strategy: Cooperative education is already a very successful part of most vocational education programs and can be incorporated into entrepreneurship education through one of the areas of vocational specialty or through new programs with a business emphasis. Apprenticeships, internships, on-the-job training, and incubator situations supplemented with coursework which addresses the point of view of the employer can greatly benefit potential minority entrepreneurs. Minority businesses can be utilized for programs of this type when possible, with resulting benefits for both businesses and students. Educators can also involve government and nonprofit agencies working with youth employment and training. A good example of a program of this type is YOUTHWORKS in Washington, DC. This nonprofit organization screens several hundred low-income and minority applicants aged 16-20 each year to create a talent pool. The youth are then given preemployment training focusing on employer expectations, communication skills, job searching techniques, attitude development and life management skills. The youth then interview for jobs in a variety of businesses. Students who are placed are evaluated regularly and YOUTHWORKS provides a money-back guarantee to cooperating businesses. Vocational educators could work with organizations of this type to include pre- and postemployment training on the entrepreneurial option and make an effort to place students in smaller businesses owned and managed by minority entrepreneurs. (See Appendix E for a more thorough description of YOUTHWORKS.)

COMMITMENT

Training Need: The opportunity to undergo self-assessment as well as expert assessment by another individual in relation to business and technical skill development and usage

Commitment is an essential step in the Entrepreneurship Education Model. This stage is based on the premise that many entrepreneurship skills can be measured in quantifiable and qualifiable manners by entrepreneurs and/or their trainers, but that other characteristics necessary for entrepreneurial success are abstract and only the entrepreneur can determine which of these he/she possesses. Minority entrepreneurs often have even less margin for error in developing small businesses than do nonminority owners/managers due to limited start-up and expansion capital, making realistic skill assessment critical prior to the actual implementation of new businesses. Skill development is one factor entrepreneurs can control and improve upon in developing and implementing businesses, and it is to their advantage to evaluate their skills accurately and then proceed according to their needs.

Strategy: Extensive research has been conducted in the last ten years in an attempt to determine the characteristics of successful entrepreneurs. The results have generally shown that entrepreneurs possess so many different characteristics that it would be difficult to "teach" individuals the appropriate personality traits. "It appears to be a matter of time, place, motivation, opportunity, knowledge and circumstances that causes entrepreneurial behavior. Motivation, opportunity and knowledge are the three factors of particular importance." (MBDA 1982) Motivation and business skills/knowledge can be measured, and instruments already exist to assist educators in accomplishing this. What is important is that students be encouraged to use the information constructively and that educators and others concentrate their resources for enterprise development on those individuals who appear to possess sufficient business knowledge and motivation to become entrepreneurs. Once potential entrepreneurs have determined that they possess the necessary business and technical skills required for the enterprises in which they are interested, they need to assess their level of commitment to becoming practicing entrepreneurs. This is not a decision to be made in haste. The time, energy, and resources that entrepreneurship generally requires constitute a considerable personal investment, and training programs which assist entrepreneurs with the actual planning and implementation of small businesses cannot afford to use their resources for individuals who lack the commitment to initiate ventures successfully. This caution would seem particularly appropriate with regard to potential minority entrepreneurs, who have less access to venture capital, fewer role models, less access to formal and informal networks, less social and cultural support, and less personal experience to assist them in succeeding with new ventures.

STAGE FOUR: VENTURE

Training Need: The personal involvement of minority entrepreneurs in the development of viable business plans

Assistance agencies which help minority entrepreneurs develop business plans should involve the entrepreneur in all phases of its development and extend the use of the business plan as a guide during the first few months of operation. If the entrepreneur understands the business plan and is the key participant in its development, he/she is more likely to use it after raising the capital for the venture. He/she will also be knowledgeable enough to adjust the plan as circumstances require.

Strategy: Many resources already exist to assist vocational educators in meeting this training need. The important thing to remember is that only those potential entrepreneurs who display sufficient prior development of business skills, technical skills and motivation should be involved in programs offering instruction at this level. Training at this level involves all of the initial work that goes into planning an enterprise on paper before seeking venture capital. Minority entrepreneurs will have less access to personal resources and venture capital and so must be especially well prepared with a complete business plan before attempting to raise money. Many materials are available to teach the steps to planning a business and support

must be available at each step to ensure that students have mastered the necessary skills and can apply them during the planning stage. This type of training ordinarily occurs at the junior college, community college, university and technical institute educational levels. These programs can be adapted to reach adults not currently associated with the formal education system. An excellent example of a highly successful program at this level is the Hawaii Entrepreneurship Training and Development Institute described in Appendix B.

Training Need: The experience of implementing a business plan in an educational setting

Incubator programs offer potential entrepreneurs the opportunity to develop a service or product and market it in a setting that is characteristic of the "real" business world without exposing them to risk. They can practice implementing their business plans and testing their own skills and level of interest and commitment prior to becoming involved in business ventures.

Strategy: This training need requires a major commitment of resources and a high level of cooperation between education, business and government. Incubator-type programs can be developed using resources from vocational education, state economic development and manpower offices, and local businesses and industries. The quality of instruction and collaborative efforts must be excellent to ensure the success of students involved in incubator programs and to provide benefits to the businesses and industries involved. The Oklahoma State Department of Vocational-Technical Education participates in an entrepreneurship training program which includes an incubator stage. Appendix B contains a description of the Southeast Oklahoma Rural Entrepreneurship/Industry Program.

STAGE FIVE: ASSESSMENT

Training Need: The opportunity to manage an enterprise in cooperation with an experienced owner/manager

Minority entrepreneurs can benefit from training programs that allow them to manage small businesses under the direction of experienced owners/managers, limiting the liability of both the entrepreneurs and the enterprises. Programs of this type would perhaps eliminate or reduce some of the financial restrictions and lack of opportunity with which many minority entrepreneurs are now contending.

Strategy: The opportunity to manage an enterprise under the supervision of an experienced owner/manager requires more than part-time consulting. It requires the full-time commitment of successful owners/managers to work alongside "students," teaching them those aspects of running small businesses that they do not know or in which they are deficient. If adults participating in programs of this type were carefully screened and if planning were complete,

success would be more likely. The business could belong to the supervisor or to another party, but motivation of the "student" would be enhanced if the business were potentially his/hers. This type of program would allow "students" to prove to themselves and to future investors that they are good risks in the business world. Continued association with education would allow for advanced study of any management or technical skills that the apprentice owners/managers may be lacking.

Training Need: The opportunity to take over existing businesses and develop them as part of a training program

This alternative would be beneficial in much the same way that working with an experienced manager would, but it would also eliminate some of the stressful initial demands involved with starting a new business. The stages of small business growth (Churchill and Lewis 1983) demand a wide range of skills and a high level of adaptability that not all entrepreneurs are willing (or qualified) to meet. An opportunity which may be one entrepreneur's dream may be another's nightmare, making this alternative viable for minority entrepreneurs possessing the desire and skills to determine whether entrepreneurship is a suitable option.

MBDA research (1984) indicates that although existing minority firms in some areas appear to grow and expand as quickly as similar nonminority firms, they do so with a greater level of debt, which can render them vulnerable to sudden market shifts and other business-related risks. In some parts of the country, minority firms are still struggling against external constraints such as limited market size or demand, limited access to financial and human capital, degree of racial discrimination and competitiveness, and influences of public policy. Internal constraints that are believed to inhibit expansion but that have not yet been researched are: relatively low motivation to achieve, lack of business knowledge, and an unwillingness to take proper risk or share ownership or control with others. It is a fact that businesses that are large enough to employ 100 or more people are much less susceptible to failure than those with 25-99 employees, indicating that money for business growth may be well invested.

training program could become the mechanism to allow minority entrepreneurs the opportunity to work with the expansion and/or redirection of businesses. If a turnaround is successful, the training program could purchase a company on a nonprofit basis until the entrepreneur is sufficiently trained and has the capital to purchase it himself/herself.

KEY CONCEPTS

Minority small business is increasing, and the trend for these businesses is away from retail trade and personal services into areas such as manufacturing, construction and wholesale trade--a clear sign of economic progress since these latter firms have much greater potential for significant economic impact. "Entrepreneurs in these lines of business are considerably younger, better educated, and tend to have higher earnings than other minority self-employed and wage and salary employees." (MBDA 1984) Greater access to well-educated minority managers and professionals has also had a very positive impact on the formation of minority businesses. The failure rate of minority small business has been found to be much lower than was previously believed.

Despite the signs of progress, the fact still remains that minority businesses are greatly underrepresented in the American population when compared to nonminority businesses. Much more research is needed on the sociological, psychological and educational aspects of this issue, but there are some clear implications for educators to consider. Areas that can be addressed by vocational education for minority students are: awareness, role models, networking, importance of basic skills, experiential education, upgrading technical skills, application of advanced skills, assessment of skills and motivation, business plan development, business plan implementation, management, and business development/expansion.

Many vocational schools have developed programs to meet local entrepreneurship training needs. Collaboration with Minority Business Development Centers could result in the expansion of existing programs and/or the creation of new programs to meet the specific needs of potential and existing minority entrepreneurs. Chapter V suggests strategies for evaluating programs that may prove useful to program planners and administrators. Chapter VI addresses the need for collaborative efforts among existing agencies and organizations and describes strategies for accomplishing that end.

CHAPTER V

ENTREPRENEURSHIP EDUCATION EVALUATION: HOW DO I ASSESS THE VALUE OF THE PROGRAM?

EVALUATION OF ENTREPRENEURIAL TRAINING PROGRAMS

In considering an evaluation component for an entrepreneurial training program, several questions immediately come to mind: Why evaluate? What should be evaluated? and How should the evaluation be accomplished?

As might be expected, the answers to these questions can be quite varied depending on the specific purposes of the program under consideration, the uses to be made of the results, and the degree of specificity of analysis desired. Yet, one can design an effective evaluation of an entrepreneurial training program by considering the following key factors tentatively identified as being requisite to successful entrepreneurship establishment (Entrepreneurial Education: A Focus for the 80's, SBA 1981):

- ° Attitudes, aptitudes, abilities, interests, work habits, and characteristics of entrepreneurs
- ° Communications and other interpersonal relationship skills
- ° Economic principles related to business ownership
- ° Decision-making skills
- ° Technical and business management skills

The overall purpose of evaluation is twofold. First, the evaluation should consider the effectiveness of the program; and second, it should be designed to determine ways in which the program can be improved. The process used to assess these two areas will vary with the program, the resources available for evaluation, and the specific interests and abilities of the evaluators.

IMPLEMENTING THE EVALUATION

Every entrepreneurial training program must meet the test of providing a useful, programmatic end product which will serve as a stimulus to the establishment of successful enterprises. The stimulus may be a more effective means of initiating new programs, new materials to use in a curriculum,

refinements in methods of delivery, processes for establishing effective collaborative efforts among agencies, or a host of other types of stimuli. In any event, the stimulus must be identified, documented, analyzed, and interpreted in order for the most effective stimuli to be replicated and incorporated into ongoing programs.

This suggests that a plan for evaluation should be included as an integral part of every entrepreneurship education and training program. The evaluation design should ensure the examination of both the internal and external elements of the program (or stimulus). The chosen evaluation design must consider, at a minimum, the following elements:

- ° Relevance to actual skill, ability, and attitude requirements
- ° Effectiveness in preparing participants to establish entrepreneurial activities
- ° Techniques that are feasible and easily replicated
- ° Improvement and refinement of factors that produce positive results

The evaluation program may be planned and implemented by program staff, or third-party evaluations may be used. The key factor is that an evaluation design be selected and utilized. By nature, specific evaluation design and data collection instruments must be developed after the program objectives have been identified and when the purposes of the evaluation have been specified.

INDIVIDUAL STUDENT EVALUATION

There are several separate areas that must be evaluated to determine the success of entrepreneurial training programs in benefiting individual students. Aptitude, attitude, motivation, and small business skills are key areas of assessment.

Aptitude

For diagnostic and analysis purposes, many vocational educators use the California Academic Aptitude Test-Short Form. This test has proven helpful in developing individualized programs for students to improve the development of critical competencies necessary for potential entrepreneurs.

Attitude

Even though the development and/or change of individual attitudes is not well understood and is difficult to accomplish, attitudes are critical to the development of entrepreneurs. There are several strategies that might be used to assist with this complex area. First, the "instructor" must be keenly aware of the attitudes of successful entrepreneurs. Specific attributes are discussed in Appendix G. Secondly, the "instructor" must observe attitudes displayed by students in the classroom, in on-the-job training, and in social situations. Thirdly, the instructor must observe how individuals handle

interpersonal relationships, human and technological interactions, and attitudes toward making sound business management decisions.

The Curriculum and Instruction Materials Center of the Oklahoma State Department of Vocational-Technical Education has developed a competency profile that is useful in recording the attitudes of individuals. The profile is a guide and should be used only to help the instructor assist the student in developing appropriate attitudes.

Motivation

One of the overriding factors in the development of entrepreneurial activities is the motivation of individuals. Some motivational factors are well known, but the instructor must be acutely aware of various factors that motivate different individuals. Instructors must observe individual student interests, classroom and work experience absences, quality of work accomplished, completion of extra work assignments, and other indicators. Instructors can also include various motivational components such as the Zig Ziegler "I Can" program to help individuals become further motivated toward establishing new enterprises.

Small Business Skills

Perhaps the easiest component of entrepreneurial programs to measure is that of skills or competencies in small business ownership and management. Virtually all curricula available today include units or course tests to help instructors assess the competencies developed by students. Excellent assessment instruments are included in the American Institutes for Research (AIR) entrepreneurship literature and the pre- and posttests included in the University of Georgia entrepreneurship materials.

PROGRAM EVALUATION

In addition to determining the progress and competency development of individual students, the instructor must be concerned with the overall value and success of the entrepreneurship training program. The most important and easiest measure of such a program is also the most obvious: "How many individuals have established successful enterprises?" Other factors deserve consideration, also. Assuming it is important to conduct a successful entrepreneurship training program over a long period of time, the instructor should be concerned with such other elements as types of businesses established, involvement and relationships among existing businesses in encouraging new enterprises, support services available through other agencies, long-term success and growth of entrepreneurship ventures established, overall student placement, and overall student competency development.

As required by Federal legislation, most State Departments of Vocational and Technical Education have formalized procedures for follow-up of program participants. Instructors can find survey forms and evaluation instruments that have been developed for their use by contacting their State Vocational Research Coordinating Unit (RCU) or their State Vocational Planning Unit. The addresses of all regional and state contacts that make up the curriculum consortium are located in Appendix E₆.

CHAPTER VI

ENTREPRENEURSHIP EDUCATION ASSISTANCE: WHERE DO I GET HELP?

A variety of services is available from a multitude of agencies to assist vocational educators and Minority Business Development Center representatives in developing, improving, or expanding entrepreneurship education and training programs. Vocational educators and MBDCs can leverage their resources by taking advantage of the information, materials, and programs already developed and functional. Resourceful use of existing services prevents wasteful duplications of effort and makes it possible to provide effective entrepreneurship training at a relatively low cost.

The purpose of this chapter is to identify some of the major sources of assistance for entrepreneurship training, to present the basic types of assistance provided by each source, and to suggest how collaborative efforts between these sources might be developed and implemented. Since the major focus of this project is on the involvement of MBDCs and vocational educators, the discussion concludes with an overview of MBDCs and the vocational education system.

SOURCES OF ASSISTANCE

Vocational educators and MBDC representatives may tap a variety of sources for assistance in developing and implementing collaborative entrepreneurship education and training programs. The number and variety of organizations/agencies promoting entrepreneurship and offering some type of service--direct or indirect--to existing and potential entrepreneurs is encouraging. The purpose of this section is to give a representative sample of existing assistance agencies which meet the needs of entrepreneurs at all five levels of educational development as presented in the Entrepreneurship Education Model introduced in Chapter II, as well as agencies involved primarily in the development/stimulation of the economic environment, and to illustrate how vocational educators and MBDCs might utilize the services of these agencies on a reciprocal basis.

The designation of each agency/organization in this section as providing services primarily at one of the five developmental levels is arbitrarily based upon what appear to be their major functions. Most agencies overlap into several developmental areas, but for purposes of simplification, each appears only once. This section is not meant to be a comprehensive listing of available entrepreneurship assistance agencies but provides a representative sample of agencies that are likely to be available at the local, state and

federal levels. With some research, program planners and administrators can identify similar organizations in their communities to assist in the development, expansion and improvement of entrepreneurship education programs which will meet the needs of entrepreneurs at all levels of development.

DEVELOPMENT OF THE ENTREPRENEUR

Stage One: Awareness

Agencies which concentrate on providing services at this level are primarily concerned with the awareness of elementary school children and other publics of the workings of the free enterprise system and the career possibilities it offers in entrepreneurship. Services in this category can take the form of economic education, career education, consumer education, research concerning the benefits of free market enterprise, the development of curriculum materials, and teacher education.

Although many agencies have incorporated some aspects of entrepreneurship awareness into their programs, some have made it their primary thrust. Following are brief descriptions of three such agencies providing services at the national, state and local levels.

National Level. The Joint Council on Economic Education (JCEE) is an independent, nonprofit, nonpartisan, educational organization incorporated in 1949 to encourage, improve, coordinate, and service the economic education movement. The Council's principal medium for expanding and improving economic education is a network of 50 State Affiliated Councils and 241 Centers for Economic Education operating at colleges and universities throughout the nation. The Council sponsors an Annual National Awards Program for the Teaching of Economics in cooperation with the International Paper Company Foundation. It also develops curriculum materials, improves teacher training, identifies new curriculum patterns, and shares research and implementation procedures through the Developmental Economic Education Program (DEEP).

The tremendous network already established by JCEE makes its programs available in every state. The Centers work closely with the public schools and the adaptability of their programs to vocational education needs could be explored. MBDCs could be involved with JCEE activities to promote the involvement of minority students as well as to influence the type and scope of activities delivered.

This is an example of the type of project which can have a significant impact on and be impacted by vocational educators and MBDCs. Collaboration with project administrators/funders could possibly result in the development of suitable materials for vocational education and MBDCs, or at the very least vocational educators and MBDCs could influence the variety, range and emphasis of materials/programs developed to serve elementary and secondary students. Awareness of and possible involvement in state-funded projects such as this one could prevent costly duplication of effort as well as expand the awareness of all parties involved concerning the needs of the vocational education system and potential minority entrepreneurs.

Local Level. Future Business Leaders of America (FBLA) is a national, nonprofit educational organization made up of students pursuing careers in business or business education. There are more than 210,000 active members in over 10,000 chartered chapters across the nation as well as in Samoa, Guam, Puerto Rico, and the Virgin Islands. These chapters carry FBLA services to the local level in an effort to bring business and education together in a positive working relationship. Organizational goals include: promoting competent, aggressive business leadership; understanding American business enterprise; establishing career goals; encouraging scholarship; promoting sound financial management; developing character and self-confidence; and facilitating the transition from school to work.

FBLA's structure, purpose and activities all center around successful collaboration among business, industry, government and education. Many of its current chapter and national activities are carried out in cooperation with the vocational education system. These activities reach students in high schools and postsecondary institutions, and national management/leadership conferences and seminars train teachers, administrators, advisors, and student leaders. MBDCs could contribute to FBLA activities as representatives of business/industry to ensure that minority concerns are addressed.

Stage Two: Development

This developmental level emphasizes the business and technical skills potential entrepreneurs will need to function successfully in businesses of their own. Agencies included in this section offer services designed to enhance the opportunities available to students to obtain business and technical skills that are relevant to entrepreneurship and that are current. Services available to secondary schools and the vocational education programs affiliated with them are of particular importance here.

National Level. The Pepsi DECA Learn and Earn Program is a service offered nationwide through the Pepsi-Cola Company to any interested DECA (Distributive Education Clubs of America) Chapter. Students set up actual or simulated businesses to sell a product. Project guidelines and incentives highlight concepts, objectives, planning, organizing, budgeting, promotion and evaluation. A final report may be submitted as a DECA competitive activity. Educational materials are available for the Project. Through an experiential education program of this type, students learn and practice the business and/or technical skills necessary to run small businesses. All information is

relevant because it is acquired and utilized in actual and simulated businesses planned and operated by the students.

Vocational educators can access this assistance through their local DECA chapters without having to develop their own curriculum materials and can utilize DECA services in the process. MBDCs could possibly participate in this activity in an advisory capacity and/or provide instruction in those aspects of small business development in which they have expertise. This kind of participation provides exposure for all agencies/individuals involved and can improve instruction through the utilization of experts in certain areas. If this activity were implemented at the high school level, perhaps potential/existing clients of MBDCs could take part to benefit the activity as well as themselves.

State Level. Most states have services available similar to that of the Curriculum Publications Clearinghouse located at Western Illinois University in Macomb. The Curriculum Publications Clearinghouse is operated by Western Illinois University through a funding agreement with the Illinois State Board of Education, Department of Adult/Vocational/Technical Education, for the purpose of providing state-developed materials on a cost-recovery basis. The Clearinghouse does have entrepreneurship education materials available.

There are six regional curriculum centers for vocational education which coordinate materials for each region, and these are coordinated by the National Network for Curriculum Coordination of Vocational and Technical Education (NNCCVTE). Familiarity with and utilization of the curriculum/materials services for vocational educators can keep educators and MBDCs informed about pertinent materials currently available. Materials are generally available on both a purchase and a loan basis enabling educators to review materials prior to making a purchase. As vocational educators move ahead in the area of entrepreneurship education, this type of service will become increasingly valuable.

Local Level. Future Farmers of America (FFA) is an integral part of the program of vocational agriculture education in the public schools. It provides a laboratory for practical training in agriculture, leadership, cooperation and citizenship as students take part in meetings, public speaking, contests, awards and cooperative efforts for community improvement. The program also offers instruction and activities in the field of agribusiness.

Stage Three: Application

This developmental level builds upon the previous two by emphasizing the need for potential entrepreneurs to use their business and technical skills in practical settings through internships, on-the-job training, incubator experiences and simulations. Formal programs are most often geared toward postsecondary educational institutions, but they naturally overlap with high school programs and programs for adults not in traditional training programs. Junior colleges, community colleges, universities and technical institutes are often involved with entrepreneurship education at this level.

National Level. The National Research Center for College and University Admissions (NRCCUA) is a nonprofit organization involved in a variety of activities. IDEA (Institute for the Development of Entrepreneur Abilities) provides entrepreneur seminars, workshops and speeches and is currently developing a manual for entrepreneurial self-instruction. The Entrepreneur Scholarship Program (ESP) identifies entrepreneurial talent in high schools and colleges and is developing a system of providing awards, financial aid, and support. In addition, the Center has developed EQ (Entrepreneur Quotient), SQ (Success Quotient) and CQ (Career Quotient) measures to stimulate discussion concerning entrepreneurship. Appendix H contains copies of all three documents. Throughout the year, the Center surveys high school students regarding education, career, and financial aid opinions and has added entrepreneurship as an option. All results are computerized. The Center also funds various projects including the writing of a motivational book about minority entrepreneurs.

Several opportunities exist for collaboration with NRCCUA. MBDCs could work with this agency to identify potential scholarship recipients as well as to locate those minority students entering postsecondary institutions who express an interest in entrepreneurship as a career option. They can also utilize materials developed by the Center and encourage the development of additional materials for minority students.

State Level. The Center for Entrepreneurship and Small Business Management, located at Wichita State University in Wichita, Kansas, does not by any means limit its activities to the state of Kansas; however, logistically it is easier for state residents to be involved in the Center's training activities. The priorities of the Center are: (1) development of an academic program in entrepreneurship and small business management, (2) creation and endowment of a professional chair, (3) development of an information bank and library, (4) research and publication, (5) special interest seminars, (6) development of films for elementary school students, and (7) creation of a prime-time television program for major network exposure.

The Center's activities cover almost the entire range of developmental levels so it is difficult to select a category in which to place it, but all of the services offered are of excellent quality. MBDC clients could benefit from the courses offered on small business ownership and management, and clients, students and educators will find the materials library and abstract service offered by the Center to be very valuable. Vocational educators and MBDCs could perhaps reciprocate by offering their special areas of expertise

to the Center by serving as resource persons and influencing future Center research and development activities.

Local Level. The Center for Small Business sponsored by Daytona Beach Community College and Private Industry Council serves Volusia County in Florida. It is a program offered by the Special Programs Division of Daytona Beach Community College and has been designated by the Small Business Administration and American Association of Community and Junior Colleges as a member of the Small Business Training Network. Counseling services are provided to both potential and existing entrepreneurs; training in the form of workshops, courses, seminars and conferences is offered throughout the year in Volusia County; and the Center has a resource library which contains research undertaken by the Center. Training costs are nominal as services are provided in cooperation with the Private Industry Council of Volusia County, the University of Central Florida, SCORE, Stetson University, and area Chambers of Commerce through the Volusia/Flagler Small Business Coordinating Council.

The Center is an excellent example of a collaborative effort among local assistance agencies. Vocational educators and MBDCs could get involved in the activities of the Center and utilize its services for students and clients. It is much more cost effective to adapt a successful existing program to meet the needs of special populations than to duplicate services.

DEVELOPMENT OF THE ENTERPRISE

Stage Four: Venture

This is the developmental level in which potential entrepreneurs actually begin ventures and it overlaps to give some assistance to existing entrepreneurs who require/request assistance in managing small businesses. Of all the developmental levels, this one seems to have the most selection of direct service agencies offering assistance on subjects ranging from how to obtain venture capital to how to acquire appropriate technical skills.

National Level. The National Alliance of Homebased Businesswomen (NAHB) was developed for the purposes of promoting personal, professional and economic growth among women who wish to work from their homes; to provide a forum for the exchange of information; to provide publications disseminating current information; and to provide a support network. NAHB publishes a quarterly newsletter, holds annual national meetings, and publishes an annual directory of all the local chapters throughout the nation. The Alliance was instrumental in the development of the resource guide Women Working Home: A Cross Guide and Directory (Second Edition, 1983), authored by Wendy Lazar. An abstract of the book is included in the bibliography.

tion appears to be particularly suited to the needs of women who have marketable skills but who wish to work out for various reasons. Many skills taught in vocational programs are applicable to this type of enterprise, and it would seem that the potential

for collaborative efforts among vocational educators, MBDCs, and community/neighborhood development cooperatives have exciting possibilities. NAHB offers the combined experience, ideas and talents of women from all over the nation, offering educators and MBDCs the opportunity to utilize the expertise of members in their communities.

State Level. The Southern Oregon Regional Services Institute (SORSI) was established by the state legislature in 1979 to assist private businesses and government agencies (at all levels) in fostering economic growth in the southern Oregon region. The Institute consists of academicians and students from Southern Oregon State College trained to provide technical data and research information to existing business, industry and commerce in the southern Oregon region as well as to potential business. Consultations are free and advance estimates for specific costs are available upon request. SORSI also serves as a Small Business Assistance Center in southern Oregon.

SORSI and programs like it could serve as resources for vocational educators and MBDCs that have students/clients in need of services of this type. Some of the services offered by SORSI overlap with those of MBDCs, and perhaps each agency could enrich the other with special areas of expertise.

Local Level. The Urban University Center in Los Angeles offers programs that are designed to produce a positive impact within the service region with the primary objective of increasing employment. Industrial development and community economic development services are provided in the following areas: (a) direct technical and management assistance to existing small businesses and industries, (b) assistance in the formation of new enterprises which create new employment opportunities, (c) special research studies for expansion and diversification of existing businesses and industries suitable for development in the region and implementation of the research effort, (d) industrial development conferences for local leaders and assistance in the formulation of technical/educational curricula with workshops/planning seminars for people involved in business development activities, and (e) business financial assistance in the form of counseling/resources/arrangement of financial packages, etc.

Linkages between the Urban Center and other programs similar to it and vocational educators and MBDCs could prove beneficial in several ways. Each agency/organization could keep the other informed of its activities so that students and clients could use those services pertinent to their current needs. Involvement with ongoing research and updated information impacts the direction of vocational programs to prepare students better to meet the needs of local business and industry. Referrals between the Center and MBDCs would allow each agency to concentrate on those needs not met by the other.

Stage Five: Assessment

This level of development deals strictly with individuals already in business for themselves. It involves training which improves, expands and/or redirects the abilities of the existing entrepreneur to improve his/her chances for success. Services at this level are almost entirely oriented toward management and technical assistance, but they also focus on capital

formation, the teaching of the transitional skills necessary for entrepreneurs as businesses grow and change, research, and advocacy for small business.

National Level. The National Federation of Independent Business Research and Education Foundation (NFIB) is a membership organization for approximately one-half million small business managers and owners, which provides information and educational materials based on research and the monitoring of political action regarding small business. It currently employs 23 full-time state lobbyists and has a state representative in every state capital. NFIB has an educational division which creates classroom educational materials. Faculty Associates is the organization within NFIB which services educators.

NFIB has a tremendous amount of information about small business at its disposal. Research conducted utilizing responses from its members can provide valuable data for vocational educators to use in program planning and development. MBDCs can utilize information which pertains to the needs of existing entrepreneurs, current practices of small business owners, and projected trends. Educational materials developed by NFIB are of excellent quality and could prove useful to educators. NFIB members might appreciate information concerning the current activities of vocational education and MBDCs in their area. NFIB's publications are an excellent method of delivering information to a large number of small business owners.

State Level. The Caruth Institute of Owner-Managed Business, located at Southern Methodist University in Dallas, Texas, does not limit its activities to Texas but offers its comprehensive training programs for all beginning entrepreneurs and owners/managers of existing businesses. Entrepreneurship I - Starting a Business and Entrepreneurship III - Managing the Owner-Managed Business are designed to give maximum skills training and application to participants. Vocational educators and MBDCs could refer students and clients to the program, and MBDC personnel could act as resource persons for the Institute. The Entrepreneur's Master Planning Guide, an excellent publication developed by the course instructors, John A. Walsh and Jerry F. White, could also prove to be a good resource for MBDC clientele.

Local Level. The National Association of Women Business Owners (NAWBO) was established to serve the needs of women in business. The Association provides workshops and seminars for management training, technical assistance and related learning opportunities, and offers valuable networking opportunities. It also provides a discussion forum, develops and lobbies for legislation which benefits women-owned businesses, and works to improve economic opportunities for women. Chapters of NAWBO are governed at the local level and may offer newsletters, membership directories, quarterly meetings, business resource seminars and speakers' bureaus.

students. It provides many of the services formal education programs and MBDCs cannot.

An excellent example of local collaborative efforts is the Presidents' Roundtable established by the Los Angeles Chapter of NAWBO. In 1983, the president of the L.A. Chapter, Virginia McBride, and the president of Women in Business, Lynda Fluent, found their organizations overlapping in many of their activities and objectives. They met to explore possible solutions and from that meeting came the idea for a Presidents' Roundtable to include all chief executive officers of women's professional organizations in the Los Angeles area. This network of professional women's organizations describes its objectives as: to promote the spirit of cooperation for professional women's groups, to provide an exchange of information, to support women's issues, to educate and inform about women's issues, and to enhance the visibility of professional women. Eighteen organizations are already involved and nine others will be added soon. As the group works together, they find more and more areas in which they can eliminate duplications of effort and concentrate on enhancing their specialty in services offered to members of the organizations involved. Their activities serve as an excellent example of the kind of effective collaboration that can benefit agencies, organizations and individuals involved in entrepreneurship activities.

DEVELOPMENT OF THE ECONOMIC ENVIRONMENT

This special and vitally important category of activities focuses not on the direct services provided by agencies and organizations to the individual entrepreneur and enterprise but rather on the efforts of organizations to create an overall economic environment conducive to the establishment and success of small businesses. Involvement with agencies that engage in advocacy for small business, community/state planning for economic growth, executive-level advisory functions, and so on, is essential if vocational educators and MBDCs are to influence decisions and keep up-to-date on economic developments and trends that affect them. All three categories--the development of the entrepreneur, the development of the enterprise, and the development of the economic environment--are vital to economic growth.

National Level. The National Association for the Self-Employed (NASE) is an organization registered and certified to operate in all fifty states. It is organized to provide professional guidance and economic benefits for small business enterprises. The primary goal of the Association is to foster an environment where self-employed business people can flourish. Services available are: (a) information about federal legislation that affects small business; (b) an organized lobbying effort; (c) professional guidance and educational seminars; (d) the NASE newsletter Profitline; and (e) certain insurance and retirement benefits, discounts, etc.

NASE offers individual business owners the opportunity to increase the impact they have on legislation and other measures which affect their businesses. In this respect, the organization resembles the National Federation of Independent Business. It would be to the advantage of NASE members to know about services offered through vocational education and MBDCs,

and vice versa. If NASE members wish to support certain efforts that would benefit vocational education and the activities of MBDCs, they first have to have information and be sold on ideas. Collaboration is always a two-way street.

State Level. The Western Kansas Manufacturing Association (WKMA) is comprised of 75 active and 80 associate members who are involved in legislation and advocacy activities making the needs of small business known at the local, state and national levels. In addition, WKMA acts as an educational arm for its members offering numerous seminars throughout the year. WKMA also provides 14 scholarships to vo-tech schools, community colleges, and state universities.

WKMA would be an excellent source of information, clientele and support for both vocational educators and MBDCs in the state of Kansas. Vocational educators and MBDCs could, in turn, support the educational efforts of the WKMA as well as provide expertise for seminars and conferences. Organizations of this type can be found in all states but will vary according to the economic/industrial base in each area.

Local Level. The Chamber of Commerce of the United States is the national-level representative for literally thousands of local Chambers of Commerce. In 1983, the total membership of businesses and organizations in the Chamber was 227,400. The membership includes local, state, and international Chambers, businesses, and trade and professional associations. The Chamber is active in advocacy pursuits for business; the production of educational materials for various audiences; publication of The Nation's Business and the Washington Report; production of video conferences through its Biz Net network; and sponsorship of educational programs through its Center for Leadership Development, the Corporate Executive Development Program, and Institutes for Organization Management. The influence of the Chamber is widespread and its activities touch many sectors of society.

Local Chambers represent community businesses and are actively involved in economic development activities. Vocational educators and MBDCs offer important services for local small businesses and can work with local Chambers to tailor services to meet the needs of small businesses in their communities. The Chamber offers exposure and clientele for educational and MBDC services. Cooperation is much more easily established and new ideas implemented at the local level than at any other level, and the Chamber of Commerce in each community is often at the center of local economic development activity.

Sources and types of assistance should be a topic in entrepreneurship education and training programs. Recent research (Welsch and Young 1982; Elbert, Anderson, and Floyd 1983; and Franklin and Goodwin 1983) supports the effectiveness of collaborative efforts but suggests that entrepreneurs generally seek help from only those sources with which they feel comfortable, regardless of their assistance needs or the ability of the source to provide the desired assistance. Training can be used to make potential and existing entrepreneurs more knowledgeable of and more comfortable with the most effective sources of assistance for their particular needs.

DEVELOPING COLLABORATIVE NETWORKS

Vocational educators and MBDCs need to take advantage of the services offered by other types of organizations. The purpose of this section is to present network models which illustrate the types of collaboration that might be effectively utilized in entrepreneurship education and training programs.

Figures 6 and 7 represent collaborative networks directed toward different target groups and different stages of the entrepreneurial development process. Figure 6 shows the types of agencies and programs that might be integrated to provide youth with basic skills and exposure to entrepreneurial ideas, as well as organizations and programs that might be utilized to help potential entrepreneurs obtain desired business and technical skills and assess their competencies and commitment for entrepreneurial careers. Figure 7 is directed toward existing entrepreneurs or those in the process of planning and implementing new business ventures. The organizations linked together in this figure generally provide information and/or assistance for specific types of business enterprise. Figure 8 represents a collaborative network of agencies involved with the development of an economic environment favorable for small business growth. Vocational education and MBDCs can impact these agencies using the tools and information at their disposal.

Vocational educators and MBDC representatives can use these figures as a framework for developing networks of collaboration for each of their entrepreneurship programs. The development and utilization of collaborative networks is a cost-effective way to deliver entrepreneurial assistance. It is important that collaboration involve agencies working with all aspects of entrepreneurial development to ensure that the efforts succeed, because each step in the developmental process is essential to the success of subsequent steps.

Appendix E gives more specific information on a large variety of assistance agencies, and although it is not meant to be comprehensive, it is representative of the many kinds of services available throughout the nation. A crucial part of the collaborative process lies in identifying all of the resources existing in a local area. The manual entitled Entrepreneurship Education: Organizing to Develop Programs and Collaborative Networks (1984) developed along with this notebook is a good source of information concerning strategies for bringing the various assistance agencies in a community together once they have been identified. An order form for this document is located in Appendix J.

MINORITY BUSINESS DEVELOPMENT CENTERS (MBDCs)

The Minority Business Development Agency (MBDA) of the Department of Commerce operates in accordance with the following mission statement:

Increase the opportunity for racial and ethnic minorities to participate in the free enterprise system through the formation and development of competitive minority-owned and managed firms. This will be achieved by emphasis on private sector involvement and entrepreneurial self-reliance, rather than government dependence.

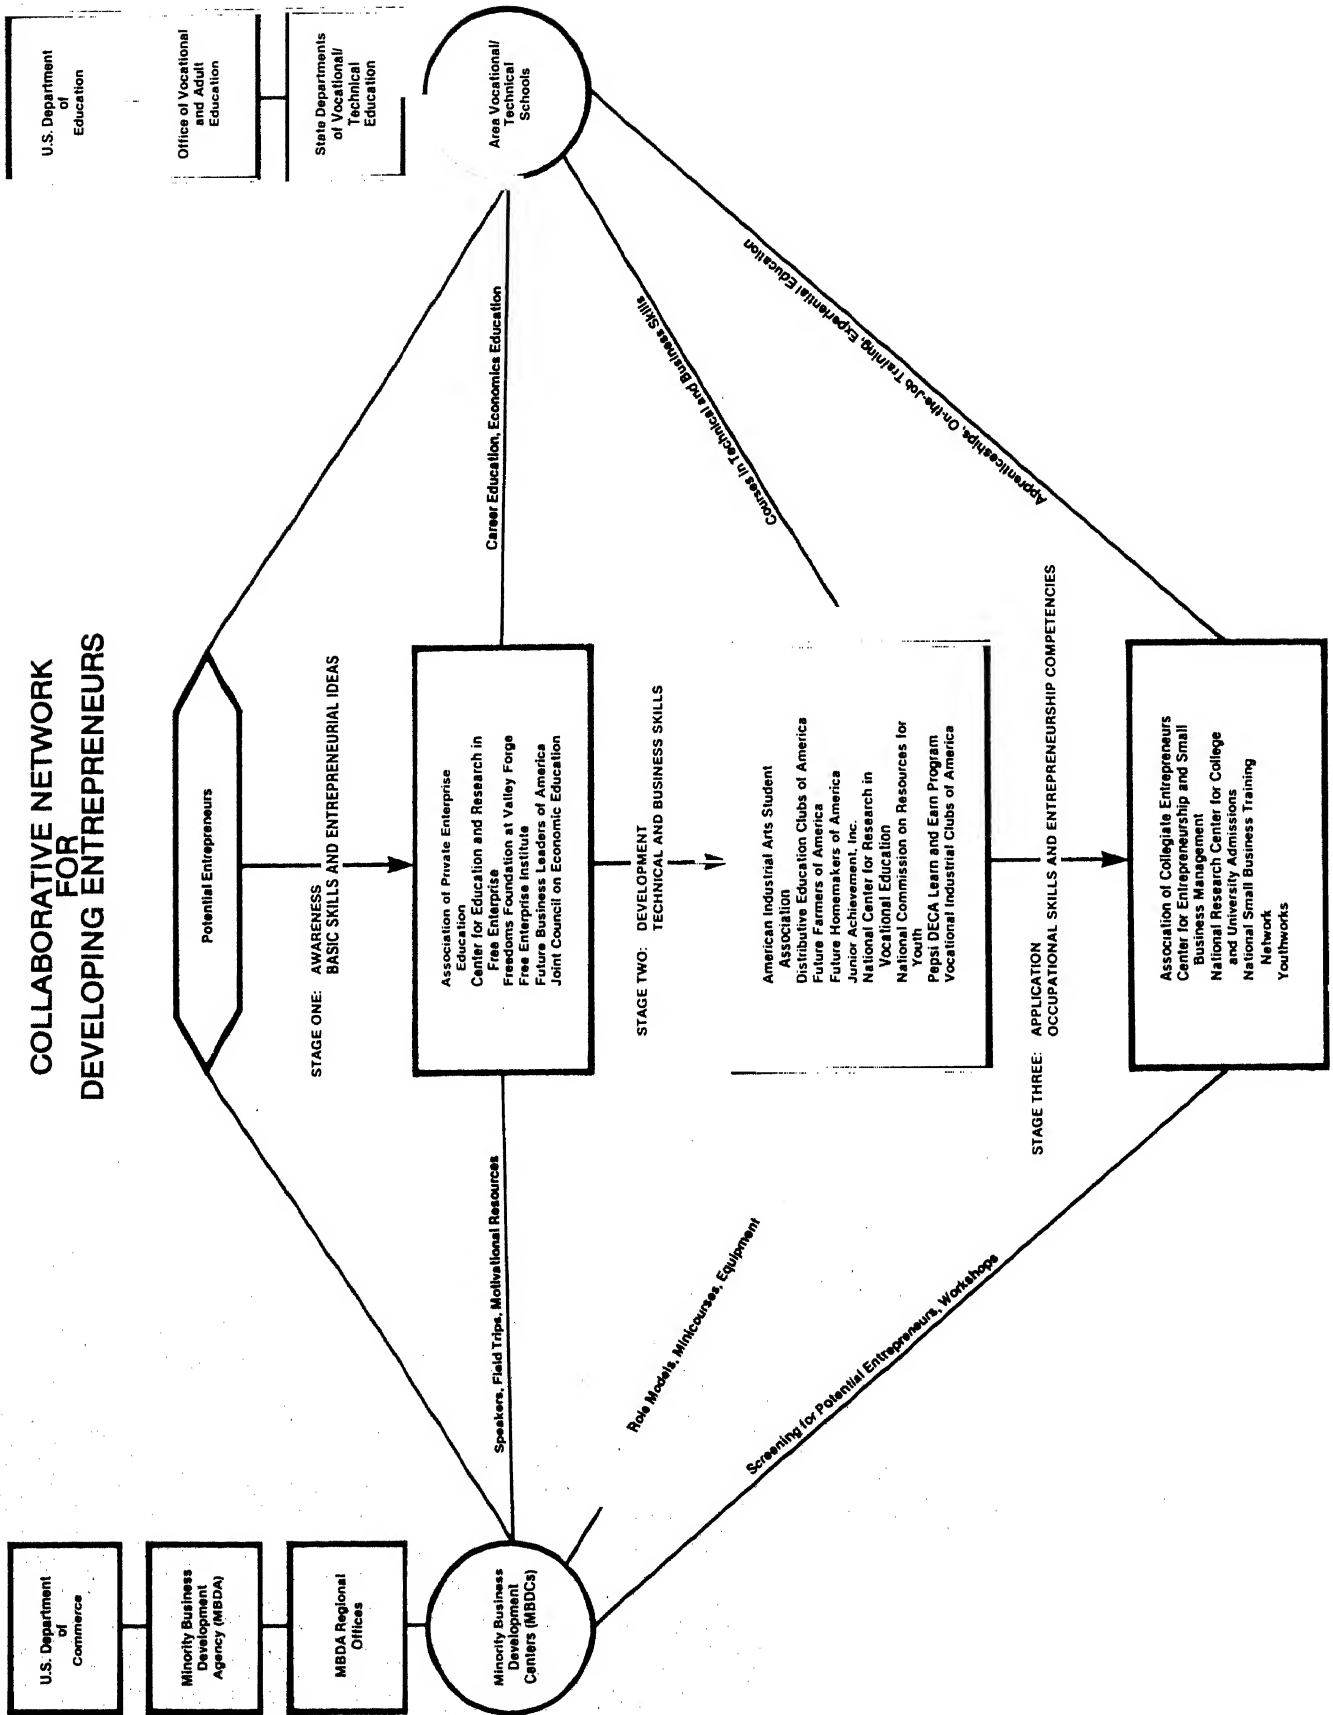

Figure 6

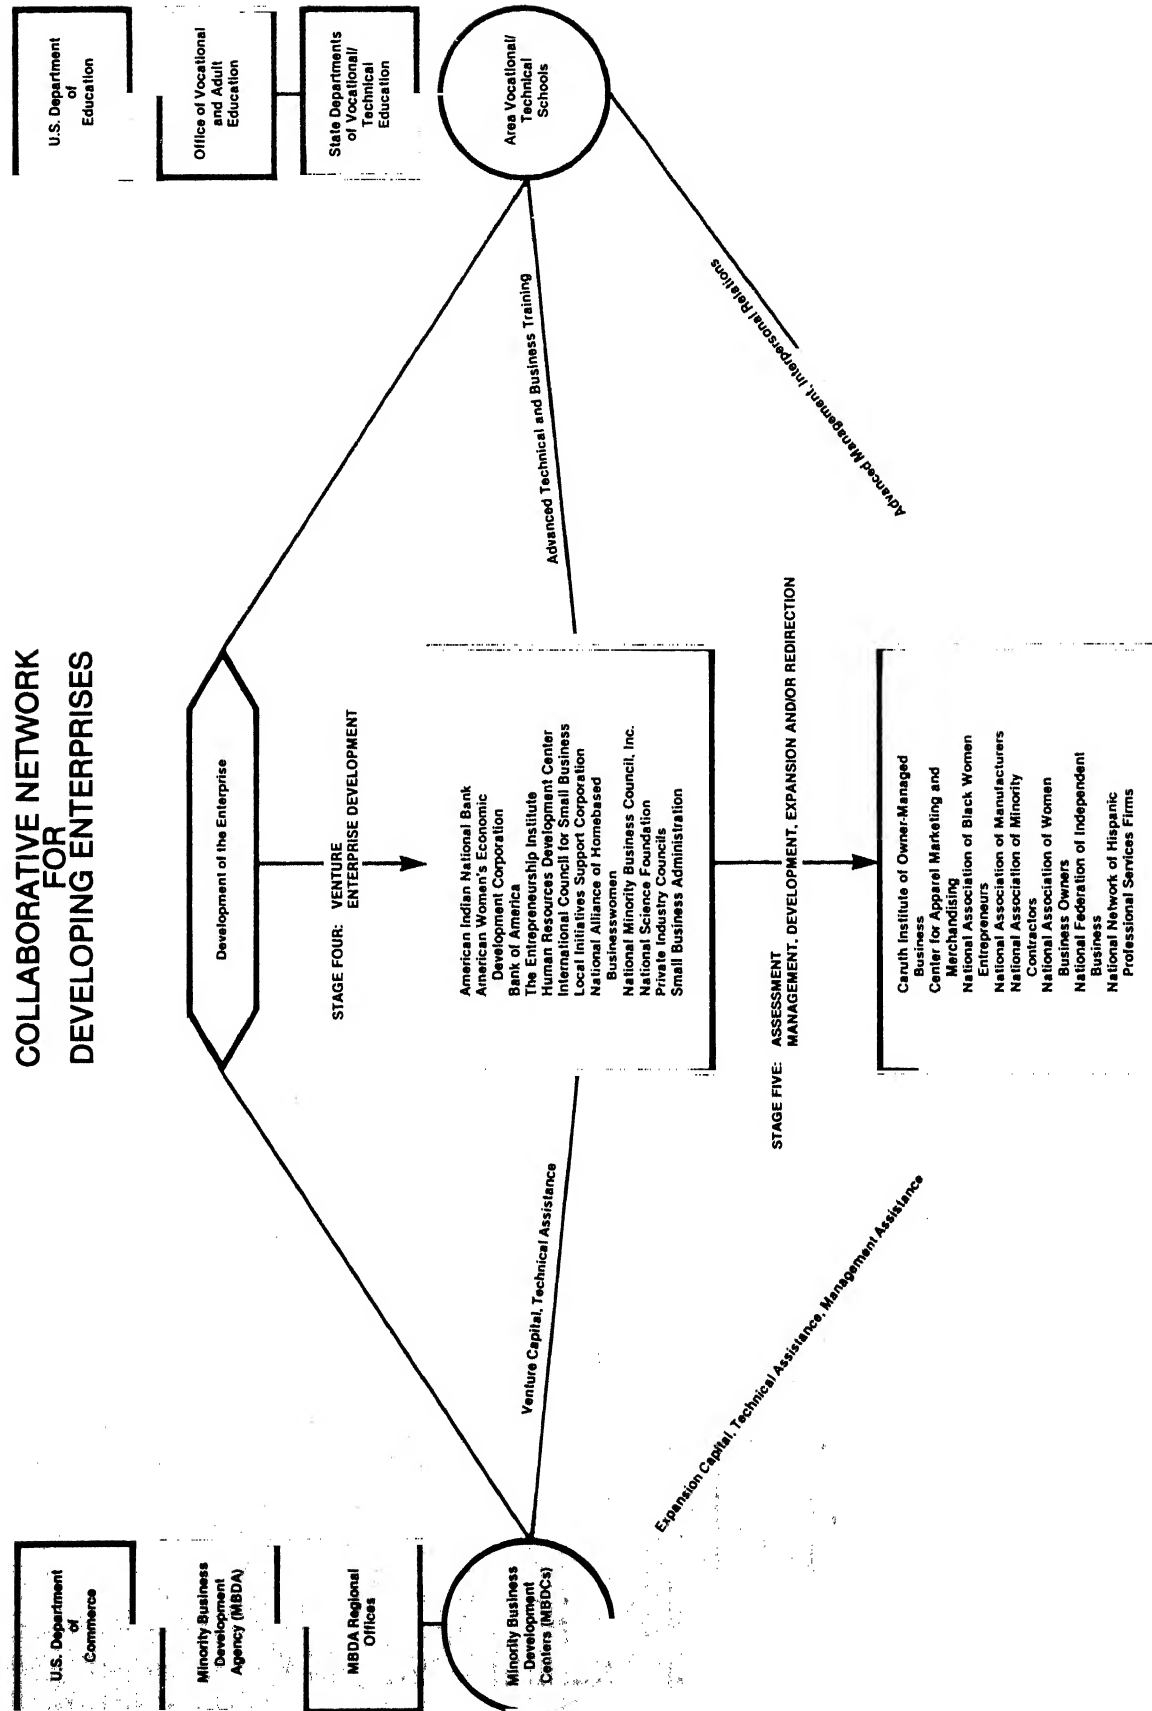

Figure 7

COLLABORATIVE NETWORK FOR DEVELOPING THE ECONOMIC ENVIRONMENT

Figure 8

In order to carry out its mission, the MBDA has established the concept of the Minority Business Development Center (MBDC) as the primary delivery system for assisting minority firms. This delivery system is graphically displayed in Figure 9 on the following page.

MBDCs have been established in 100 Standard Metropolitan Statistical Areas (SMSAs) throughout the United States (See Appendix C for a complete listing of MBDCs). The MBDC delivery system has three specific goals:

- To encourage and promote business formations by minorities
- To promote increased growth rates among new and existing minority businesses
- To reduce failure rates of minority businesses by assisting them in planning and implementing sound, competitive strategies

To meet these specific goals, each MBDC performs three main functions:

- Develops and maintains an inventory of existing minority businesses and prospective entrepreneurs
- Provides a brokering service that will foster and promote new business ownership, business expansions, marketing opportunities, and new capital sources
- Provides management and technical assistance to qualified minority firms

MBDCs provide a variety of services of potential value to vocational educators interested in entrepreneurship education and training:

1. Management and technical assistance (M&TA) to qualified minority firms and individuals (as referenced in Executive Order 11625) seeking assistance from the MBDC. Priority assistance is targeted to the following groups:

- Businesses with high employment potential
- Businesses with high technology potential
- Businesses with high export potential/capability
- Graduating 8(a) firms
- Businesses owned by minority women

M&TA assistance consists of two types:

- General counseling and referral services at no charge
- Specific business assistance on a fee-for-services basis

Specific M&TA business assistance is geared to help start new businesses and to increase growth rates and help reduce the failure rate among minority business firms. This overall assistance improves gross receipts, profits, and the net worth of assisted firms. When a client requires services beyond the MBDC's technical and financial capabilities, the MBDC utilizes Specialized Consultant Services (SCS).

MINORITY BUSINESS DEVELOPMENT AGENCY BUSINESS DEVELOPMENT CENTER NETWORK 100 CENTERS

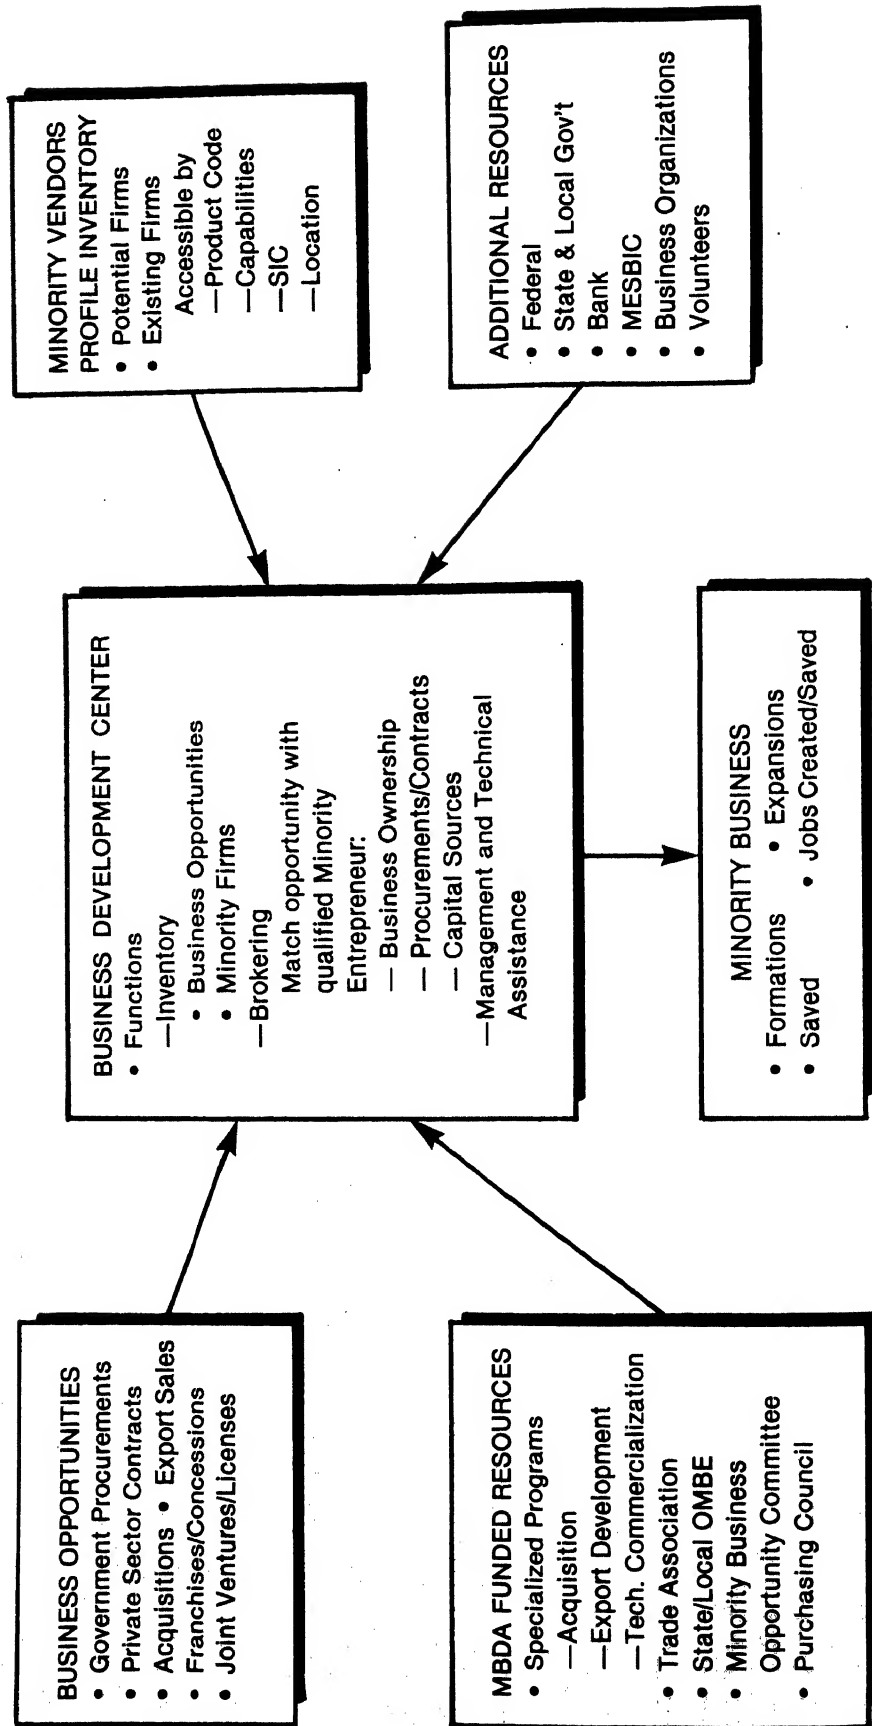

Figure 9

2. Identification and promotion of opportunities for minority business firms:

- Marketing Opportunities
- Capital Opportunities
- Business Ownership Opportunities

3. Advice and guidance to minority individuals and firms on how best to avail themselves of these opportunities.

4. Development and maintenance of inventory of:

- Minority vendor firms which are capable of selling their goods and services to the public and private sectors. The MBDC accomplishes this by making new entries and by verifying and updating the MBDA national computerized listing known as the PROFILE System
- Qualified minority individuals and firms with the potential to start and expand businesses
- Traditional and nontraditional sources of debt and equity capital
- Local (public and private sector) M&TA resources
- Who's Who in Minority Business Development. The Directory includes local public and private sector policy makers and resources, minority business community leaders and others interested in furthering the participation of minority business. The Directory is updated and verified on a quarterly basis and submitted directly to the MBDA Clearinghouse in Washington, DC, for inclusion in the National Who's Who Information System

5. Brokering services for:

- Minority individuals/firms with the potential to start and/or expand businesses or prevent business failures
- Minority vendor firms with public and/or private sector procurement opportunities, both foreign and domestic
- Minority firms seeking or requiring capital resources

The brokering function consists of matching firms and prospective minority entrepreneurs with business ownership, market and capital opportunities.

6. Promotion and utilization of the services and resources of other MBDA programs such as:

- National Minority Supplier Development Council (NMSDC) - which provides a brokering service matching Minority Business Enterprises with market opportunities identified by the NMSDC

- ° Minority Business Opportunity Committees (MBOCs) - which provide access to local federal market, capital, and management opportunities
 - ° State and Local Government Programs - which identify market and other business opportunities with their respective governmental entities
 - ° Technology Commercialization Centers (TCCs) - which assist MBDC clients that require marketing, financial or development technology assistance
 - ° Minority Export Development Centers (MEDCs) - which can assist MBDC client firms (capable of exporting) to secure export contracts and other exporting opportunities

MBDCs could be a valuable source of general economic, financial, and market information as well as specific information and assistance for the development and growth of entrepreneurial ventures. Vocational educators should take advantage of the services offered by MBDCs and look for opportunities to work together on programs of mutual benefit. Appendix C contains a more comprehensive description of MBDC activities along with directories of the Minority Business Development Agency regional offices and the Minority Business Development Centers.

VOCATIONAL EDUCATION SYSTEM

The Vocational Education System in the United States is designed to provide training for a broad range of individuals, accommodating clients without bias from approximately fourteen years of age to seventy and beyond, in virtually every occupational area and in all types of educational institutions. The federal government has provided leadership and financial assistance for vocational education since about 1917. State governments are responsible for delivering vocational education programs and services and usually designate the State Department of Vocational Education (administrative names of the agency vary from state to state) to develop and implement vocational education programs.* Whether the terminology used in a state is vocational education, vocational-technical education, occupational education, or occupational and adult education, the services provided nationwide are basically the same. Vocational education programs are funded through a combination of federal, state, and local funds, with the proportions varying from state to state. Programs are primarily delivered through the public educational system, including secondary schools, area vocational-technical schools, technical institutes, community and junior colleges, and colleges and universities. Figure 10 illustrates a standard delivery system. Services are provided by state administrators, state supervisors, local administrators, instructors, and college and university professors.

*See Appendix E7 for a complete directory of State Directors of Vocational-Technical Education

VOC-ED OPPORTUNITIES IN PUBLIC SCHOOL SYSTEMS

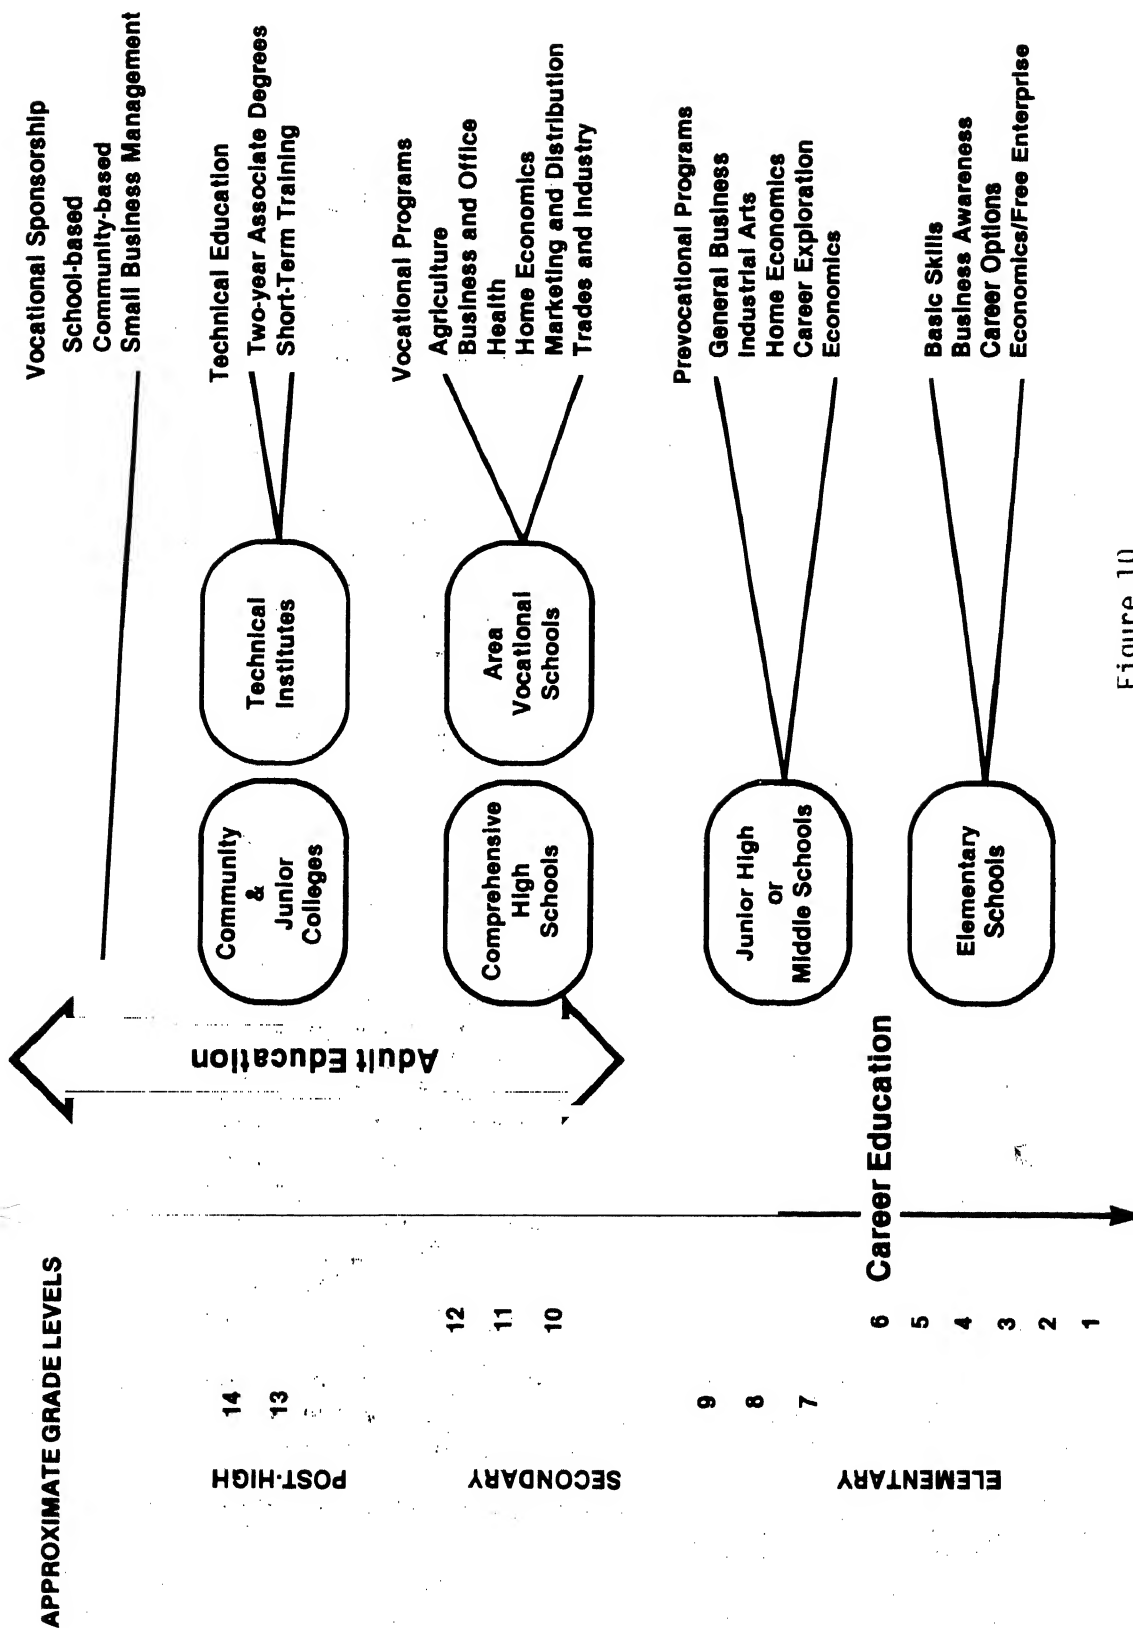

Figure 10

Very few vocational programs are offered to students below the ninth grade in school. However, a vast majority of the nation's public high schools offer at least one vocational program, which affords the opportunity for someone in the system to provide information and resources to teachers and students in elementary and middle or junior high schools. At the high school level, some states have vocational programs available at the ninth grade level, usually limited to home economics and agricultural programs, both of which provide valuable opportunities to acquaint students with specific entrepreneurship career options. Most vocational programs at the secondary level begin in the tenth or eleventh grades and are available in the agricultural, business and office, distribution and marketing, health, home economics, technical, and trade and industrial areas. MBDCs and other agencies working with school administrators and instructors can use this multifaceted delivery system to provide general and specific information to students and to encourage interested students to begin developing interests and commitments toward entrepreneurship. Providing information, resources, and technical assistance at the high school level is a critical link in the entrepreneurial development process.

In some states, area vocational-technical schools are designed primarily for secondary students, while in other states the area schools are designed primarily for post-high school students. In either situation, adult students are enrolled in full-time classes or evening classes. This provides opportunities for MBDCs and others to develop collaborative efforts to encourage entrepreneurship development. Many programs or courses on small business ownership and/or management are offered which impact directly on entrepreneurship and enterprise development. Educational administrators and instructors are usually very interested in developing collaborative relationships to make their programs more effective and more relevant to the needs of their students.

Community and junior colleges, as well as technical institutes, also offer many opportunities for the development of collaborative efforts to encourage entrepreneurship and enterprise development. Highly technical programs and courses are offered in these institutions and many of them provide great potential for the establishment of new enterprises. In addition, more mature students in these institutions provide viable opportunities for entrepreneurial development.

Although colleges and universities provide few vocational education programs per se, most vocational instructors are trained as teachers through colleges and universities. This offers MRDCs, as well as other agencies, the opportunity to provide relevant information about enterprise development to those potential and practicing teachers and to utilize their resources to create positive attitudes toward entrepreneurship training and careers.

As can be seen from this brief overview, the vocational education system provides access to a broad range of individuals and delivery systems touching nearly every segment of the American economy. By developing collaborative relationships, vocational educators and MBDCs can have a direct impact on the development of interest in, commitments to, and specific training for the establishment of entrepreneurial activities.

STRATEGIES FOR COLLABORATION BETWEEN MINORITY BUSINESS DEVELOPMENT CENTERS AND THE VOCATIONAL EDUCATION SYSTEM

The educational system is probably the only public vehicle designed to meet individual needs beginning at the preschool age and continuing through postretirement. MBDCs can use this system in various ways to help accomplish many of their specified objectives. Through various strategies, MBDCs can have access to potential entrepreneurs to accomplish such things as attitude development, the provision of specific entrepreneurial information, the identification of prospective entrepreneurs, and delivery of specific entrepreneurship training activities.

Elementary Schools

Although vocational education programs are not provided directly at the elementary level, school administrators and/or teachers have the opportunity to work with MBDCs to:

- ° Develop student attitudes and interests. Attitudes and interests are developed at early ages and many school curricula provide information and materials that create important foundations for the careers of students. Instructors of economic and career education may find MBDC involvement useful in conveying a "real world" environment when certain aspects of their courses are taught
- ° Provide written materials, charts, films and filmstrips for use in regular classroom programs. The focus of such efforts is to provide information about the role of small business in the American way of life and the economy, motivational material to interest students in the idea of working for themselves rather than for someone else, and expansion of individual horizons about emerging technologies and services that will provide viable career choices in the future

Secondary Schools

Secondary schools provide broader opportunities and more specific roles for MBDCs to work directly with students in the establishment of entrepreneurship activities. Most vocational programs are designed to prepare students for employment and to provide technical skills in preparation for work. There is a vast opportunity for vocational administrators and teachers to work with MBDCs to tie technical skills to small business establishment.

A wide variety of options exists for secondary vocational teachers to work directly with MBDCs to encourage the development of enterprises. Some of the strategies that might be used are:

- ° MBDCs provide current facts, figures, and statistics about local entrepreneurial activities and opportunities
- ° MBDCs provide instructional materials and resources for teachers to use in instructional programs. Many MBDCs already have access to valuable resource materials that are not readily available to teachers

- ° MBDC representatives serve as resource persons to help teachers arrange tours and field trips to existing and innovative small business enterprises
- ° MBDCs work with vocational teachers to identify current students who possess the skills, personal characteristics, and potential motivation to establish their own businesses
- ° Vocational teachers work with MBDCs to identify former students who have the necessary characteristics to be entrepreneurs

Other strategies can be developed to accomplish specified goals. The most effective strategy will be determined by the working relationship established between the MBDC and the secondary school system. It is important that the MBDC and the school system establish a collaborative relationship to accomplish more effectively their mutual goals and at the same time meet the needs of the clients they serve.

Postsecondary Schools

Postsecondary vocational programs provide yet another avenue for vocational educators to assist MBDCs with the establishment of entrepreneurial activities. Participants in postsecondary vocational programs are usually more mature, have a greater sense of purpose, are more highly motivated, and are closer to entering employment than are those enrolled in secondary programs. Although many of the strategies that are appropriate at the secondary level may be used at the postsecondary level, additional opportunities may exist:

- ° MBDCs might arrange to have specific courses or programs of varying duration offered. Highly specific subject matter may be available to a wide population, including individuals preparing to enter business, those just starting in business, or those established in business who may be contemplating changes in their operations
- ° Postsecondary programs offering short courses on business management, taxes, marketing, advertising or a host of other areas could benefit MBDC clients
- ° By working with MBDCs, postsecondary institutions have a great opportunity to assist them in identifying potential entrepreneurs and providing service to those who may be in the initial or advanced stages of establishing their own businesses

Adult Vocational Education

Quite often local individual needs and the leadership of the local education agencies involved will be the major determining factors in deciding which educational agency (or agencies) offers adult programs. MBDCs and the

offering agency can develop collaborative efforts regardless of which agency administers the adult vocational programs.

The forms of the effort will vary with the agency involved and an overall plan should be developed by the MBDC and vocational educators to ensure that the needs of entrepreneurs are accommodated. For example:

- ° Basic remedial skill development, technical skill development, advanced technical skill development, and business and management skill development are program areas that are already available and can be adapted/expanded to better serve MBDC clients
- ° Many unemployed adults, displaced workers and underemployed adults take advantage of adult vocational programs, creating an excellent pool of potential entrepreneurs with which MBDCs can work

Vocational educators have a golden opportunity to encourage the establishment of enterprises by working with Minority Business Development Centers. Concerted efforts to develop collaborative working relationships must be high on the priority list of both organizations. In addition, MBDCs and vocational educators must focus on specific goals to be achieved when working with other agencies and institutions. The schematic on the following page (Table 3) provides a brief summary of some strategies that may be valuable for vocational educators and MBDCs as they develop collaborative efforts.

Working relationships with a variety of other assistance organizations are generally necessary to make the best use of existing resources. It is obvious that area vocational schools and MBDCs have commonalities in their objectives for entrepreneurship training and different strengths in providing programs to meet these objectives. Collaborative efforts that capitalize on these differential strengths should be developed.

COLLABORATIVE STRATEGIES

76

EDUCATIONAL LEVELS	DELIVERY VEHICLE	AGE GROUP SERVED	ENTERPRISE DEVELOPMENT FOCUS	INSTRUCTIONAL STRATEGY
ADULT PROGRAMS	Vocational/Technical and Business Programs	Mostly above 25 yrs. of age	Getting Established Entrepreneurial Opportunities Managerial & Business Skills Business Survival	Seminars Workshops Technical Assistance Financing Information Small Business Fairs
POST-SECONDARY PROGRAMS	Vocational/Technical and Business Programs - Including technologies (adult programs also offered)	Mostly young adults, post-high and college age along with adults	Small Business Establishment Operation Management Financing Advertising	Programs Seminars Consultant Services Small Business Fairs
SECONDARY PROGRAMS	Area Vocational Schools Community Colleges Technical Institutes	Mostly young adults, post-high and college age along with adults	Small Business Establishment Operation Management Financing Advertising	Programs Seminars Consultant Services Small Business Fairs
SECONDARY PROGRAMS	Vocational Programs (Technical & Business) — Agriculture — Business Education — Distribution & Marketing — Health Organizations — Home Economics — Trade & Industrial (some adult programs and grades 9 - 12)	Mostly high school age with some adults	Entrepreneurship Opportunities Getting Established in Business Operating Small Businesses	Resources Technical Information Entrepreneurship Opportunities Career Days
ELEMENTARY PROGRAMS	Course in Economics Education Grades 1-8	Mostly youth	Attitudes General Small Business Information	Printed Information Resources Posters Charts

and Collaborative Networks - Instructions for Ordering

APPENDIX A

SELECTED ANNOTATED BIBLIOGRAPHY

PREFACE

The Selected Annotated Bibliography as presented in this notebook references over 100 publications which have been selected for their relevance to entrepreneurship education and training. Each publication is described in detail on a separate page.

Preceding the publication description are two indexes to the bibliography. This first index of items is arranged in alphabetical order by author. For each item, the index gives the page number of Appendix A on which the publication is described in greater detail. Each item is also assigned the appropriate code(s) which indicates special features of the material as described in the coding system below. The second index of items is arranged in alphabetical order by title.

Following the indexes are five matrixes designed to assist notebook users to identify those materials best suited to their needs. Each matrix represents one of the five developmental stages in the Entrepreneurship Education Model introduced in Chapter II: Stage One - Awareness, Stage Two - Development of Business and Technical Skills, Stage Three - Application of Occupational Skills and Entrepreneurship Competencies, Stage Four - Venture/Enterprise Development, and Stage Five - Assessment. Bibliography entries are listed by page number on the appropriate matrix; for example, if the book/film/article is primarily targeted toward practicing small business owners, it will appear on the matrix for Stage Five - Assessment. Materials are also categorized according to the vocational education field of service for which they are most appropriate, their suitability for use by the business community, minority orientation, and whether or not they contain strategies for teachers.

CODING SYSTEM FOR BIBLIOGRAPHICAL ENTRIES

- A. Material covers core topics involved in entrepreneurship training
- B. Material is suitable for use by the business community
- C. Vocational education field of service addressed is:
 - 1) Generally transferable to most fields of service
 - 2) Agriculture
 - 3) Business and Office

- 4) Health Occupations
- 5) Home Economics
- 6) Industrial Arts
- 7) Marketing and Distribution
- 8) Technical
- 9) Trade and Industrial

D. Material is minority oriented

E. Material contains strategies for the classroom teacher

Narrative:

This short text provides a comprehensive overview of the free enterprise system. The definition of an economic problem is provided as are alternative economic systems. A discussion of the basic foundations of a free enterprise system which includes private property, economic freedom, economic incentives, competitive markets and limited role of government is also provided. Finally, the book focuses on America's free enterprise system and examines performance criteria which can be used to evaluate the quality of life in a capitalistic society.

Narrative:

PACE, (Revised) is a modularized, competency-based entrepreneurship program of instruction appropriate for secondary, postsecondary, and adult learners. PACE can be used on an independent study basis or in vocational education classes. The materials consist of a resource guide; an instructor's manual for each of three educational levels referred to as Level I, Level II, & Level III; and eighteen units for each level.

The resource guide consists of an introduction, objectives, an annotated glossary of business terms, sources of additional information, the Small Business Administration's Annual Report on Small Business and Competition: Executive Summary, and the Standard Industrial Classification Index. Each of the three instructor's guides includes an introduction to PACE, objectives, a "Going Into Business" project, teaching outlines, transparency originals, handouts, model assessment responses, and a list of selected resources.

Narrative: Continued

Each unit is in three modules: one for Level I, one for Level II, and one for Level III. The units consist of objectives, information designed to prepare the learner to complete the module, content overview, content, activities, case studies, assessment instruments, and sources. The topics of the units include the nature of small business, the entrepreneur, business plan, technical assistance, types of ownership, marketing strategy, business location, financing, legal issues, government regulations, business management, personnel management, promotion, selling, records, financial management, customer credit, and business protection.

Narrative:

This business simulation game is designed as an integral part of a one-semester course in small business ownership and management for high school students. It is intended to be introduced after students have received a general introduction to the principles of small business ownership and management. The game is divided into two parts: starting a business and running a business. The first section emphasizes recordkeeping and the effects of pricing. The second section emphasizes choosing a location. Rewards in the game are based upon the effective use of planning, analysis, and decision-making strategy. Rewards are also given for extensive use of advertising and manipulation of pricing structures. Included in the manual are objectives, guide to daily lessons, and complete game materials.

Narrative:

This business simulation game is designed as an integral part of a one-semester course in small business ownership and management for high school students. It is intended to be introduced after students have had considerable instruction in the principles of small business ownership and management. The game is divided into two segments: starting a business and running a business. The first segment emphasizes making a business plan. The second segment emphasizes continuous business planning. Included in the game manual are game description, teacher's guide to daily lessons, and complete game materials. The game is based upon the assumption that planning and a rational approach to starting and running a business are likely to increase the potential for success.

Material is intended for supplemental use only Yes X No

Narrative:

The movement of small business management courses into college and university curricula is discussed. The present state of small business management courses, the objectives of the courses, the variety of courses being offered, and teacher and student reaction to the courses are examined. A historical overview of small business courses at higher education institutions is presented, and the role of the Small Business Administration in the rapid increase of small business course offerings is noted. Seven course objectives in small business education programs are outlined and briefly described. The large variety of small business management courses, various teaching techniques, and course formats are investigated. A list of texts and course materials for use in small business management is included. Experiences in various small business programs at institutions are presented and include both student and faculty. Appended is a list of schools offering courses in small business and entrepreneurship.

Narrative:

This is a handbook on going into business for yourself. The focus of the text is on the process of new business formation and on the trials and risks associated with business ownership. Topics include: what it takes to be an entrepreneur and the attendant risks, preparing a business plan, methods of starting or obtaining a business, physical facilities, purchasing, organization and staffing, financing and information systems, and marketing. Appendices include a business planner - a guide to evaluating an on-going business or evaluating your readiness to begin a business, a selected list of SBA aids, and a glossary of retail terms.

Narrative:

This book is directed to women of all ages and provides a clear, concise, step-by-step manual for setting up and maintaining a successful homebased business. The focus of the book includes legal issues, financial information, marketing and promotion, expansion planning, and entrepreneurial profiles of successful women. A comprehensive bibliography, state directory and product/service directory greatly enhances the value and contribution of this work. This book has been chosen as a resource book by the American Association of Junior and Community Colleges for a home business curriculum.

Narrative:

The purpose of this book is to bring to the attention of minority entrepreneurs or potential entrepreneurs an awareness of minority business survival. The book only gives points of interest that the author believes will be of special help to minority business owners. The author discusses problems that are unique to minority business owners; the need for professional advisors; errors that are deadly to minority business owners; the importance of competence; the importance of family, church, politics, and community involvement; terminology of importance to communication with the business world; and the meaning of success and failure. According to the author, the book is a "back up" to be used with other texts and was written from material and insight she uses in teaching a special business class.

Narrative:

This curriculum guide is designed for use with adults. It includes 19 content areas grouped into three units. The three units are designed to be delivered in nine sessions. Unit I includes planning, organizing, and operating a business; selecting a business location; market analysis and marketing techniques and methods; working capital and cash flow; return on assets and investments and accounts receivable and payable; personnel management; and inventory control and product pricing. Unit II covers purchasing; space utilization and organizational structure; business and payroll taxes; employee compensation, job evaluation, performance appraisal, and time management; customer service, personal selling, and competition; and advertising and display. Unit III includes management; motivation; financial management; planning for success; ratio and break-even analysis; and budgeting and forecasting. Each of the units includes an introduction (objectives, content and recommended references), information sheets, transparency masters, assignment sheets, and tests with keys. The final report describes the research conducted to develop and field test the materials. An evaluation of the project and dissemination procedures are explained.

Narrative:

This document is divided into three sections. The first section consists of an introduction to small business ownership and management curriculum. The second section provides an outline of a business principles course with emphasis in business ownership. A subsection entitled "What is a franchise?" is the highlight of this document. It provides a complete listing of the advantages and disadvantages of a franchise and a source of information on franchising. Common provisions of a franchise agreement are included plus case studies and classroom activities. A self-analysis regarding personal qualities of the successful entrepreneur and a personality check list are also included.

Narrative:

This material introduces instructional ideas in the following areas: choosing a business, ownership and control, financing the business, record systems, location and building maintenance, personnel, customer services, merchandising, store image and promotion, and risk insurance and government regulations. Each of these instructional areas is structured as follows: (1) the condition under which instruction will be delivered, (2) the performance activities required of students, and (3) the standards against which students will be judged. The needed support materials or documentation required to conduct classroom activities is also provided.

Chickenomics is the first in a series of three films marketed by World Research, Inc. It explains the free enterprise system by describing five characteristics of the American economic system: (1) private ownership of property, (2) the self-interest motive, (3) consumer sovereignty, (4) markets and (5) competition. It is designed primarily for secondary students at a beginning level, or for adults at an awareness level. The 16mm film is also available in videocassette form, and as a filmstrip and an audiocassette (slide) presentation. See pages 16 and 17 of this bibliography for descriptions of the remaining films in this series: Chickenfeed and Chickenpower.

Narrative:

This film, designed for advanced secondary and beginning postsecondary students, discusses the six principles of money and how it is used: (1) exchange -a voluntary agreement between individuals that is either direct (barter) or indirect (money), (2) medium of exchange, (3) money substitutes, (4) legal tender laws, (5) money supply, and (6) inflation. An instructor's manual is available along with posters and other visual aids. Although the film is the third in a series, it has been designed to stand alone.

See pages 15 and 17 of this bibliography for descriptions of the other films in this series, Chickenomics and Chickenpower.

Narrative:

Chickenpower is the second in a series of three films dealing with the free enterprise system. In this film designed for advanced secondary or beginning postsecondary students, energy prices are discussed in relation to the free enterprise system. Price is shown as a language giving information. The supply and demand relationship is discussed along with the need for alternatives. An instructor's manual is available along with posters and other visual aids. The film can be used alone or as part of the total series of three films.

See pages 15 and 16 of this bibliography for descriptions of the other films in the series, Chickenomics and Chickenfeed.

Narrative:

This book provides "down-to-earth" guidelines to an entrepreneur for opening a small store. The author provides information that will help the small shop owner to assess the competition, estimate the required initial investment, determine ways to raise money, decide on a type of organization, set up a recordkeeping system, know the tax situation for various types of businesses, and handle merchandising and sales promotion. There is a special chapter on art galleries, one on going out of business, and a description of some successful business ventures. The appendices provide suggested readings, a listing of Small Business Administration offices, a listing of regional organizations sponsored by the Office of Minority Business Enterprise, a gallery agreement, and a listing of volunteer lawyers for the arts organizations.

Narrative:

This curriculum guide is designed to help teachers conduct two-hour block courses on small business management and entrepreneurship for high school seniors. The materials focus on the managerial process, including the functions of planning, organization, staffing, directing, and controlling. Units are provided on the following topics: (1) nature of small business, (2) social and economic implications of business, (3) leadership development, (4) human relations, (5) communications, (6) computers for small business, (7) business plans, (8) legal forms of ownership, (9) legal issues, (10) capital and credit, (11) protecting assets, (12) personnel management, (13) financial management, (14) marketing management, (15) taxes and government, (16) community relations, (17) personal finance, and (18) career opportunities. Each unit contains specific objectives; learning activities and teaching suggestions; and references to books, films, free handout materials, and other instructional resources. Also provided is a separate section of enrichment and special projects including computerized business games and an "Establish Your Own Business" project. Appendices to the guide contain a checklist for organizing and operating a small business and lists of materials available from the Small Business Administration.

Narrative:

The purpose of this handbook is to provide direction in the use of the 36 entrepreneurship instructional modules developed as part of a research project entitled "Development of Entrepreneurship Training Components for Vocational Education." The handbook is intended to assist individuals who are conducting inservice training as well as those who are incorporating entrepreneurship materials into existing vocational education programs. The authors of the handbook describe the advantages of using the modules for administrators, instructors, and students. Implementation, instructional, and evaluation strategies for the modules are also provided.

Narrative:

This monograph is intended to assist vocational education program planners and curriculum developers in selecting materials appropriate for secondary, postsecondary, and adult entrepreneurship programs. The guide provides a series of steps to follow in developing entrepreneurship training programs and a process for examining existing curriculum resources. Eight curriculum resources are analyzed: Achieving Success in Small Business: A Competency-Based Educational Program for Persons Interested in Small Business Ownership, Entrepreneurship Education, E.T.C. -- Entrepreneurship Training Component, The Interstate Distributive Education Curricula Consortium (IDECC) Learning Activity Packages, PACE (revised) -- Program for Acquiring Competence in Entrepreneurship, Preparing for Entrepreneurship, Small Business Management and Ownership, and Small Business Ownership Management Entrepreneurship.

Narrative:

A three-month Federally-sponsored program for Spanish-speaking entrepreneurs in the San Francisco area was conducted in 1975 by Amex Systems to examine successful or exemplary education and training systems for minority entrepreneurs, develop a manual for organizing new training programs, and promote the establishment of additional programs. The final report covers needs assessment, participant and observer recruitment, site and instructor selection, classes, technical assistance, and program evaluation. Public service announcements on radio and television stations and newspaper advertisements were used to publicize the program at the University of San Francisco State to potential and established entrepreneurs. Instructors included several San Francisco State staff and professional business people from the community who presented classes in organizing and planning a small business, business management, marketing, financial management, taxes, law, insurance, and other resources. Approximately half of the document consists of supplementary appendices.

Narrative:

This is one of four papers presented at a conference held at Southern Illinois University at Edwardsville on June 3, 1980. The paper identifies skills, characteristics and qualities needed by successful entrepreneurs. A conceptual framework for entrepreneurship education is provided. Also, the components of a curriculum guide included in the three-volume document entitled Entrepreneurship Education: Learning the Skills, Applying the Skills, and Supplementary Readings (ED 190 863, 190 864, 190 865) are described with suggestions for using the curriculum guide.

Narrative:

This paper describes one of the key issue areas addressed by the White House Conference on Small Business, January 13-17, 1980. This paper offers some suggestions on why education, training, and management assistance, although identified by the author as a critical priority, did not emerge as a vital issue at the White House Conference.

Narrative:

This monograph outlines the characteristics and needs of the small business owner, emphasizing recent developments in entrepreneurship education for women. The intended audiences are coordinators and instructors of entrepreneurship education programs as well as current and prospective women entrepreneurs. The monograph is divided into five major sections: background characteristics and needs of entrepreneurs, developments in entrepreneurship education, federal programs in support of women entrepreneurs, private sector initiatives in entrepreneurship training, and entrepreneurship training and vocational guidance.

Narrative:

This softback text is intended for use in a high school setting, primarily with marketing and distributive education students. The seven chapters on entrepreneurship are entitled: (1) Weigh the responsibilities and rewards of owning a business; (2) Identify potential business opportunities; (3) Select the right location; (4) Develop your marketing strategy; (5) Develop a financial plan; (6) Obtain financing and select the legal form for your business; and (7) Develop your management plan. Illustrations are provided throughout the text to supplement the reading.

Narrative:

This handbook consists of a guide for raising capital for minority entrepreneurs. The first section deals with the process of raising capital. Then, the realities of raising capital, intermediaries and financial advisors, and assessing needs are outlined. Factors considered in evaluating the entrepreneurial team and the venture are discussed. Six points to consider when presenting a proposal to an investor are examined, and a sample proposal is provided. The investigation and negotiation stages and postfinancing relationships are also described. Individual investors and various institutions are discussed as potential sources of capital. The following types of institutions are included: commercial banks, the Small Business Administration, small business investment companies, venture capital firms, corporate venture capital activities, and Minority Enterprise Small Business

Narrative: Continued

Investment Companies (MESBICs). MESBICs in twenty-one states (California, Connecticut, Hawaii, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, Michigan, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Texas, Virginia, Washington, West Virginia, and Wisconsin) are listed. A page of miscellaneous sources and a brief bibliography are provided.

Narrative:

This unit was developed to assist high school home economics teachers in incorporating an entrepreneurial dimension into their programs. The materials are designed for exploratory purposes. The unit contains 15 lessons with objectives, generalizations, and classroom activities. Each lesson is designed for a 50-minute class period. The lessons contain background information for teachers in addition to student worksheets, student reference sheets, guest speaker guidesheets, vocabulary lists, and achievement tests. Activities include case studies, field trips, readings, guest speakers, and class discussions. A small group format is suggested. The 15 units cover the following topics: nature of small business, goal setting, product determination, advertising, business location, business expenses and capital, banker visit, types of business organizations, financial management, business recordkeeping, customer employee relations, small business owner visit, and self-evaluation of small business ownership. The last unit is an achievement test; possible assignments for make-up work also are given.

Narrative:

This film is designed to make students aware of the importance of entrepreneurship, the possibility of becoming entrepreneurs as a career choice, and how entrepreneurs create jobs. Stress is also placed on the relationship between political and economic freedom. The film tells the stories of nine entrepreneurs. Three of these individuals have successfully started and expanded their firms into multimillion dollar operations. Three others have just recently begun and are still experiencing the pain as well as the pleasure of venture initiation. The last three entrepreneurs are high school students who have already gone into business for themselves. A complete teacher's guide is available that is keyed to the film.

Narrative:

This book is a republication of a series of studies profiling eighteen types of businesses most commonly started by minorities in urban population centers. The businesses include: Beauty Shops, Bowling Alleys, Building Service Contractors, Children's and Infant's Wear, Contract Construction, Contract Dress Manufacturing, Convenience Stores, Customer Plaster Industries, Dry Cleaning, Furniture Stores, Industrial Laundries and Linen Supply, Machine Shop Job Work, Mobile Catering, Pet Shops, Photographic Studios, Real Estate Brokerage, Savings & Loan Associations, and Supermarkets. (The original publications were initially commissioned by the United States Department of Commerce but are no longer available through official government channels.) The business profiles include a description of the industry or service provided, information on the nature of the product and the potential customer, an analysis of business feasibility, projections of attainable returns on investment, and special considerations or factors which may prove favorable to those considering establishing new urban-related minority ventures. In addition, guidance in establishing a business, especially with regard to financing, is provided. Finally, each study closes with a useful bibliography and a list of relevant trade organizations.

Narrative:

This is a report of a research study on minority contractors sponsored by the U.S. Department of Labor. The book summarizes the research, provides a profile of minority contractors and their unique problems, summarizes obstacles in upgrading minority contractors, discusses approaches to upgrading minority contractors, and describes joint ventures and minority contractor associations. Conclusions and recommendations are provided.

The study itself relied primarily on interview data from 340 Black, Spanish-heritage, Asian-American, and Chinese-American contractors. (There were 25 white contractors in the group.) Contractors in the mechanical trades were given special attention. Four areas of concern comprised the interview: (1) background of the contractor, (2) profile of the firm, (3) problems with the firm, and (4) the contractor's view of upgrading efforts. To supplement this information obtained from contractors, interviews were also conducted with 30 union officials, civil rights leaders, government officials, contractors' association staff members, surety agents, and others. The end result is the publication of this text designed to provide information on upgrading minority contractors.

Narrative:

The materials consist of five self-paced, self-evaluative instructional learning packages. These materials are self-instructional and can be used with or without a facilitator. The materials are designed to develop a comprehensive business plan for individuals considering starting their own retail apparel stores. An introductory learning packet is included with complete instructions for the user/s. The four additional learning packets are in the areas of accounting and control, buying and merchandising, operations and management, and advertising and promotions. Each of the four units includes two or more modules and an individual store plan. Each module contains learning activities, simulated exercises, and preferred readings. Also included are suggestions for extended learning experiences in the local community.

Narrative:

The book's primary purpose is to provide individuals with the necessary information to start, buy or sell a business. The book is divided into nine chapters dealing with the selection of a CPA, Attorney, Broker, Insurance Agent, and Franchise. The basis for this book is experience rather than theory. A variety of examples is included; the examples are incorporated in an understandable manner and highlight the essential elements of business transactions.

Narrative:

This text focuses on opportunities in the free enterprise system as discussed in terms of seven kinds of small businesses: production, distribution, retailing, personal services, professional services, financial, and public utilities. Other topics include problems of entrepreneurship, types of business organization, layout and facilities, financing the business, recordkeeping, law and insurance, sales promotion, and personnel management. Small businesses are described by the SBA as having \$5 million to \$15 million in wholesale sales, \$1 million to \$5 million in retail sales or construction receipts, or as a manufacturing plant with fewer than 1500 employees. Ninety-five percent of all businesses in the U.S. are "small"; 51% of the total civilian work force is employed by small businesses. This text is divided into ten units (chapters). Each unit contains objectives, textual material, vocabulary lists, multiple choice and essay self-evaluations (no answers provided), and a variety of suggested learning activities.

Narrative:

This book provides ideas for 21 small businesses especially appropriate for women that can be started with a modest investment. Many of the businesses can be operated from the home on a part-time basis. The author begins with a brief discussion on how to start and promote a business; and then, in one page or less, discusses the following businesses: flea market stores, bookstores, producing art shows, rerun shops, part-time florists, specialized crafts shops, maid or cleaning services, picture framing shops, selling sweet smelling things, operating tourist homes, babysitting registries, home catering businesses, home cooking schools, fix-it shops, typing service, modeling, paper flower making, bottle gardens, manufacturing businesses, inventing marketing games, and shopping guide publishers. The discussion for each of the businesses varies but provides ideas on such topics as location, where to get merchandise, recordkeeping, and personnel. For each of these businesses, the author provides additional resources for the interested entrepreneur.

Narrative:

This set of four filmstrips and two audio-cassettes correlates in part with the textbook, Creating a New Enterprise, by Roger W. Hutt. The audiovisuals, however, may be used to supplement other entrepreneurship materials for high school students. The titles of the four filmstrips include (1) The World of the Entrepreneur, (2) Roads to Entrepreneurship, (3) Legal Forms of Business Enterprise, and (4) Procedures for Planning New Enterprise. The filmstrips are designed to introduce major topics on entrepreneurship to high school students.

Narrative:

The purpose of this filmstrip is to help business people who wish to become owners of their own firms, to identify risks and develop strategies to cope with them. A major portion of this filmstrip is devoted to insurance information for business since insurance is an important part of a business person's overall risk management program. This filmstrip serves as a guide to the would-be entrepreneur, and as an educational tool for students.

Narrative:

These materials are contained in four volumes and were developed to prepare adults of Indian ancestry to own and manage their own small businesses. The course is divided into nine subjects including the management process; marketing management; finance, accounting, and bookkeeping; personnel management; business law; personal finance; business communication; production management; and office procedures. The course requires approximately five months of full-time instruction (500 hours). Each instructional guide includes an overview, objectives, reference materials, resources required, methods, directions for using training techniques, and indicators (evaluative methods).

Information regarding administering the program is also provided in such areas as recruiting and selecting students, instructor training, funding, and follow-up counseling.

Narrative:

The material includes the essential elements to start and operate a business in California. The text narrows its scope and usefulness because of its focus on California's business laws; however, the material presented does provide an adequate foundation. The first section of the book examines the preliminary considerations for going into business and includes the selection of the legal form in which the business will operate and the advantages and disadvantages of buying an existing business. State and federal licensure and taxation constitute the primary focus of this book. A comprehensive resource section is provided and it includes personal services, ERISA compliance, OSHA regulations and other information related to entrepreneurship.

Narrative:

In 1972 there were only 400,000 female-owned businesses in America--3.1% of the total. By 1979 there were nearly 1,000,000. This text begins by discussing some of the reasons for this dramatic rise and then deals with the preliminary tasks involved with starting a business such as getting the idea, buying a business or franchise, planning, dealing with the legal aspects, finding the right accountant, pricing, and obtaining credit and insurance. It further discusses operating tasks such as promotion, paperwork, marketing, taxes, and personnel. The second half of the book deals with case histories of successful women entrepreneurs in six general areas of business: retailing, services, home services, food, manufacturing, and franchises. A description of a business is given, followed by the owner of the business sharing her experiences in the enterprise.

Narrative:

This curriculum guide is designed for first-year students in postsecondary technical schools. The materials are comprised of 22 modularized instructional subunits designed to create among the students: (1) an awareness of entrepreneurship; (2) motivation for exploring entrepreneurship as a career option; (3) an acquaintance with the skills, knowledge, and attitudes required of an entrepreneur; and (4) an insight into the problems and prospects inherent in entrepreneurship. Each of the 22 subunits is organized into four major units: concept factors, personal factors, world factors, and managerial factors. Each unit begins with a brief introduction describing the major topics developed in the subunits. The subunits are designed to be taught in forty-four 50-minute sessions. Each subunit includes overall and enabling objectives, resources, suggested advance preparation for the teacher, instructional activities, recommended class time, and a bibliography. The major topics relative to entrepreneurship are developed in the subunits.

Narrative:

This book analyzes the current burst of entrepreneurial activity and explains how government policies can improve the environment for entrepreneurship. It advocates a revival of the traditional process of innovation and venture initiative and laments the short-run-profit orientation that taxes and regulations have forced on managers.

The topics covered in this text are as follows: The rediscovery of the entrepreneur; The entrepreneurial event; The entrepreneurial process; The fiscal environment for entrepreneurship; Taxation and the entrepreneurial environment; Regulation and the entrepreneurial environment; Patents and the entrepreneurial environment; The European environment for entrepreneurship; The new entrepreneurs; Index.

Narrative:

This book explores the history, psychology, sociology and social dimensions of entrepreneurship. The concept of venture creation is examined and chapters addressing risk and capital research are included. The relationship between entrepreneurship and small business and internal corporate strategies are revealed. Economic development and growth through the theory of entrepreneurship is provided. Research models, issues, and the need for education for entrepreneurship is the final focus of this text. The book is academically written and contains excellent references. The book is well suited for academic environments examining the theory and application of entrepreneurship.

Narrative:

This curriculum guide is intended for use with 11th and 12th grade marketing and distributive education students. It is designed to help students gain an understanding of the problems and decisions that entrepreneurs face and to obtain skills necessary in operating a small business. Included in the guide are 15 lesson plans with accompanying handouts and transparency masters. A student project simulating starting and managing a business is included. Major topics are ownership and control, store image, financing the business, location, the building, personnel policies, behind-the-scenes work, customer service policies, pricing merchandise, buying merchandise, stock control, store promotion, risk and insurance, records system, and government regulations. The suggested timetable, lessons, and assignments can be adjusted to fit teacher and student needs.

Narrative:

Small business represents one-half of the American economy; one of every two working Americans is directly or indirectly involved in small business. Many fail, but the challenge that is still there is the focus of this handbook. Emotional fulfillment, being one's own boss, proving one's self, and directing one's own destiny are the basic appeals of entrepreneurship. These four themes are examined from a "totalistic" perspective--interrelating work and life. Topics include the new entrepreneur, starting a new business, forms of business ownership, sources of finance, managing the enterprise, sources of help, working with people, and the small business of the future.

Narrative:

This is one of seven chapters in a monograph dealing with the impact of vocational education on the improvement of worker productivity. This chapter discusses the relationship between small businesses and increased worker productivity. It also identifies target groups that would benefit from entrepreneurship training. The chapter is divided into five sections: introduction, productivity of the small business sector, the need for education and training in the small business sector, implications for vocational education, and summary. The chapter is intended for entrepreneurship instructors and/or program coordinators, vocational education graduate students, vocational supervisors, and vocational directors.

Narrative:

The authors of this paperback book primarily discuss businesses that may be of interest specifically to women. Businesses are grouped under 12 areas of interest: glamour, research, creative, handicrafts, food, writing, organizing, office, promotion, selling, animals, and people. Within these 12 interest areas approximately 101 businesses are discussed. The primary topics addressed for each business are: (a) the idea for the business, (b) getting started, and (c) cash flow. The first three chapters of the book include a discussion about women and their new role in business, financing a business, and promoting a new business. The book concludes with success stories of women in business.

Narrative:

Businesses succeed because they are operated in accordance with sound management practices, the basic principles of which are delineated in this text. The major objectives of this book are to acquaint prospective small business managers/owners with these basic principles; to introduce the tools needed for effective planning, organizing, and controlling; and to develop skill in analyzing management problems and dealing effectively with them. The text is written in a question-and-answer format. It provides an overview for the prospective entrepreneur of the major problems typical of small businesses. For the incumbent business owner, it provides a means of self-evaluation. The twenty-one chapters are sub-divided into six sections: managing a small business, establishing the business, financial and administrative control, marketing procedures, operations management, and legal and governmental controls. There are five appendices providing SBA field office addresses, SBA publications lists, free SBA management assistance publications, a listing of national trade associations, a Small Business Reporter Publication Index, a bibliography of enrichment references, and a key for chapter self-checks. An instructor's guide is available.

Narrative:

This book was written for women who want to become business owners. It provides an introduction to business ownership and marketing research, how to develop a marketing plan, how to choose a legal structure, the necessities of establishing a business, how to determine financial needs and where to go for financing, information on financial planning and recordkeeping, inventory control and purchasing techniques, and information on hiring and good human relations. The final chapter includes procedures for developing a business plan. Throughout the chapters there are worksheets with answer sheets provided in the back of the book. A vocabulary of business terms is also included. This book is based on the experience and advice of over 300 women business owners and many women business experts. It grew out of the curriculum materials on women in entrepreneurship developed under contract with the U.S. Office of Education.

 X Learning Activity Packages

Material is part of a series: X Yes No
Material can stand alone: X Yes No
Material is intended for supplemental use only Yes X No

Narrative:

A small business management program targeted for women at postsecondary and/or adult levels is described in three volumes: Final Report, Instructor's Manual, and Instructional Materials. A survey of California women business owners was made to identify the characteristics and needs of women entrepreneurs. Based on this survey, an entrepreneurship education program and curriculum were developed and pilot-tested with eight women. The final report describes the background of the project, needs, purposes and objectives, procedures for curriculum development, procedures for testing the curriculum materials, and the survey used to identify characteristics and needs of women entrepreneurs. The instructor's manual (the second volume) provides information needed to teach an entrepreneurship course by using curriculum materials developed through the project.

The instructional materials (the third volume) are organized into eight learning activity packages (LAPs). The LAPs are self-paced, student-centered modules which take the learner through the process of preparing a business plan. Students actually prepare a business plan through a series of

Narrative: Continued

simulated learning activities. Each LAP includes a rationale statement, behavioral objectives, homework learning activities, a list of optional reading materials, fact sheets containing basic content, and worksheets.

Titles of the LAPs include: Small Business Ownership/Introduction; Marketing Research; Marketing Plan; Setting Up Your Business/Start Up; Decisions and Choices; Financial Planning; Financing; Operations/Running Your Business; and Putting It All Together/Planning Your Business.

Narrative:

This is Module 1, an introductory or "core" module to an additional 35 instructional modules developed as part of a research project entitled "Development of Entrepreneurship Training Components for Vocational Education." Module 1 provides a generic introduction to entrepreneurship. Examples of businesses related to seven major vocational education subject areas are provided. Also included is a general discussion of management principles appropriate for all small businesses.

Narrative: Continued

Module 1 includes both student and teacher guides. It is divided into 15 units, each with identified goals and objectives. The case study approach to skill development is used. Supporting text to the case studies, individual and group activities, and discussion questions are also included. There is an overall summary and a written quiz for the module.

The resource guide is a product of a research project entitled "Development of Entrepreneurship Training Components for Vocational Education." The Guide lists all entrepreneurship materials identified during the literature review phase of the project. It includes a bibliographic listing of materials that were used to develop the 36 instructional modules for seven major vocational fields as well as a bibliography of general background information on entrepreneurship. This guide is of value to educators who desire information on entrepreneurship in addition to that found in the Getting Down to Business modules.

Narrative:

This publication identifies sources of information to help the entrepreneur. Listings include: generic books on entrepreneurship and other sources of books; women resources; government publications; sources of franchising; resources from the Internal Revenue Service; U.S. postal publications; sources of assistance; financing sources; and other sources such as Dun and Bradstreet, trade associations, seminars, courses, and magazines. The book concludes with a list of business words. The book identifies many of the in-print materials from established publishers, as well as the voluminous numbers of publications and diverse management assistance programs available from government sources. Where applicable, the authors have reprinted tables of contents, abstracts, and bibliographical entries directly from the source so readers may better evaluate their appropriateness for their own needs.

Narrative:

In this critical issue paper presented to the President and the Congress of the United States, the importance of small business ventures in our economy and the significant impact vocational education can have on entrepreneurship education are discussed. Vocational education has paid too little attention to self-employed persons who discover and create their own jobs. These entrepreneurs are essential to economic vitality. There is a need to create more entrepreneurial work opportunities inside existing organizations. The time has come to focus national attention on education for self-employment including (1) re-examining public policy to see how government may be discouraging small business formation, (2) enlarging manpower policy conceptions to include self-employment incentives, (3) encouraging business to redefine employment in entrepreneurial terms, and (4) learning how to modify educational programs to prepare people for entrepreneurially-defined work.

Narrative:

This resource materials package on entrepreneurship is designed for use by secondary and postsecondary vocational educators to assist in the development or organization of a program in small business management. Section I contains a bibliography of printed materials concerned with entrepreneurship. Information is organized into four parts: getting ready to become an entrepreneur, becoming an entrepreneur, being an entrepreneur, and additional sources. Section II contains the bibliography portion of a three-volume publication entitled Minding Your Own Business and is organized into three parts: the environment of small business, managing a small business, and curricula. Section III provides a listing of publications on entrepreneurship which have been selected from a search conducted by the Educational Resources Information Center (ERIC). Finally, Section IV contains abstracts of new and continuing projects concerning entrepreneurship administered by the U.S. Office of Education, Division of Research and Demonstration in the Bureau of Occupational and Adult Education, Fiscal Years 1976 and 1977.

Narrative:

This resource on entrepreneurship is one of the chapters of the 1982 Yearbook of the American Vocational Association. The intended readers of the chapter are individuals directly responsible for organizing and/or teaching entrepreneurship.

The first half of the chapter can be used as a partial resource for introducing entrepreneurship to students. It contains statistics relating to entrepreneurship that were presented at the 1980 White House Conference on Small Business, facts concerning the importance of small businesses, information on increasing entrepreneurial opportunities, and examples of the contributions of small businesses. The second half of the chapter presents implications of entrepreneurial training for vocational education. Four levels of entrepreneurial training are identified and suggestions are also given regarding new training approaches.

Narrative:

This curriculum guide contains 14 units designed to aid the teacher in providing instruction in small business ownership and management for students at the secondary, adult, continuing education, or community college levels. Each unit consists of an introduction; objectives; content; and suggested activities, including projects, group dynamics, simulations, role playing, case studies, and assignments. Most units contain at least one case study depicting a real-life business situation. Units include: the nature of small business, determining product and market, selecting the location, obtaining initial capital, choosing the legal form of organization, managerial planning, recordkeeping, financial management, credit and collections, advertising and sales promotion, employee and community relations, obtaining information and assistance, insurance, and the future of small business.

Narrative:

This publication provides information to Illinois community colleges for developing educational programs designed to meet the needs of current and future small business entrepreneurs. In the introduction, the importance of the small business sector to the economic growth of the state is explained. The role of the community college in facilitating small business development is described. A model to follow in designing entrepreneurial training programs is presented. Suggestions regarding the following program components are provided: participant needs, program contents, advisory committees, needs assessment strategies, financing the program, promoting the program, miscellaneous program details, and evaluating the program. Finally, a few exemplary entrepreneurial training programs from throughout the United States are cited. An extensive bibliography is included, with listings of available curriculum guides and textbooks, sample forms, course outlines, degree programs, etc.

Narrative:

According to the authors, retail sales for 1981 were estimated to reach \$1 trillion generated by 1.8 million stores, 35% of which have no paid employees and only 7% of which employ more than seven people. Success in small business ownership, according to Dun and Bradstreet, is based upon personal preparedness. This text is designed to provide a preparatory introduction to the potential retail entrepreneur. Topics are grouped into three topical areas: opening the store, operating the store, and evaluating the store's performance. This handbook is suitable for self-instruction. Appendices provide information on government regulations, insurance requirements, SBA checklists, SBA loans, and SBA field office addresses.

Narrative:

Developed through a two-phase project, a three-year small business management adult education program is described in eight volumes entitled:

1. Small Business Management: Instructor's Manual
2. Small Business Management: Volume II -- Business Analysis. Second Edition
3. Small Business Management: Volume III -- Curriculum: Year I, II, III
4. Small Business Management: Addendum to Small Business Management Education Volume III
5. Small Business Management: Instructor's Manual On Interpretation of Small Business Analysis Data
6. Small Business Management: Getting a Small Business Management Education Program Started

(Continued on next page)

Narrative: Continued

7. Small Business Management Education: Final Report-- An Adult Education Program: Development, Demonstration and Evaluation of Management Education Programs for Small Business Entrepreneurs, Including Minorities
8. Small Business Management Education: Entrepreneurship Education for Adults--Program Development and Implementation: Final Report

The purpose of the comprehensive program is to help families improve the effectiveness of their business operation and enable them to reach family and business goals. The instructor's manual (the first volume) is intended to serve as a guide for establishing a small business management adult education program in a community. It includes the following: philosophy and description of the program, responsibilities of the instructor, using advisory committees, implementing the program, securing enrollment, organizing the program, evaluating the program, and an annotated bibliography. A practice problem in year-end business analysis is presented in Volume II to provide experience with a system of single-entry bookkeeping. Volume III, a curriculum guide designed for a three-year program, contains unit objectives; transition of units; key questions; teaching strategies; summary; resources and equipment needed; lists of references; and appendices containing student handouts, worksheets, and/or transparency masters. The fourth volume is a supplement to Volume III and contains additional handouts, case problems, schedules, and seminar information keyed to specific units of instruction. The fifth volume provides instructors with suggestions on how tables and significant figures formed in a small business report can be used by students to improve the management of small businesses. The sixth volume describes step-by-step procedures for starting a small business management education program. It serves as a model for program implementation: needs assessment, legislation, instructor certification, solicitation of support, and preservice workshops for instructors.

The final report for the first phase of the project is contained in a seventh volume. It describes the background of the project, site selection, staff development, selection and use of advisory committees, curriculum development procedures, evaluation, and dissemination activities. The eighth volume is the final report for the second phase of the project. It provides background information, a brief description of each major activity that was accomplished during the second phase, a list of the products that were developed, and dissemination procedures.

Narrative:

This report examines a study to promote high-tech industries in British Columbia using an integrated educational and economic development program. Topics discussed in the report include: the historical development and importance of entrepreneurship education in British Columbia, types of industry suitable for British Columbia, a model educational program (basic concepts of the model, on-campus training, on-the-job training), developing manufacturing industries, and cost considerations. The "discovery park" model addressed in the report is an active cooperative effort between educational institutions, different departments and levels of government, small-scale manufacturing units, and a cooperative-based large marketing corporation that would provide basic knowledge in specific fields, specialized skills in the field of manufacturing, on-the-job training to provide the "state of the art" in industry, and business management skills, both general and unique. Once a student graduates and launches a venture, the program would provide ongoing assistance.

Narrative:

This document includes sections on business failure; survival techniques; the purposes, goals, objectives and philosophies of small businesses; associate attitude survey; evaluation tools to determine market size; position and fallacies; and how to evaluate your competitors. Over one-half of this work concentrates on the financial aspects of small business management, which includes financial ratios analysis, people ratio analysis, cash flow analysis, break-even analysis, financial statements and the "Z" ratio probability of bankruptcy. The final section addresses survival planning and decision-making. This document is a very practical and realistic approach to small business management.

Narrative:

This is the final report of a project designed to develop, administer, and evaluate an in-service education program for owner-managers of newly-formed small business firms. The project objectives included: (1) identifying the core-crucial managerial-entrepreneurial competencies needed by owner-managers of newly-created small business firms, (2) preparing a series of competency-based individualized instructional modules, and (3) recruiting and enrolling a minimum of twenty-five owner-managers in a self-paced program of study. A review of literature was undertaken to identify the reasons for failure of small business firms, to determine needed owner-manager competencies, and to determine the content for a training program. Twenty-four core-crucial competencies were identified from the literature review and verified by an entrepreneurship advisory committee. Twelve self-paced instructional modules were then written featuring audio cassettes, instructional materials, and learning experiences. References published by the Small Business Administration were also included in the modules. A

Narrative: Continued

training program for twenty-seven owner-managers was conducted using the modules. Assistance was provided in completing the modules by specially-trained teacher-counselors and a third-party evaluator. It was concluded that the self-paced study was an acceptable approach to the development of competencies needed for the successful operation of newly-created small businesses.

Narrative:

These materials consist of twelve self-study, self-paced instructional modules designed to develop basic management skills for owner-managers of newly-created small retail, wholesale, or service business firms. The titles of the instructional modules include: Success in Small Business: Luck or Pluck; Determining Capital Needs; Estimating Your Business Potential; Creating an Effective Business Image; Developing Your Sales Promotion Plan; Developing Ads That Produce Results; Improving Profits Through Effective Management; Improving Employee Selection, Training, and Supervision; Merchandising: The Key to Greater Profits; Business Records: Good Medicine Tastes Bad; Assessing the Health of Your Business; Protection for You and Your Business. Each module is organized into five elements: (1) cover page (describes the content of the module in concise terms); (2) audio tape (presents a preview of major concepts described within the instructional module); (3) printed material (describes important small business management concepts); (4) learning activities (provide an opportunity to apply key concepts to individual business situations); (5) preferred readings (sources for additional information regarding the major topic covered in the module).

Narrative:

Fifteen modules on small business management are provided in this curriculum guide developed for postsecondary and/or adult vocational instructors. Module titles are as follows: decision-making steps, financing a small business, location of small business, record systems, the balance sheet and profit and loss statement, purchasing, marketing, sales, cash flow, taxes and depreciation, insurance, management controls for small business, employer-employee relations, break-even analysis, and maximizing profit. Each module is organized into seven elements: (1) introduction; (2) behavioral objectives; (3) transition of modules (a brief summary of the previous, current, and following module); (4) the lesson (content is centered around a series of key questions related to student objectives, with each key question containing a suggested teaching strategy); (5) summary (key points); (6) unit evaluation instrument (including instructions for using and an answer key); and (7) transparency masters for use in the lessons. Each module requires 1-1/2 to 2 hours to complete.

Narrative:

Designed to make disabled individuals aware of their own potential entrepreneurial capacities, this self-help manual provides information to help potential entrepreneurs make appropriate small business decisions and find needed information and resources. Following a discussion of entrepreneurship as an employment option, various topics relevant to the disabled entrepreneur are covered, including entrepreneurial success stories, entrepreneurship and the self-help movement, and home-based entrepreneurs. In a section devoted to developing and organizing a business enterprise, the following topics are discussed: gathering ideas for business opportunities, the business outlook, entrepreneurial business opportunity areas for the 1980's, and forms of business organization. Guidelines are set forth for developing a business plan. Outlined next are types and sources of public and private assistance. Completing the guide is a section on locating a new enterprise, determining capital needs, and getting good help.

Narrative:

This instructional guide for an entrepreneurship program in secondary schools consists of 13 units which may be used as the primary or supplemental resource for a one-semester course. Also, the materials may be useful to postsecondary and adult education instructors. The following items are provided for each unit: objectives, handouts containing necessary content and background information, questions for discussion, transparency masters, and student activities. The 13 units include (1) introduction to entrepreneurship and self-employment; (2) selection of an effective legal form of business organization; (3) selection of effective specialized assistance; (4) financing the small business; (5) selecting a location; (6) building, equipment, and layout; (7) operating permits, licenses, and tax regulations; (8) personnel management for the entrepreneur; (9) building a flexible advertising plan; (10) determining pricing and credit policies; (11) inventory and supplies; (12) understanding a basic accounting system; and (13) selection of effective protective steps.

Narrative:

This book is intended for both newcomers to business and seasoned entrepreneurs. It will help any business person avoid the pitfalls of borrowing as well as obtain the fastest and best financing. The information will help entrepreneurs determine their financial need, identify where to go for money, present their cases, negotiate, identify what to look for in a loan agreement, and understand the actual obligations of the borrower. The appendices include a sample packet of materials that could be presented to a lender and lists of venture capital companies and small business investment companies.

Narrative:

These are 35 business-specific instructional modules developed as part of a research project entitled, "Development of Entrepreneurship Training Components for Vocational Education." The modules were designed to be included as an entrepreneurship component with seven vocational areas. The titles of the modules by vocational education discipline are as follows:

Agriculture, 5 modules:

Dairy Farming, Farm Equipment Repair,
Fertilizer and Pesticide Service,
Garden Center, Tree Service

Narrative (Continued)

Business and Office, 5 modules:	Answering Service, Bookkeeping Service, Secretarial Service, Software Design Company, Word Processing Service
Health, 3 modules:	Health Spa, Nursing Service, Wheelchair Transportation Service
Marketing and Distributive, 7 modules:	Apparel Store, Bicycle Store, Business and Personal Service, Flower and Plant Store, Innkeeping, Specialty Food Store, Travel Agency
Home Economics, 5 modules:	Day Care Center, Home Attendant Service, Housecleaning Service, Restaurant Business, Sewing Service
Technical, 3 modules:	Energy Specialist Service, Guard Service, Pest Control Service
Trades and Industrial, 7 modules:	Air Conditioning and Heating Service, Auto Repair Shop, Carpentry Business, Construction Electrician Business, Hair Styling Shop, Plumbing Business, Welding Shop

Each module consists of student and teacher guides. The student sections include nine units with goals and objectives, a module summary, case studies, supporting text, individual and group activities, discussion questions, and a written quiz.

A separate teacher's guide for each module provides a list of goals and objectives, an overview of the module, suggestions for using the module, responses to activities and discussion questions, optional points to present, quiz answer key, and a list of suggested readings. Instructional time for each module is approximately 10 class periods.

Each module contains the same basic information related to the business discussed in the specific module. The use of these modules should be preceded by Module 1, Getting Down to Business: What's it all About?, which is a generic introduction to entrepreneurship.

Narrative:

This three-volume curriculum guide and final report emphasizes entrepreneurial skills in relation to management and industry. Volume I provides an orientation to the course and four instructional units: inner control, innovation, decision making, and human relations. Each unit contains information related to six management skill areas: determining product and market, selecting a location, advertising and sales promotion, recordkeeping, obtaining initial capital, and employee and community relations. Volume II focuses on planning and completing student projects related to the skill areas listed previously. Volume III includes critical incidents, readings, and suggested additional resources which complement the instruction strategies contained in the first two volumes. The curriculum guides provide objectives,

Narrative: Continued

learning activities, transparency masters, and handouts.

The final report describes field testing, revision, and publication of the curriculum materials. Suggestions for establishing new courses in community colleges and implementing the materials in existing courses are provided. A listing of contacts at the state, national, and international levels is included.

* A series of units which comprise the Missouri Marketing and Distributive Education secondary curriculum.

Narrative:

This secondary marketing and distributive education performance-based instructional unit contains nineteen lesson plans, each designed for a fifty-five minute instructional period. The following topics are included: (1) types of small and large scale business establishments, (2) customer identification, (3) business locations, (4) store layout, (5) equipment, (6) product planning, (7) financing, (8) organization, (9) government regulations, and (10) legal issues. Each lesson plan includes objectives, information sheets, assignment sheets, transparency masters, and teacher and student activities. Optional activities, a bibliography, a postassessment instrument, and a unit evaluation instrument and key are included at the end of the unit.

Narrative:

The miniproblems are provided to augment an introductory and/or advanced course in small business management and ownership. They relate to the following topics regarding entrepreneurship: women and minority entrepreneurs, ethics, communication skills, recordkeeping, and self-assessment. All the problems address common business situations and skills needed by entrepreneurs; a few are presented as "games" designed to promote skill development. The amount of time required to complete the miniproblems is flexible; each can be completed in 10 minutes or a full class period, according to the preference of the teacher and the class, and the time available. The instructional format of each miniproblem is identified (e.g., small group discussion, role play, brainstorming exercise, written exercise, pencil-and-paper problem, individual exercise, etc.) although formats can be changed as desired. Both teacher and student materials for each miniproblem are provided. The intended level of instruction can be secondary, postsecondary, or adult.

Narrative:

Nine units on small business management are provided in this curriculum guide designed for use in an advanced course in either a secondary or postsecondary setting. Its focus is on those who are interested in beginning a small business venture, have some prior business knowledge, and have a specific business in mind. The nine unit topics include: (1) Setting Up Your Business, (2) Marketing, (3) Location, (4) Promotion, (5) Systems and Records, (6) Pricing, (7) Business Policies and Relationships, (8) Organizational Structure, and (9) Financing Your Business. At the beginning of each unit is a summary page containing a synopsis of the unit's content, objectives, student project work, teaching strategies, mini problems, and references. Also included are guidelines for presenting the material, discussion notes, and suggestions for conducting class activities. Student information sheets, worksheets, case study problems, interview forms, and project instructions are included.

Narrative:

This is a game simulating the research, analysis, and decision making a person must do to select an appropriate business location. In the game, the specific content area taught to students is the process for choosing a location for a small business; the basic skills practiced are problem solving by analysis and logic, decision making, and constructive group interaction to achieve a common goal. Teacher instructions, student instructions and all game materials required are provided. The game takes four to six class periods to play, including introduction, play, scoring, and post-game discussion.

Narrative:

This book is described by its author as a guide for entrepreneurs. Potential entrepreneurs can select chapters of interest or can proceed sequentially through the material. Chapter One discusses the author's concept of the new entrepreneur and includes a brief history of entrepreneurship. Chapters Two and Three prepare the reader to enter into business ownership by providing information on profitability of small businesses, franchising, the mental and physical requirements of business, and sources of assistance. Chapter Four discusses how to prepare a business plan and provides excerpts from actual plans. Chapters Five through Ten discuss the operation of a business,

Narrative:

Designed for use by high school students, their teachers and counselors, these six learning modules contain creative materials to encourage individuals to think about their own talents, skills, interests, and capacities for job creation. Each module consists of student worksheets and teacher guides. Covered in the first five modules are the following topics: (1) Identifying personal skills and their relationship to job creation; (2) Identifying job creation opportunities in the community; (3) Planning and organizing in job creation; (4) Elements of job creation, including involvement, community, risk-taking, accomplishing, and task performance; and (5) Assessing oneself and one's readiness for involvement in entrepreneurship as well as starting and developing new ideas. The sixth module (complementing the first five) consists of an audio cassette script which includes the words to 11 songs concerning the topics addressed in the modules, as well as worksheets for teachers and students.

Narrative:

There is a general lack of comprehension of basic management skills among owners and operators of small firms. This college-level text offers a straightforward approach in presenting fundamentals of managing small firms. The text is organized around planning, financing and financial management, form and structure of the business, operating, and evaluating a small business. Unique to this text are discussions of consumer legislation, business layout, and the usefulness of key-man/woman insurance. Case studies and discussion questions are provided for each chapter. An instructor's manual is available.

Narrative:

This is the final report of a project designed to educate small business entrepreneurs on a continuing basis over three years. A model was developed to meet the specific needs of North Dakota business entrepreneurs and the postsecondary educational institutions providing the training. The model consists of four types of activities: classroom instruction, small group instruction, individual instruction, and business technology instruction. The instructional materials for the first year included information and content that have application to all class members. In the second and third years, much of the instructional material was drawn from analyses of the class members' businesses. A listing of unit topics for each of the three years of instruction is provided. The intended reader of this report is anyone who is responsible for developing and/or conducting entrepreneurship training for adults.

Narrative:

This resource on entrepreneurship is one chapter of a five-chapter document dealing with special problems of vocational education for rural women. The author highlights the activities of rural female entrepreneurs, assesses the role of "microbusiness" in rural economies, and shares unique experiences of rural women. Suggestions are also given relative to a number of approaches to consider when developing entrepreneurship courses for rural women.

The intended reader of the material is anyone who is directly responsible for organizing and delivering entrepreneurship instruction for rural women.

Narrative:

This evaluation report examines a business opportunities project that was designed to encourage and assist low-income women, especially minority women, to explore business ownership as a career option. The report evaluates the seven-week test workshop conducted for working women (over half having annual incomes under eight thousand dollars and nearly half having less than a high school education). The evaluation suggests that the participants gained new knowledge of business ownership and management, formulated new career plans, and undertook new learning activities. Appendices to this report include a schedule and workshop agenda, the results of a survey of basic business competencies among women, the survey form, qualitative evaluations from participants, and a summary and evaluation of each session with objectives.

Narrative:

This monograph identifies and describes federal programs which furnish capital, management assistance, and contracting opportunities for minority businesses. In addition, other federal business-related programs which may be of interest to minority entrepreneurs are described. For each program, the following information is provided: program title, agency, type of assistance available, description of the program, eligibility requirements, application procedure, and contact addresses and phone numbers. The information is categorized into the following sections: interagency coordination, Minority Business Development Agency (MBDA), U.S. Small Business Administration (SBA), business contract opportunities, financial assistance, management assistance, information assistance, and special programs. Extensive directories of contract agencies for the minority entrepreneur interested in programs described in this publication are provided in 17 appendices.

Narrative:

Small businesses are failing at a rate of 90%. Yet, in spite of these statistics, there has never been so many small businesses and people thinking about starting new ones. This text explores the reasons behind the continued interest in entrepreneurship and provides a practical, "how to" approach to starting and managing a small business.

Beginning with an overview of entrepreneurship, the nine sections (18 chapters) cover a step-by-step process for conducting a feasibility study and developing a business plan; organizing and starting a business; marketing and operations; management; evaluating performance and changing strategies to take advantage of opportunities; and a final chapter on small business management counseling specifically focused on students in the federally-sponsored Small Business Institute.

Two self-assessment instruments to help the potential entrepreneur consider his/her readiness are provided. A checklist on insurance needed, a form for evaluating an ongoing business, and a bibliography of SBA materials are also provided. Case studies are used extensively to illustrate basic principles.

Narrative:

There are eleven types of entrepreneurs described in this book, ranging from the self-employed individual to conglomerators. Beginning with a discussion of entrepreneurial perspectives, the text examines alternative kinds of ventures, how to discover them, and--once discovered--how to find lines of entry. A dichotomous approach to entrepreneurship, individual and corporate, is presented. Topics include success and failure factors, career departure points for beginning a new business, sources of venture ideas, entry wedges, and locating and buying an ongoing business. Brief case studies are used extensively to illustrate key points.

Narrative:

The guide for instruction (ED 174 855) in the basics of entrepreneurship is intended for use primarily in adult education. However, it can be adapted for use in secondary and postsecondary vocational education programs. Twelve topical units are presented in the guide: business financing; business financial planning; business outlook; financial records management; human relations and its effect on personal and business life; insurance; modern marketing for small businesses; paperwork management; personal and family financial management; personnel management in small businesses; property management; and taxation and tax planning. Each unit contains most of the following instructional elements: unit objectives, suggested activities, instructional materials, information sheets, assignment sheets, tests, and answer sheets for tests and assignments. The guide can be used as an instructional resource for the teacher when giving group instruction, or each unit can be used by individual students on a self-study basis.

The final report of this project (ED 164 996) describes the methods for developing and implementing the modules as well as the staff development program designed for adult instructors.

Narrative:

This book focuses on the psychological and personal implications for women who are starting their own businesses. It addresses situations that force women to juggle their lives between their work and their families, or to choose between careers and marriage. By sharing the experiences, trials, and successes of other women in business, this book gives support and encouragement to those women who are thinking of going it on their own in the business world. This book is help for the new entrepreneurial woman, the reentry woman, the woman considering a career change, and the professional contemplating whether or not private practice is for her.

Handbook for Coordinators of Post-Secondary Programs for Self-Employment

Material is part of a series: Yes X No
Material can stand alone: X Yes No
Material is intended for supplemental use only Yes X No

Narrative:

This sourcebook on small business/entrepreneurship programs is written for coordinators or instructors of entrepreneurship programs at postsecondary levels. The major content includes a synthesis of ideas and recommendations in ten decision areas which coordinators of entrepreneurship programs must address: purpose or need, clientele, client characteristics, program objectives, program structure and scope, funding and support, staffing, recruitment and selection, evaluation, and program content. Basic questions and supportive materials are provided to assist with decision making. Listings of resources and instructional materials are appended. Six case studies of small business ventures are presented with questions to guide class discussions, individual assignments, and instructor presentations. Guidelines for evaluating program planning, recruitment and selection, instructional objectives, staffing, and program impact are also outlined. A listing of contact persons at postsecondary institutions and a topical paper on recruitment and funding are also provided.

Material can stand alone: ☒ Yes _____ No
Material is intended for supplemental use only _____ Yes ☒ No

Narrative:

This training manual is divided into three principal sections. The first section provides an overview of the workshop and presents the essential elements for a successful program. The second section introduces the media and business curriculum utilized during the workshop and the program services that are provided. Finally, the actual business operations are explored, which include a business checklist, plan, and financial statement.

This manual, while limited in scope, is a satisfactory reference for those interested in conducting a workshop dealing with entrepreneurship. The manual lacks depth and avoids the complex issues of entrepreneurship, but it does provide a promatic application.

APPENDIX B

MODEL TRAINING PROGRAM DESCRIPTIONS

APPENDIX B

- MODEL 1 A Free Enterprise Elementary Career Education Project: Academic Skills Application (1980)
- MODEL 2 The Kinder-Economy: A Case-Study of Kindergarten Pupils' Acquisition of Economic Concepts (1977)

ENTREPRENEURSHIP EDUCATION
MODEL PROGRAM INFORMATION

MODEL 1

1. Program Name/Title: A Free Enterprise Elementary Career Education Project: Academic Skills Application (1980)
2. Location: Troy State University, Hurlburt Field, Florida
3. Level:
 - a. Stage: Awareness
 - b. Target Group: Elementary
4. Affiliation/Collaboration: N/A
5. Program:
 - a. Basic Training Objectives: To help students learn about the free enterprise system and the jobs necessary to enable the system to function efficiently.
 - b. Educational and Instructional Strategies: Simulated activities of actual market economy; comprehensive 6-week course; working foundation in areas of banking, farming, manufacturing, and retailing; lectures, group discussions, film strips, field trips, and guest speakers.
 - c. Content: 1) understand interrelationship of producing, distributing and consuming goods and services; 2) recognize interdependence of individual citizens and workers in public and private enterprise; c) develop job awareness and responsibilities in free enterprise.
 - d. Other Information:
 - 1) Faculty: Elementary School Teachers
 - 2) Results: Length of Time - Started in 1979, 3-year period.
Number Trained - 300 students in grades 4-6
Success - Objectives were met, activities of project closely integrated into school curriculum, student participation increased each year, contributed to maintaining high level of school attendance. Pre- and post-tests indicate that students were able to give logical answers to written test questions on enterprise economy.
 - 3) Cost/Benefits: N/A
 - 4) Replicability: N/A

6. Evaluation: N/A

MODEL PROGRAM INFORMATION

MODEL 2

1. Program Name/Title: The Kinder-Economy: A Case-Study of Kindergarten Pupils' Acquisition of Economic Concepts (1977)
2. Location: University of California, Los Angeles
3. Level:
 - a. Stage: Awareness
 - b. Target Group: Elementary (K-12)
4. Affiliation/Collaboration: N/A
5. Program:
 - a. Basic Training Objectives: To present conflicting evidence and show the process of decision-making through rationalization as accomplished by five- and six-year olds. Investigates the relationship of child's success in economic decision making and analysis to instructional intervention or increased maturity; the extent and degree children are able to master concepts; the type of school, home, and personality variables that predict success in economic decision making and analysis; and parents' attitudes toward the teaching of economic decision making and analytical principles.
 - b. Educational and Instructional Strategies: Games, learning centers, worksheets, filmstrips, role play, simulation activities.
 - c. Content: Set of sequential experiences emphasizing decision-making concepts on economics related to the real world; introduces basic economic concepts to children in primary grades; nine economic decision-making and analytical concepts using a three-stage sequence of experience, debriefing, and reinforcement. Nine concepts: scarcity; decision making, opportunity cost and cost-benefit analysis; production; specialization; distribution; consumption and savings; demand and supply; business organization and business venture; money and barter.
 - d. Other Information:
 - 1) Faculty: Randomly selected from group of 92 volunteers; teachers attended a 30-hour workshop on Kinder-Economics, have been tested on the nine economic concepts and have demonstrated competency in the programs at or above the 80 percent level.

2) Results: Length of Time: 1977
Number Trained: 96 subjects from 5
kindergarten classes, aged 5-6 years
Success: Children's understanding of
economics most likely related to
instructional intervention inherent in
Kinder-Economic Program. After completing
program, children's economic literacy level
was 4 percent higher than level manifested
by the teachers.

3) Cost/Benefits: N/A

4) Replicability: N/A

6. Evaluation: N/A

MODEL PROGRAM INFORMATION

MODEL 3

1. Program Name/Title: Exploration of Entrepreneurship as a Career Option (1983)
2. Location: Memphis, Tennessee, Melrose High School (Pilot)
3. Level:
 - a. Stage: Awareness
 - b. Target Group: Secondary/Adult Vocational Education
4. Affiliation/Collaboration: Public School
5. Program:
 - a. Basic Training Objectives: N/A
 - b. Educational and Instructional Strategies: Seminar speakers from small and large businesses, SBA, etc. are used. Text Used: Last year developed own materials for reference; PACE (Program for Acquiring Competence in Entrepreneurship), NCRVE; Small Business Management and Ownership Vol. 1, (GPO); Creating a New Enterprise, Southwestern
 - c. Content: Career awareness of entrepreneurship option; infusion concept; 6 week unit for each--marketing and distribution, office education, trade and industrial, building trades, commercial arts, other areas--full year program marketing class, advanced students, separate course elective. Entrepreneurship concepts infused into existing programs in photography, food service, horticulture and auto mechanics.
 - d. Other Information:
 - 1) Faculty: Certified Marketing and Distributive Education Teacher
 - 2) Results: Length of Time - 1982-83; 1 hour per day, 6 weeks (from regular 3-hour period)
Number Trained - 60 Students, average 15 for each of the four groups
Success - N/A
 - 3) Cost/Benefits: Vocational Education funds (State and Federal)
 - 4) Replicability: Already replicated, plan to replicate state-wide next year.

6. Evaluation: Evaluated at end of school year to improve offering following year.

ENTREPRENEURSHIP EDUCATION
MODEL PROGRAM INFORMATION

MODEL 4

1. Program Name/Title: Entrepreneurship and Black Youth (1980)
2. Location: Athens, Georgia
3. Level: a. Stage: Awareness
b. Target Group: Secondary
4. Affiliation/Collaboration: University of Georgia, Small Business Development Center; Georgia Office of Minority Business Development; The National Business League
5. Program:
 - a. Basic Training Objectives: to acquaint students with the idea of entrepreneurship and to impress upon them the importance of higher education as a means of achieving high goals; and to motivate students toward entrepreneurship as a career goal through exposure to successful Black role models.
 - b. Educational and Instructional Strategies: 4 days in college campus environment during summer (June); intensive workshops held in University classroom; special events planned to provide recreational and cultural diversity; awards presented to winners during banquet.
 - c. Content: starting and managing a business, business law, marketing, international trade, computer simulation in which student learns to manage a mock firm, goal achievement, and assertiveness training; core of classroom activities - computer game, serves as vehicle to utilize theory presented in earlier classroom sessions.
 - d. Other Information:
 - 1) Faculty: University of Georgia College of Business Administration, SBDC professionals, and successful Black entrepreneurs
 - 2) Results: Length of Time - 1980
Number Trained - 221 students

3) Cost/Benefits: Cannot be fully measured in percentages and numbers. Significance is clearly understood from students' comments.

4) Replicability: Program expanded regionally into Alabama and South Carolina.

6. Evaluation: Students complete an unsigned evaluation form to assess the program internally. Returning students complete additional evaluation that gives indication how student utilized information gained during previous year's program.

ENTREPRENEURSHIP EDUCATION
MODEL PROGRAM INFORMATION

MODEL 5

1. Program Name/Title: Southeast Oklahoma Rural Entrepreneurship/Industry Program
2. Location: Kiamichi Area Vocational and Technical School District; Seven-county area of Pittsburg, Coal, Johnson, Atoka, Pushmataha, Bryon and Choctaw. Training facilities located in 3 sites - McAlester, Atoka and Hugo
3. Level: a. Stage: Awareness, Development, and Application
b. Target Group: Postsecondary and Adult
4. Affiliation/Collaboration: Project funded by Oklahoma State Department of Vocational-Technical Education
 - Contract with School District
 - Other support groups cooperating with Project:
 - ° Office of Governor
 - ° Rural Enterprises Development Company/Industrial Technology Research & Development, Inc. (REDC/ ITRAD)
 - ° Small Business Administration District Office
 - ° Oklahoma Department of Economic and Community Affairs
 - ° Oklahoma Economic Development Department
 - ° Choctaw ManPower Training Program

Note: Initial Grant from US Department of Labor, 1981. Sub Part J, CETA National Demonstration Program, Title 6 Special Project

5. Program: a. Basic Training Objectives: to develop and sustain the economic ability of the 7-county area by assisting in the skills training of employees and in the development of small businesses which will result in jobs. Objectives: 1) to introduce persons enrolled in Vocational Education to the private enterprise system in their specific vocational training program area; 2) to provide employment preparation through PLATO/Basic Skills Program in the 3 learning centers for youth and other individuals who have dropped out of school

5. Program: a. Basic Training Objectives: (Continued)

or have a pattern of severe unemployment/underemployment; 3) to provide management training and assistance to those who wish to pursue careers as owners/managers of small business; 4) to develop new products and processes in related vendor production for small businesses through linkages between the REDC/ITRAD federal government institutions, Small Business Administration and private sector management industries; and 5) to provide job-related training to unemployed or underemployed individuals to prepare them for jobs in emerging local industries

- b. Educational and Instructional Strategies: Open-entry--open-exit systems--students start at different times, self-paced and exit independently as complete competency objectives in contract.

Phase I - Awareness curriculum for all students

Phase II - Advanced entrepreneurship training targeted for students who want to start their own businesses

Format for Incubator Stage - The small business management training provided in overall vocational training programs for secondary and adult students at each of 3 locations

- The Incubator training is conducted in an open space industrial facility adjacent to the Vo-Tech Campus

- c. Content: 5-year pilot project with training for special industry skills which will result in the employment of skilled trainees in locally created industries.

Sample Curriculum: Small Business Management Training Course Outline

Phase I - free enterprise and entrepreneurship - discovering world of small enterprise, examining entrepreneurship as career, finding new enterprise ideas

c. Content: (Continued)

Phase II - advanced entrepreneurship - planning a new enterprise, putting the plan into action, preparing a financial plan, and a program for acquiring competence (PACE)

d. Other Information

1) Faculty: Three industrial training coordinators provide industrial training in production for potential owners and employees in the emerging business

2) Results: Length of Time - January 1981 started this 5-year project

Number Trained - CETA first Year - N/A
1982/83 - 936 secondary
adults
875 adults
55% male, 45% female
enrollment distribution

Success: Development Stages in Incubator -
McAlester - Southeastern
Warehousing
Service Corp., Wire Cut, storage,
& Kit Packaging Business.
Training began June 1, 1983.

Hugo - PAC RAT, new product, on
attachment to hold tools,
spare tire and jack in
pickup truck, new invention
ready for production and
marketing

Atoka - Cimarron Bronze Works,
foundry operation in
startup stage
- Circle Ball is a new product
in the pending stage for
Atoka or Hugo incubator

Assistance is being provided for a
fourth Community Incubator
- Scannol, Inc. - producing a
disposable fabric glove in Colgate
Community Incubator

3) Cost/Benefits: N/A

4) Replicability: Pilot project can be used as model program for community college, and training at vocational and technical level in a 4-year college and university setting

6. Evaluation: N/A

7. Contact: N/A

MODEL 6

1. Program Name/Title: Entrepreneurship For Kids (1984)
2. Location: Apollo JVS, 2225 Shawnee Rd, Lima, Ohio 45806
3. Level: a. Stage: Awareness
b. Target Group: Adult (K-12 Teachers)
4. Affiliation/Collaboration: Consumer Economics, Vocational Home Economics,
State Department of Vocational/Technical
Education
5. Program: a. Basic Training Objectives: To acquaint participants with
 - 1) Information about small businesses, what makes them successful, and how they contribute to the economic system.
 - 2) Information, resources, and learning activities that will help students consider and evaluate the career goal of owning their own businesses
- b. Educational and Instructional Strategies: One-day teacher in-service
- c. Content: To make teachers aware of importance of small business and entrepreneurship and how they can integrate this into their curriculum
- d. Other Information:
 - 1) Faculty: Consumer Economics Coordinator, Guidance Supervisor, Shop Owners
 - 2) Results: Length of Time: Planning 8-12 hours
Operate 6-1/2 hours
Number Trained: 20-24 (estimate)
Success: Questionnaire Evaluation given at the end of the day
 - 3) Cost/Benefits: Consumer Economics Grant. Reimburses \$35 per teacher to school districts sending teachers to cover substitute cost. Low cost/high benefit is expected
 - 4) Replicability: Easy for any school system to do

6. Evaluation: One page questionnaire will be completed by participants

ENTREPRENEURSHIP EDUCATION
MODEL PROGRAM INFORMATION

MODEL 7

1. Program Name/Title: Teacher Practicum - Entrepreneurship Awareness and Training for Public School Teachers (1983)
2. Location: University of Texas, Austin
3. Level: a. Stage: Awareness
b. Target Group: Adult
4. Affiliation/Collaboration: College of Engineering/College of Education
5. Program: a. Basic Training Objectives: Teaching teachers the basics of doing business in the American free enterprise system - e.g., the importance of productivity, how supply and demand really work, the meaning of teamwork in a company, why businesses feel burdened by regulations, the spirit of employees working hard and enjoying it. Overall Goal: To be sure the concepts of free enterprise reach all students. Text--based on previously developed materials.

Outgrowth/Follow-through Program: Excellence Awards for Enterprising Students of Practicum Teachers. Fourfold purpose: a) to stimulate imaginative projects of students in response to innovative teaching practices among past and present Practicum Teachers; b) to give recognition to enterprising students who, in turn, demonstrate the benefits of scholarships awarded to their teachers; c) to encourage both students and teachers to share with others a useful description of effective teaching practices in free enterprise education; and d) to foster an awareness and exchange of successful student learning experiences by dissemination of effective teaching models.
- b. Educational and Instructional Strategies: Summer session: one week at UT campus for orientation, lectures and attending Annual Free Enterprise Conference; four weeks actively involved with sponsoring company; one week return to UT campus developing lesson plans, attending lectures and debriefing.
- c. Content: Enbales teachers to become part of the company team for four weeks -allowing them firsthand experience with what a corporation is really like; how it functions daily, meeting challenges, and shouldering its responsibilities within a community.

d. Other Information:

- 1) Faculty: University instructor originally from private business
- 2) Results: Length of Time - 1976 and still on-going
 Number Trained - As of 1983, 202 teachers have participated
 Success: Proved to be remarkably effective as evidenced by the increased teacher and company participation since it started. Program is still ongoing.
- 3) Cost/Benefits: Sponsoring company contributes \$2,200 to cover teacher stipend and program costs. Sponsoring businesses indicated practicum gives them a good return for their investment since it provides immediate benefits to the community through more informed consumers and better prepared business persons.
- 4) Replicability: Program could be used in various colleges and universities.

6. Evaluation: Survey of 1981 teacher practicum participants: 78% indicated practicum very valuable, 97% recognize need for teaching economic education to their students.

MODEL 8

1. Program Name/Title: Steps to Starting a Small Business
2. Location: Madison, Wisconsin
3. Level: a. Stage: Development
b. Target Group: Secondary (Grades 11 and 12)
4. Affiliation/Collaboration: Business Education Coordinating Council, Madison Metropolitan School District, Madison Business and Education Coordinating Council, University of Wisconsin School of Education, Madison Rotary Foundation, Wisconsin State Department of Public Instruction, and Bureau of Vocational Education.
5. Program: a. Basic Training Objectives: To provide students with economic theory and hands-on activity. The hands-on activity will put the economic theory to practice in the form of how to start a small business.
b. Educational and Instructional Strategies: Program consists of 28 classroom hours and 28 hours of outside activity, for a total of 56 hours. Upon completion of the course students have a complete business plan with a financial statement. Last activity of the course consists of a loan officer from a financial institution critiquing the business plan with the student and providing constructive criticism. Community people representing business, industry, labor, and government participate in teaching the class. Text used--In Business magazine, selected Small Business Administration Bulletins, selected books on Small Business Management.
c. Content: Topics covered: Small Business Opportunities, Marketing Process, Legal Form of Business, Small Business Taxes, Small Business Insurance, Market Research, Selecting a Location, Merchandise Inventory and Cycle, Capital, Small Business Resources, Cash Flow, Business Records, Personnel Management, Advertising and Sales Promotions, and Loan Information.
d. Other Information:
 - 1) Faculty: Teachers undergo training program on entrepreneurship prior to teaching the topics (Semester in-service course and curriculum writing during the summer).

2) Results: Length of Time - N/A
 Number Trained - N/A
 Success - N/A

3) Cost/Benefits: Jointly funded by Business and Education
 Coordinating Council, Madison Rotary
 Foundation, Wisconsin Department of Public
 Instruction, and Bureau of Vocational
 Education.

Budget: Year One -- \$36,000
 Year Two -- \$22,400
 Year Three- \$ 5,000

MODEL PROGRAM INFORMATION

MODEL 9

1. Program Name/Title: Entrepreneurship Preparation for Vocational Education Programs in 22 Comprehensive High Schools (1978)
2. Location: Montgomery County, Maryland
3. Level: a. Stage: Application
b. Target Group: Secondary (Grades 11 and 12)
4. Affiliation/Collaboration: Public School System, Montgomery County, Maryland; Construction Trade Foundation; Auto Foundation and Retail Trade Foundation
5. Program: a. Basic Training Objectives: N/A
b. Educational and Instructional Strategies: Infused into vocational education program. 1-3 periods (2 3/5 hours each) weekly. Used no materials that are specifically on entrepreneurship education. Used competency-based educational materials with some self-developed modifications. The programs include a career day with speakers and business people present.
c. Content: Entrepreneurial concepts infused into existing vocational programs in the area of marketing and distributive education.
d. Other Information:
1) Faculty: Vocational education background. Worked construction in high school and college. There are 20 teachers in construction programs, 4 teachers in auto programs. Also used assistance from bankers, lawyers and insurance people for students starting new businesses.
2) Results: Length of Time - Proposed in 1974 - still on-going
Number Trained - 4,000 since started, 450 students per year enrolled
Success - Most of the students in the auto program get jobs in that area. In the construction program, 50% continue schooling; 35% are employed; 15% go into nonrelated areas or the military. Some from both programs start businesses right away but it is difficult in these hard economic times.

3) Cost/Benefits: Funding was received through loans from community banks.

4) Replicability: Nine other counties as well as other states and Africa used the model and modified it.

6. Evaluation: Used state evaluation forms. Evaluation done within a three-year period regularly. Teacher program also evaluated.

MODEL 10

1. Program Name/Title: Junior Achievement (1919)
2. Location: Stamford, Connecticut
3. Level: a. Stage: Application
b. Target Group: Secondary
4. Affiliation/Collaboration: Local Business Community
5. Program: a. Basic Training Objectives: To provide practical and realistic education and experience in the private enterprise economic system.
- b. Educational and Instructional Strategies: Students are supervised by adult volunteers from the local business community. 20-25 students are formed to organize an enterprise; meet one night per week for two hours.
- c. Content: Principles of the free enterprise and economic system.
- d. Other Information
 - 1) Faculty - local businessmen
 - 2) Results: Length of Time - 1919
Number Trained: N/A
Success: Membership is well over 200,000 and growing, with a budget of almost \$2M. Testimony to the value of JA comes from thousands of former JA participants
 - 3) Cost/Benefits: Students raised their own funds for their projects; fund-raising campaigns are initiated
 - 4) Replicability: 250 JA operating areas in all 50 states and has affiliates in 16 foreign countries

6. Evaluation: N/A

MODEL PROGRAM INFORMATION

MODEL 11

1. Program Name/Title: The Hawaii Entrepreneurship Training and Development Institute (HETADI)
2. Location: Honolulu, Hawaii
3. Level: a. Stage: Venture
b. Target Group: Postsecondary and Adult
4. Affiliation/Collaboration: Hawaii Entrepreneurship Training and Development Institute; established by the private business community and former staff members of the refocused U.S. State Department International Entrepreneurship Development Program, East-West Center in Honolulu, nonprofit educational and scientific corporation
5. Program: a. Basic Training Objectives: Achievement of both business and life goals
b. Educational and Instructional Strategies: 6PM-9PM evenings and 8AM-4PM Saturdays for 2-3 months; or 3-week residential, every day for 21 days; "how-to" and "hands-on" approach requirement; business plan (surrogate for equity and capital litmus test). Text used - The Entrepreneur's Handbooks and Practical Guide to Preparing Your Business Plan.
c. Content: 3 elements--recruitment and selection, training workshop, follow-up consulting; CETA contractor, 200-300 hours; training workshop program includes role models, business knowledge, business skills, character development, and business planning and management. Follow-up consulting consists of a 7-month period, every two weeks, consulting, brokering the business plan to bankers or financiers, negotiating leases with landlords, finding key suppliers and pricing for clients, introducing clients to key business leaders in industry, establishing record/bookkeeping systems, monitoring sales, reviewing management styles and decisions, and updating/changing business plans with new circumstances
d. Other Information:
1) Faculty: Practitioners not academicians; applied and experimental teaching--not theoretical; teachers must operate their own businesses or have previously owned a business

- 2) Results: Length of Time--4 years, 1977-82
Number Trained--2,000 in 4-year period
Success: 66% of trainees started businesses
after completion of training program; 52%
continued in business 2-4 years later
- 3) Cost/Benefits: 1,978 jobs created at a cost to the
government of \$1,200 per job
- 4) Replicability: Extremely adaptable, implemented in 5
different countries: USA Mainland,
Indianapolis; New Zealand; Swaziland,
Africa; Guam; and Saipan. Guidelines for
replication include: HETADI personnel or
training of trainers, program for transfer
of methods and materials, reproduction
rights available.

MODEL 12

1. Program Name/Title: Small Business College (1980)
2. Location: Stark Technical College, 6200 Frank Rd., N. Canton, Ohio 44720
3. Level: a. Stage: Venture
b. Target Group: Postsecondary/Adult
4. Affiliation/Collaboration: State of Ohio Post-Secondary College System; nonsubsidized, self-supporting effort to serve needs of community
5. Program:
 - a. Basic Training Objectives: The concept behind most of the Small Business College courses is to give small business owners a taste of skills and varied disciplines that can aid in maximizing their profits and growth.
 - b. Educational and Instructional Strategies: Professional "Real World" experience. Action oriented. Emphasis on "hands-on" experience. Ability to communicate effectively. Continued growth in field of interest. High level of dedication.
 - c. Content: The focus was centered on start-up skills that can be learned, such as preparing a business plan, sources of financing, analyzing business locations, and instituting credit policies.
 - d. Other Information:
 - 1) Faculty: Professional Businessmen
 - 2) Results: Length of Time - Since 1980, we have offered at least 5 to 7 courses each 12 weeks. Prior planning and needs assessment took four months.
Number Trained - 1100 students
Success - In 1980, this Small Business Program became the recipient of a grant from the American Association of Community and Junior Colleges for participation in the National Small Business Training Network and later, after comprehensive field testing, was selected as one of the nine exemplary projects within the Two-Year College Business Training movement.

3) Cost/Benefits: Small business owners who have no formal business training but who are looking to improve their business skills can choose from a wide variety of courses at a low fee of \$50 for most mini courses. Text materials for many courses are furnished at no additional cost by the SBA.

4) Replicability: Numerous colleges throughout the country have inquired about this concept and are implementing similar programs.

6. Evaluation: Each class is monitored; students have a chance to evaluate the instructor, course content and general data. Confidential direct business counseling is provided to individuals and companies, emphasizing recognized practices for effective enterprise development. Close contact is maintained with clients over a sufficient time to evaluate results and progress.

3. Level: a. Stage: Assessment
b. Target Group: Postsecondary and Adult
4. Affiliation/Collaboration: Minnesota Department of Education - Vocational Education Program
5. Program: a. Basic Training Objectives: Upgrading skills of small business owners; emphasizes financial analysis and recordkeeping
b. Educational and Instructional Strategies: Freestanding. Text used was self-developed from the initial project in 1976.
c. Content: N/A
d. Other Information:
 - 1) Faculty: Must be licensed to teach, degree in Business Education or Distributive Education or other related degree. Minimum of 3 years of business experience. Prefer that they have been entrepreneurs.
 - 2) Results: Length of Time - Started in 1978
Number Trained - Averages 30 businesses per program; 550-625 businesses enrolled
Success: Have helped businesses to retain present employee jobs and to hire additional employees; for every \$1 invested in program, a return of \$12 is realized.
 - 3) Cost/Benefits: 75% from state funds, 25% from local funds
 - 4) Replicability: N/A
6. Evaluation: There is need and market for the program; more instructors are needed; need to increase private funding sources; need more cooperation from other state agencies

ENTREPRENEURSHIP EDUCATION
MODEL PROGRAM INFORMATION

MODEL 14

1. Program Name/Title: Educational Assistance Program for Retail Entrepreneurs (1983)
2. Location: Center for Apparel Marketing and Merchandising (CAMM), Oklahoma State University
3. Level: a. Stage: Assessment
b. Target Group: Adult
4. Affiliation/Collaboration: University Extension
5. Program: a. Basic Training Objectives: To provide workshops, consultation teams and learning materials to assist retailers in improving efficiency related to merchandise management, financial performance, marketing strategies, manufacturer/retailer relations, and promoting and selling. Educational assistance for adults in the workplace--apparel store retailers who have been in business 5 years or less and have annual sales volume under \$500,000.
- b. Educational and Instructional Strategies: Workbook with key concept, examples, miniproblems and small group discussions. One-day workshop (6 hours), CAMM workshop leader presents key concepts and examples, workshop participants complete miniproblems and terminal worksheets, 4 intermittent small group discussions are moderated by experienced Retail Apparel Guides (RAG). Evaluation period at conclusion of workshop. One-day individual consultation session follows the next day.
- c. Content: Workshop I - 4 units on inventory control and merchandise analysis, 3 units on seasonal merchandise plans and market open-to-buy budget. Workshop II - 3 units on sales promotion budget and use of media, 3 units on increasing sales and profits.
- d. Other Information:
 - 1) Faculty: Dr. Kathryn M. Greenwood, CAMM Director and Deborah P. Stickland, CAMM Program Coordinator
 - 2) Results: Length of Time: 1978 and still on-going
Number Trained: Over 1,500 retailers have attended one or more workshops

Success: Individual workshop evaluations extremely high in regard to achievement of specific objectives for each unit in workbook. Now currently conducted in 12 locations across the country.

- 3) Cost/Benefits: Generates income to cover operating expenses
- 4) Replicability: Completely packaged for use in apparel markets or for other groups of retailers as requested.

6. Evaluation: Five-year assessment study near completion

APPENDIX C

OVERVIEW OF MINORITY BUSINESS DEVELOPMENT CENTERS
AND THEIR ROLE IN ENTERPRISE DEVELOPMENT

MBDA REGIONAL OFFICE DIRECTORY

MBDC DIRECTORY

MINORITY BUSINESS DEVELOPMENT CENTERS (MBDCs)

The Minority Business Development Agency (MBDA) of the Department of Commerce has established the following mission statement:

Increase the opportunity for racial and ethnic minorities to participate in the free enterprise system through the formation and development of competitive minority-owned and managed firms. This will be achieved by emphasis on private sector involvement and entrepreneurial self-reliance, rather than government dependence.

In order to carry out its mission, the MBDA has established the concept of the Minority Business Development Center (MBDC) as the primary delivery system for assisting minority firms.

MBDCs have been established in 100 Standard Metropolitan Statistical Areas (SMSAs) throughout the United States. A complete listing of MBDCs is included later in this Appendix.) The MBDC delivery system has three specific goals:

- ° To encourage and promote business formations by minorities
- ° To promote increased growth rates among new and existing minority businesses
- ° To reduce failure rates of minority businesses by assisting them in planning and implementing sound, competitive strategies .

To meet these specific goals, each MBDC performs three main functions:

- ° Develops and maintains an inventory of existing minority businesses and prospective entrepreneurs
- ° Provides a brokering service that will foster and promote new business ownership, business expansions, marketing opportunities, and new capital sources
- ° Provides management and technical assistance to qualified minority firms

MBDCs provide a variety of services of potential value to vocational educators interested in entrepreneurship education and training:

1. Management and technical assistance (M&TA) to qualified minority firms and individuals (as referenced in Executive Order 11625) seeking assistance from the MBDC. Priority assistance is targeted to the following groups:

- ° Businesses with high employment potential
- ° Businesses with high technology potential
- ° Businesses with high export potential/capability
- ° Graduating 8(a) firms
- ° Businesses owned by minority women

M&TA assistance consists of two (2) types:

- ° General counseling and referral services at no charge
- ° Specific business assistance on a fee-for-services basis

Specific M&TA business assistance is geared to help start new businesses and to increase growth rates and help reduce the failure rate among minority business firms. This overall assistance improves gross receipts, profits, and the net worth of assisted firms. When a client requires services beyond the MBDC's technical and financial capabilities, the MBDC utilizes Specialized Consultant Services (SCS).

2. Identification and promotion of opportunities for minority business firms:

- ° Marketing Opportunities
- ° Capital Opportunities
- ° Business Ownership Opportunities

3. Advice and guidance to minority individuals and firms on how best to avail themselves of these opportunities.

4. Development and maintenance of inventory of:

- ° Minority vendor firms which are capable of selling their goods and services to the public and private sectors. The MBDC accomplishes this by making new entries and by verifying and updating the MBDA national computerized listing known as the PROFILE System
- ° Qualified minority individuals and firms with the potential to start and expand businesses
- ° Traditional and non-traditional sources of debt and equity capital
- ° Local (public and private sector) M&TA resources
- ° Who's Who in Minority Business Development. The Directory includes local public and private sector policy makers and resources, minority business community leaders and others

interested in furthering the participation of minority business. The Directory is updated and verified on a quarterly basis and submitted directly to the MBDA Clearinghouse in Washington, DC, for inclusion in the National Who's Who Information System

5. Brokering services for:

- Minority individuals/firms with the potential to start, and/or expand businesses, or prevent business failures
- Minority vendor firms with public and/or private sector procurement opportunities, both foreign and domestic
- Minority firms seeking or requiring capital resources

The brokering function consists of matching firms and prospective minority entrepreneurs with business ownership, market and capital opportunities.

6. Promotion and utilization of the services and resources of other MBDA programs such as:

- National Minority Supplier Development Council (NMSDC) - which provides a brokering service matching MBEs with market opportunities identified by the NMSDC
- Minority Business Opportunity Committees (MBOCs) - which provide access to local Federal market, capital, and management opportunities
- State and Local Government Programs - which identify market and other business opportunities with their respective governmental entities
- Technology Commercialization Centers (TCCs) - which assist MBDC clients that require marketing, financial or development technology assistance
- Minority Export Development Centers (MEDCs) - which can assist MBDC client firms (capable of exporting) to secure export contracts and other exporting opportunities

MBDCs could be a valuable source of general economic, financial, and market information as well as specific information and assistance for the development and growth of entrepreneurial ventures. Vocational educators should take advantage of the services offered by MBDCs and look for opportunities to work together on programs of mutual benefit.

MBDA: WHAT IT IS AND WHAT IT DOES

5

WHAT IS THE MINORITY BUSINESS DEVELOPMENT AGENCY?

It is the U.S. Government agency created to develop programs to assist minority entrepreneurs.

WHEN WAS THE AGENCY STARTED?

MBDA was established by Executive Order 11625 in 1969.

WHAT TYPES OF ASSISTANCE DOES MBDA PROVIDE?

MBDA awards grants and cooperative agreements to state and local government agencies, profit and non-profit business development organizations, and trade associations to provide management, marketing, financial, and technical assistance to minority entrepreneurs.

DOES MBDA OR ITS FUNDED BUSINESS DEVELOPMENT ORGANIZATIONS CHARGE FEES FOR SERVICES?

Nominal fees are charged. In some cases, waivers of fees are granted.

WHAT ARE THE PROGRAM DIVISIONS OF MBDA?

MBDA has an Office of Resource Development, establishing public and private resources for minority-owned enterprises; an Office of Enterprise Development, responsible for the delivery of management and technical assistance to minority businesses and increasing their participation in growth industries; and an Office of Advocacy, Research and Information, responsible for formulating and advocating federal policies for minority business development, conducting research to understand the problems and characteristics of minority firms, and collecting and disseminating information beneficial to minority business development.

WHAT IS THE DEFINITION OF "MINORITY BUSINESS ENTERPRISE"

A minority business enterprise is one that is owned or controlled by one or more socially or economically disadvantaged persons. Such disadvantage may arise from cultural, racial, chronic economic circumstances, background or other similar cause. Such persons include Blacks, Hispanics, Asian Americans, American Indians, Eskimos, and Aleuts.

ARE WOMEN ELIGIBLE FOR MBDA ASSISTANCE?

Minority women are eligible for assistance. Non-minority women are eligible on an individual basis if they are found to be socially or economically disadvantaged. But as a group, non-minority women are not eligible for MBDA assistance.

DOES MBDA REQUIRE CLIENTS TO RECEIVE CERTIFICATION AS MINORITIES BEFORE RECEIVING ASSISTANCE?

No, MBDA does not require certification of minority entrepreneurs.

DOES MBDA HAVE REGIONAL AND DISTRICT OFFICES?

Yes, MBDA has six regional offices: Atlanta, Chicago, Dallas, New York, San Francisco, and Washington, D.C. The agency also has district offices: Boston, Denver, Miami, Philadelphia, Kansas City, Mo., and Los Angeles.

HOW MANY MINORITY-OWNED BUSINESSES ARE THERE?

There were 561,395 firms with gross sales of \$26.3 billion, according to the Census Bureau's 1977 Survey of Minority-Owned Business Enterprises. This was an increase of 31 percent in number of firms and 69 percent in gross receipts over 1972. Black-owned firms accounted for 41 percent of all minority-owned firms and 33 percent of gross receipts. Firms owned by persons of Spanish origin accounted for 39 percent of both number of firms and gross receipts while Asian Americans, American Indians, and other minorities accounted for 20 percent of the minority-owned firms and 28 percent of their gross receipts.

WHERE IS THE HEAVIEST CONCENTRATION OF MINORITY-OWNED FIRMS?

Over 41 percent of all minority-owned firms in the United States were located in California, Texas, New York, Florida, and Hawaii and accounted for over 47 percent of all gross sales, according to the Census Bureau.

BUSINESS ASSISTANCE

6

WHAT ARE MBDA'S PROGRAMS?

MBDA has the following programs: Minority Business Development Center Program, Export Development Program, Technology Commercialization Centers Program, American Indian Program, Rural Assistance Program, Acquisitions Assistance Program, Franchising Assistance Program, State and Local Government Program, Volunteer Management Support Program, Research Information Program, Minority Trade Association Program, National Minority Supplier Development Council Program, Advocacy Assistance Program, Interagency Council for Minority Business Enterprise Program, Minority Business Opportunity Committee Program, and Information Clearinghouse Program.

MINORITY BUSINESS DEVELOPMENT CENTER PROGRAM

HOW DOES THE MINORITY BUSINESS DEVELOPMENT CENTER PROGRAM WORK?

MBDA funds 100 Minority Business Development Centers, located in areas across the country with the largest minority populations, to provide management, marketing and technical assistance to increase business opportunities for minority entrepreneurs in the United States and foreign markets. Each center—called an MBDC—increases the formation of minority-owned firms, expands existing firms and minimizes the rate of business failures. The MBDC provides vital accounting, administration, business planning, construction, and marketing information. The sources of the information are major U.S. corporations, trade associations, export management companies, and federal, state and local government agencies. The MBDC also identifies minority-owned firms for contract and subcontract opportunities with federal, state, and local government agencies and the private sector.

WHO OPERATES THE MBDC?

The MBDC is operated by private accounting firms, business development consulting firms, educational institutions, and state and local government agencies.

WHERE ARE THE MBDC LOCATIONS?

MBDCs are located in 37 states and the District of Columbia: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, and Wisconsin.

WHERE DO YOU CONTACT THE NEAREST MBDC?

Contact the MBDA regional office nearest you. Atlanta (404) 881-4091, Chicago (312) 353-0182, Dallas (214) 767-8001, New York (212) 264-3262, San Francisco (415) 556-6733, Washington (202) 634-7897.

DO YOU NEED TO HAVE AN ESTABLISHED BUSINESS TO RECEIVE MBDC ASSISTANCE?

No. The MBDC assists potential as well as existing entrepreneurs.

MUST FIRMS MEET A SPECIFIC SIZE OR DOLLAR VOLUME TO RECEIVE ASSISTANCE?

No.

EXPORT DEVELOPMENT PROGRAM

DOES MBDA PROVIDE INTERNATIONAL TRADE ASSISTANCE?

Yes, MBDA has established an Export Development Program to assist entrepreneurs in international business ventures.

HOW ARE ENTREPRENEURS ASSISTED?

MBDA has funded 15 organizations that provide export marketing plans, identify potential markets and trade leads, and technical assistance including short-term financing and shipping information. These organizations coordinate with the Small Business Administration, the International Trade Administration, the Export-Import Bank, export management companies, freight movers, and banking institutions to provide assistance.

WHERE DO YOU GO FOR ASSISTANCE?

The Export Development Consultants are: Latin American Trading Company, Atlanta, (404) 942-4668; SER-Jobs for Progress, Inc., Miami, (305) 649-7500; Caribbean Marketing Overseas, Santurce, Puerto Rico, (809) 728-4545; Alexander Grant & Co., Detroit, (313) 965-6320; Peter F. Koch & Associates, Wheeling, Ill., (312) 459-1100; Cavazos International, Inc., Houston, (713) 821-7610; International Business of New Orleans, (504) 241-4877; Development Associates, San Francisco, (415) 776-0120; Development Associates, Arlington, Va., (703) 979-0100; Universal Import & Export Corp., Dallas, (214) 871-0144; Watson, Rice & Co., Washington, D.C., (202) 628-0833; AWI Trading Co. & Consultants, New York, (212) 683-3930; Cardinal Management, Los Angeles, (213) 385-1335; Minority Export Development Consultant, San Diego State University Foundation, San Diego, (619) 286-5623; Trustee of University of Pennsylvania, Philadelphia Export Network, Wharton Research Center, Philadelphia, (215) 898-4189.

RURAL ASSISTANCE PROGRAM

DOES MBDA PROVIDE ASSISTANCE TO FIRMS AND ENTREPRENEURS IN RURAL AREAS?

Yes, MBDA has a Rural Assistance Program for management and technical assistance to minority entrepreneurs located in areas not served by the Minority Business Development Centers.

WHAT AREAS ARE COVERED UNDER THIS PROGRAM?

Alabama, Georgia, Mississippi, North and South Carolina, Louisiana, New Mexico, Texas, Arkansas, and California.

WHERE DO YOU GO FOR ASSISTANCE?

The Rural Assistance Program is run by the following organizations: Georgia Tech Research Institute, (404) 894-3833, covering Alabama, Georgia, Mississippi, North and South Carolina; the National Council of La Raza, (202) 293-4680, covering Louisiana, New Mexico, Texas, and Arkansas; and Development Associates, (415) 776-0120, covering California.

TECHNOLOGY COMMERCIALIZATION CENTER PROGRAM

DOES MBDA OFFER ASSISTANCE TO INVENTORS TRYING TO GET A NEW PRODUCT OR SERVICE ON THE MARKET?

Yes, MBDA has a Technology Commercialization Center Program providing marketing and technical assistance to minority inventors, engineers, scientists or other entrepreneurs with new products or services.

WHAT FORM OF ASSISTANCE IS PROVIDED?

The program offers assistance in the development of feasibility studies, market and product testing, location of products or services patented by private and government organizations that have commercial potential, and the identification of financial resources and licensing arrangements with U.S. and foreign companies. Clients also gain access to new technologies developed through the Federal Laboratory Consortium and university engineering schools.

WHERE DO YOU GO FOR ASSISTANCE?

MBDA funds 10 Technology Commercialization Centers. They are: New England Technology Commercialization Center, Hartford, Conn., (203) 527-1301; Center for Invention and Industrial Development, Baltimore, Md., and Washington, D.C., (301) 542-4850 or (202) 727-6609; Middle Atlantic Technology Center, Raleigh, N.C., (919) 781-9081; Technology Utilization and Commercialization Center, Atlanta, (404) 894-3833; Industrial Technology Research and Development Foundation, Inc., Durant, Okla., (405) 924-5094; Center for Arid and Tropical New Crop Applied Science and Technology, Tempe, Ariz., (602) 965-1260; Pacific Northwest Technology Center, Portland, Ore., (503) 226-4985; Technology Research and Commercialization, Inc., Los Angeles, (213) 417-4923; Control Data Technology Center, Dallas, (214) 385-5577; IITRI Technology Commercialization Center, Chicago, (312) 567-4664.

ACQUISITIONS ASSISTANCE PROGRAM

DOES MBDA ASSIST MINORITY ENTREPRENEURS IN BUSINESS ACQUISITION OR MERGER TRANSACTIONS?

Yes, MBDA has an Acquisitions Assistance Program to help minority entrepreneurs to own and control medium and large businesses in areas such as manufacturing, high-technology industries, telecommunications, energy and transportation.

HOW DO YOU QUALIFY?

Clients must demonstrate the ability to invest 5 percent in cash or tangible assets of the aggregate cost of the purchase price of the business to be acquired. Also, clients should be knowledgeable about the business and industry of the proposed acquisition. Businesses to be acquired must show steady profits and net assets valued in excess of \$1 million or gross revenue of \$3 million or more.

WHAT KIND OF ASSISTANCE IS PROVIDED?

Clients are assisted in negotiating the potential acquisition or merger. Clients are also consulted about the business, industry and financial conditions of the company to be acquired, and where financing might be obtained to complete the acquisition.

WHERE DO YOU GO FOR ASSISTANCE?

MBDA funds three private firms to provide acquisition assistance. They are: Duff and Phelps, Inc., Chicago, (312) 263-2610; Arthur Young & Co., Washington, D.C., (202) 828-7000, and Watson, Rice & Co., Washington, D.C., (202) 628-0833.

MINORITY TRADE ASSOCIATIONS PROGRAM

WHAT IS THE PURPOSE OF THIS PROGRAM?

Trade associations are among the most important organizations representing the business community. Under this program, MBDA funds nine minority trade associations. They are responsible for generating new business opportunities and advocating minority business issues at the federal, state and local government levels.

WHICH TRADE ASSOCIATIONS ARE FUNDED BY MBDA?

MBDA funds the following trade associations: National Association of Minority Certified Public Accounting Firms, American Association of Spanish-Speaking CPAs, Latin American Manufacturers Association, National Association of Minority Contractors, U.S. Hispanic Chamber of Commerce, American Association of Minority Enterprise Small Business Investment Companies, National Bar Association, National Insurance Association, and American Savings and Loan League.

FRANCHISING ASSISTANCE PROGRAM

IS MBDA CONCERNED ABOUT HELPING MINORITY ENTREPRENEURS ACQUIRE FRANCHISES?

Yes, MBDA recognizes the full potential of franchises to the minority entrepreneur. The agency has established a new program to identify franchise opportunities.

WHERE DO YOU GET HELP?

Contact MBDA's Office of Resource Development, (202) 377-5770. The Minority Business Development Centers also are actively engaged in identifying franchise opportunities.

PRIVATE SECTOR RESOURCE PROGRAM

DOES MBDA ENCOURAGE THE PRIVATE SECTOR TO HELP GENERATE OPPORTUNITIES FOR MINORITY-OWNED BUSINESSES?

Yes, MBDA believes minority business development must have strong support from the private sector. The agency works closely with the U.S. Chamber of Commerce, trade associations, and local government officials, and the heads of Fortune 1,000 corporations to identify opportunities for minority entrepreneurs. The agency funds the National Minority Supplier Development Council which has several hundred corporate members who purchase the products and services of minority businesses, and support the federal programs to expand the minority business sector. Corporate members of the council have established a \$5 billion goal in purchases from minority-owned firms in 1983.

WHERE DO YOU GET ASSISTANCE?

Contact MBDA's Private Sector Programs Division, (202) 377-3237. The National Minority Supplier Development Council's address is: 1412 Broadway, 11th Floor, New York, N.Y. 10018, (212) 944-2430.

HOW DOES MBDA WORK WITH OTHER FEDERAL, STATE AND LOCAL GOVERNMENT AGENCIES TO DEVELOP PROGRAMS AND OPPORTUNITIES FOR MINORITY ENTREPRENEURS?

MBDA has established interagency agreements with 27 federal departments and agencies to increase opportunities for minority-owned businesses. For example, the Federal Communications Commission has agreed to help minority entrepreneurs acquire radio and television stations and other telecommunication

properties. ACTION, the national volunteer agency, has agreed to provide volunteer managers to work with the Minority Business Development Centers in assisting minority entrepreneurs. And the Small Business Administration has agreed to work with MBDA to provide greater assistance to minority firms entering and leaving the 8 (a) business development program.

ADVOCACY PROGRAM

HOW DOES THE ADVOCACY PROGRAM ASSIST MINORITY BUSINESSES?

Established in January 1983, the Advocacy Division monitors and advises MBDA officials of actions by Congress, federal, state and local agencies, and private institutions that have significant impact on minority businesses. The Division focuses on major topic areas such as taxes, capital formation, and increased federal grant and procurement opportunities for minority firms. The Division also disseminates useful information on these subjects to the Minority Business Development Centers, other MBDA-funded organizations and the public.

INFORMATION CLEARINGHOUSE

HOW DOES MBDA DISSEMINATE INFORMATION?

MBDA disseminates information through a national Information Clearinghouse in Washington and through the agency's Minority Business Development Centers. The clearinghouse is responsible for collecting information on minority businesses. The information is used to identify new business opportunities and contacts for joint ventures. The clearinghouse also disseminates MBDA publications.

WHERE IS THE INFORMATION CLEARINGHOUSE LOCATED?

It is located at MBDA headquarters in the Department of Commerce:

Information Clearinghouse
Minority Business Development Agency
U.S. Department of Commerce
Washington, D.C. 20230
202/377-2648

WHERE CAN YOU OBTAIN A LISTING OF MINORITY-OWNED BUSINESSES?

There are a number of published minority business directories available to the public. Those that have been identified by the Information Clearinghouse are available in its Directory of Minority Business Enterprise Directories. Listings of minority-owned businesses also can be obtained from MBDA through its PROFILE Minority Business Locator Service, a national computerized data system designed to match minority firms with business opportunities. The system is not used to supply mailing lists for commercial purposes. A PROFILE search may be obtained from the nearest Minority Business Development Center. The Information Clearinghouse may be contacted for additional information.

HOW CAN YOU GET ON THE PROFILE SYSTEM?

Contact the Information Clearinghouse or nearest Minority Business Development Center for an application form to list your firm.

MINORITY BUSINESS DEVELOPMENT AGENCY

U. S. DEPARTMENT OF COMMERCE

PREFACE

Established in the U.S. Department of Commerce by Executive Order 11458 in 1969, and expanded by Executive Order 11625 in 1971, the Minority Business Development Agency (MBDA) promotes and encourages minority business ownership. Originally called the Office of Minority Business Enterprise, it was renamed in 1979 and redirected in support of larger minority firms in growth industries.

MBDA coordinates and monitors minority business support in the public and private sectors, and sponsors a national network of Minority Business Development Centers (MBDCs) offering management counseling to minority entrepreneurs. The centers receive operating funds from MBDA and report client services to MBDA.

Business Development Center counselors advise minority owners in areas such as marketing, accounting, personnel management, and business training. They help owners to secure government and private procurement contracts, and to assemble financial packages for submission to lenders. The Minority Business Development Agency itself does not make loans.

Business services are offered for nominal fees to current minority business operators and those considering starting a business.

Executive Order 11625 defines a minority business enterprise as follows:

"Minority business enterprise" means a business enterprise that is owned or controlled by one or more socially or economically disadvantaged persons. Such disadvantage may arise from cultural, racial, chronic economic circumstances or background or other similar cause. Such persons include, but are not limited to, Negroes, Puerto Ricans, Spanish-speaking Americans, American Indians, Eskimos, and Aleuts.

APPENDIX D

EXCERPTS FROM: ENTREPRENEURSHIP IN VOC ED: A
GUIDE FOR PROGRAM PLANNING
(DAVIS AND ZELINKO, 1982)

INSTRUCTIONAL TECHNIQUES AND STRATEGIES

Section I

INTRODUCTION

Purpose of the Guide

The purpose of this guide is to assist program planners and curriculum developers in implementing entrepreneurship training by providing an action planning *process* for use in selecting entrepreneurship materials that are appropriate for the population served by their educational agencies. The guide will assist users in the following activities:

- Becoming aware of a variety of available curriculum materials
- Selecting materials that are appropriate for a given program
- Identifying essential elements of an entrepreneurship education program
- Becoming aware of alternative approaches for implementing programs
- Developing a plan for implementing programs
- Performing effectively as a resource person for developing programs

Entrepreneurship: A Brief Perspective

The word “entrepreneur” brings to mind that bold, daring individual who is willing to take a chance with an idea—the person who is starting a business. Going into business for oneself is a large part of the American dream. However appealing, the future of new businesses is never predictable. The potential for success certainly exists: 97 percent of American businesses are classified as small businesses by the U.S. Small Business Administration (SBA), and one out of eight Americans is self-employed (U.S. Department of Commerce 1975). Small businesses produce 44 percent of the United States Gross National Product (GNP). Nevertheless, small business failures are common, since approximately 400,000 businesses are dissolved each year. According to the SBA, almost half of all small businesses fail within the first two years of operation. With 56 percent of all employees in this country working for small businesses, the economic impact of their success or failure is felt in every segment of the economy.

The largest single cause of business failure is poor management. Entrepreneurship training, therefore, has become an important part of a successful educational program. Vocational education, as a part of a program of preparing students for employment, is beginning to accept the challenge of providing entrepreneurship training. Entrepreneurship curriculum development at the national, state, and local levels is evidence of the growing commitment to entrepreneurship education by vocational educators.

In order to understand the current scene, however, it is useful to understand something of the background of entrepreneurship. In the early 1900s, the United States was continuing its industrial development. Because industries grew faster than the number of trained workers, a shortage of these workers resulted. The federal government responded by appropriating funds to states for vocational education. The intent was to meet the immediate national need for workers. Vocational education responded to the need of the time.

Today's instructional programs continue that mission. Vocational education is again responding to the needs of the time. The success of small businesses is critical to continued economic growth in America. Vocational education must, therefore, continue to provide expanded educational services to potential entrepreneurs.

Not many years ago, the National Education and Training Task Force for Minority Business Enterprise (1974) concluded that entrepreneurship as a career opportunity is ignored by the educational system. In order to counter this situation, the task force recommended the following actions at various levels:

- Establish clear direction and leadership at the national level. No single agency has ultimate responsibility for (minority) business enterprise education and training development.
- Establish coordinators at the state and local levels. The vast network of resources must be linked and coordinated.
- Establish delivery systems at the local level.
- Develop improved curriculum and teaching resources.
- Develop career awareness programs.
- Establish work experience programs for potential (minority) entrepreneurs.

Vocational programs must be expanded to address entrepreneurship in three dimensions:

1. *Exposure* to make students aware of entrepreneurship as a career option
2. *Exploration* to provide a basic understanding of the essential concepts of entrepreneurship
3. *Preparation* to assist persons who enter and operate a small business

Organizing for Entrepreneurship Training

The potential for extended entrepreneurship training is limited only by the creativity of program planners. The primary responsibility of vocational educators, in this regard, is to provide students with the wherewithal to earn a living as an employer or employee. This responsibility can be addressed in a number of ways. The first task, however, is to identify the environment within the vocational setting that will best meet the needs of the students who are being served. In the opinion of the authors, all students—secondary, postsecondary, and adult—should be exposed to entrepreneurship either as an option within a possible career choice or by actual implementation of a more formal process. There are a number of possible combinations that exist for entrepreneurship training at all school levels and in all settings where vocational, technical, and adult education occur. Three examples are suggested as follows:

- As a separate program in a high school
- As part of an existing occupational program
- As a part-time program for adults

As a Separate Program in a High School

Target populations

- Students who have gained technical skills in a craft or a trade by experience or training outside the traditional school curriculum, e.g., musicians, leatherworkers, painters, farmers, or students who grew up in a family business
- Students who have completed vocational or technical training but have not completed high school, e.g., typists, mechanics, carpenters, plumbers, chefs, and food service graduates

Instructional goals

- To develop an awareness of the opportunities of small business ownership
- To develop the planning skills needed to open a small business

Delivery system options

- A special course taught as a marketing and distributive education elective
- A team-teaching situation with students rotating among minicourses in marketing, management, and business finance
- A semester-length minicourse offered as a senior seminar

As Part of an Existing Occupational Program

Target populations

- Students who have excelled in the vocational or technical education curriculum and who need additional challenges
- Students who have gained basic occupational skills and have decided to remain in a rural area with limited employment opportunities
- Students who may be interested in opening a small business in the future after working in the occupational area for some time

Instructional goals

- To explore career options in small business management
- To develop planning skills needed to open a small business

Delivery system options

- As part of a capstone program involving the removal of students from the traditional vocational education program for class periods throughout the year, e.g., three hours per week
- Individualized modules that can be utilized by students in a learning resource center
- Instructional content included as part of every occupational program within the facility, e.g., school stores and sales projects in any vocational program

Instructional goals

- To develop an awareness of the opportunities of small business ownership
- To develop the planning skills needed to open a small business

Delivery system options

- Full-time (six hours per day) classes for six to twelve weeks
- Three-hour blocks for twelve to twenty-four weeks
- Seminars offered at major employment centers, such as shopping malls, utilizing any of the above options

As a Part-Time Program for Adults*Target populations*

- Individuals who already are operating their own small business
- Individuals employed full-time but who are interested in becoming self-employed
- Individuals who are currently managing small businesses but who wish to upgrade their skills
- Organizations of small business people who are interested in upgrading their entrepreneurship skills
- Craftspeople, artists, and others who operate a small business as a sideline

Instructional goals

- To develop planning skills needed to open a small business
- To develop skills necessary to operate and maintain a business after it has been established
- To develop problem-solving skills

Delivery system options

- Seminars offered at various times during the day or evening on specific topics relating to entrepreneurship
- Self-paced modules that individuals might complete at home and then meet with instructors to review and evaluate progress
- Seminars cosponsored by groups interested in supporting small businesses, e.g., Small Business Administration (SBA), Active Corps of Executives (ACE), and Senior Corps of Retired Executives (SCORE)

Section II

STEPS IN DEVELOPING ENTREPRENEURSHIP TRAINING

An Overview of Five Essential Steps

Once the determination has been made that entrepreneurship training is appropriate for a local education agency, the task for program planners is to design and implement the program. Implementing entrepreneurship training, as any other planned change in education, includes:

Step 1: Assessing the Status of Your Situation

Step 2: Defining the Problem

Step 3: Selecting a Solution

Step 4: Implementing the Solution

Step 5: Monitoring the Solution

This section of the guidebook briefly discusses each step in this process.

Step 1: Assessing the Status of Your Situation

During this stage, planners should take a look at “what is.” They should, therefore, examine the following questions:

- What populations are to be served?
- What current activities relating to entrepreneurship are being conducted?
- What are the instructional delivery formats?
- What resources are available?

To determine “what is,” program planners also should try to complete one or more of the following activities:

- Discuss the potential for entrepreneurship training with local vocational educators; follow this with meetings with other school staff and/or citizen groups.
- Review policy statements and administrative guidelines relating to new or innovative programs to determine procedures for implementation.
- Conduct student surveys to determine the specific characteristics of various target populations.

Data should be analyzed to provide information that will assist the planner in identifying a *structure* for entrepreneurship training.

Step 2: Defining the Problem

Based on the assessment in Step 1, the planner should complete Worksheet 1. This will allow the planner to identify the dimensions or parameters in which entrepreneurship training must function. This stage should result in formulating tentative program goals and in identifying target populations, the levels of instruction, and the possible schedule.

Step 3: Selecting a Solution

Worksheet 1 at the end of this section is intended to assist the planner in defining the dimensions of entrepreneurship training. Once these have been identified, the planner should review the curriculum resource in this light. The final selection of resources will be based on a combination of strengths and weaknesses that appear to provide the greatest potential for success in instruction.

To select the appropriate curriculum, the planner should identify the relative value of a number of different product features, e.g., reading levels, the availability of audiovisuals, and program goals and objectives of the local educational agency. Additional data should be considered in setting curriculum resource priorities. Program planners should develop their own data sources based on objectives and on the availability of data. The four summaries in the next section are designed to provide comparative data on the resources that are described in this guide. Since more information is included than would be utilized in a typical review, the planner should select the criteria that are most relevant to the local situation. Worksheet 2 is designed to assist in this process.

Once a decision is made about which criteria will be utilized, the planner should organize the data in such a way that a comparison can be made of the various curriculum options. One method of making this comparison is by means of a *priority matrix*. Under this system, relative values are assigned to each criterion. Decisions then are based on the cumulative scores of each product, as shown in the following sample.

CURRICULUM PRIORITY MATRIX
(Sample)

Curriculum Resources	Priority Criteria:					Curricular priority index (total scores)	Rank priority order
	Reading level	Audiovisuals	Individualized instruction	Special populations and materials	Appropriate depth of instruction (weight = 2)		
Resource X	1*	1	3	3	$3 \times 2 = 6$	14	1
Resource Y	2	0	1	0	$3 \times 2 = 6$	9	2
Resource Z	0	2	2	3	$1 \times 2 = 2$	9	2

*General ranking of cell scores:

0 — inappropriate for proposed training program
1 — low priority

2 — moderate priority
3 — high priority

By reviewing each criterion separately, assigning a point value to each criterion, and summing the points, the planner can compare the resources across a series of criteria. The relative value of the criteria can be adjusted by weight (as shown in the criterion labeled Appropriate Depth of Instruction). The planner then is in a position to determine the curriculum with the best combination of features that are deemed important by the local education agency. (See Worksheet 2.)

Step 4: Implementing the Solution

Based on Worksheets 1 and 2, the planner should be able to identify the target population, the program structure, the program objectives, and the needed curriculum resources. The new training program then must be equipped, scheduled, budgeted, staffed, and publicized. Strategies will vary with local educational agencies; however, successful implementation will depend on the relevant information constantly being provided to all persons involved in the program. A structured description of the proposed training program often is useful. In order to organize the proposed training program, the reader is urged to utilize Worksheet 3.

Step 5: Monitoring the Solution

Every aspect of the new training program must be continually reviewed in order to evaluate its effectiveness. Based on these reviews, adjustments should be made to accommodate economic or technological changes. An excellent tool for monitoring any vocational program is the use of an advisory committee. Such a committee could be particularly useful to this type of training program. A broad representation of educators, government personnel (e.g., from the U.S. Small Business Administration), current practitioners, and program graduates would provide a great deal of assistance in monitoring the program.

In planning entrepreneurship programs, the following worksheets can be used to accomplish the preceding steps. These worksheets include the following:

- Worksheet 1: A Guide to Designing Entrepreneurship Training (Step 2)
- Worksheet 2: A Guide to Assessing Curriculum Priorities (Step 3)
- Worksheet 3: A Guide to Implementing Entrepreneurship Training (Step 4)

APPENDIX E

ASSISTANCE AGENCIES

ASSISTANCE AGENCIES

This section is included to assist program planners and developers to locate organizations which are currently serving potential and existing entrepreneurs either directly or indirectly. It is not intended to be a comprehensive listing of all available sources of entrepreneurial assistance, but rather is representative of the many types of agencies involved in this effort.

To avoid the duplication of resources, it is advisable for existing organizations to collaborate in the area of entrepreneurship education and enterprise development. This is particularly appropriate for vocational educators who already work closely with the private sector and federal/state government in a variety of training programs. The development of a collaborative network among agencies offering entrepreneurial assistance should be a top priority as administrators and educators plan programs for entrepreneurship education and training.

What follows is a matrix of the assistance agencies included in this section for each of the five developmental stages presented in Chapter II. Each agency is then described in more detail. In many instances, directories accompany particular assistance agencies and will be referenced in the agency description. All directories and supplementary materials are found in subsections of Appendix E.

The assistance agencies are presented alphabetically within each of the five stages of the Entrepreneurship Education Model, with an added dimension necessary to accommodate all of the organizations - Development of the Economic Environment. These divisions are arbitrarily based on what project staff perceive to be the agencies' primary functions. Naturally, many agencies serve entrepreneurs at various levels, but for purposes of space and time, each agency appears in only one category.

DEVELOPMENT OF THE ENTREPRENEUR

STAGE ONE: AWARENESS

BASIC SKILLS AND ENTREPRENEURIAL IDEAS

1. Advancement of Economic Education Project - University of Texas at Austin

Type of Assistance: Material development, resources, education, information

Description: The Advancement of Economic Education Program is designed to integrate economic concepts into the present Texas curriculum. This program has three basic components which include curriculum development, demonstration and dissemination of economic materials, and evaluation of materials and programs.

Contact: Charlene Boettcher
Coordinator, Advancement of Economic Education
The University of Texas at Austin
Department of Curriculum and Instruction, EDB # 406
Austin, TX 78712-1294

(512) 471-4611

2. Association of Private Enterprise Education

Type of Assistance: Professional affiliation, networking, advocacy, information

Description: The Association of Private Enterprise Education was established in 1978 and includes academicians, administrators, professional chairs and centers of economic education throughout the U.S., Canada and Mexico. Its purpose is to promulgate an accurate understanding of the American economic system, to advance teaching of and research in free market economics, to promote communication between academia and business, and to encourage dialogue with representatives of other economic systems across the world. The Association conducts international conferences, sponsors scholarly forums, and publishes a newsletter.

3. Center for Education and Research in Free Enterprise (CFE) -
Texas A & M University, College Station, Texas

Type of Assistance: Research, materials development, information,
education

Description: The Center for Education and Research in Free Enterprise, founded in 1977, is a privately supported program of Texas A & M University. Through education and research programs the Center seeks to promote economic understanding. The Center produces materials and publishes articles about economic issues, recent research developments and economic facts in a bimonthly newsletter.

Contact: Center for Education and Research in Free Enterprise
Texas A & M University
College Station, TX 77843

4. Center for Private Enterprise and Entrepreneurship - Baylor
University, Waco, Texas

Type of Assistance: Research, education

Description: The Center has a threefold purpose: (1) to preserve the competitive private enterprise system in America, (2) to promote the entrepreneurial spirit, and (3) to increase understanding concerning the benefits of the private enterprise system. The ten major aspects of the program are: teacher education programs, private enterprise research, precollege student programs, public education programs, employee economic education, entrepreneurship education, venture capital formation, innovation evaluation program, entrepreneurial research and venture assistance program.

Contact: Center for Private Enterprise and Entrepreneurship
Hankamer School of Business
Baylor University
Waco, TX 76798

5. Center for Youth Development and Research (CYDR) - St. Paul, Minnesota

Type of Assistance: Research, materials development, resources, advocacy, education

Description: CYDR seeks to contribute to knowledge about and promotion of healthy youth development through teaching, research, and community outreach with a wide variety of adults and young people who reflect the socioeconomic and cultural diversity of Minnesota, the nation, and the world. It is not a direct service agency but endeavors to assist agencies and individuals in designing and implementing youth programs, training youth workers, and providing resource materials. CYDR publishes the Center Quarterly Focus.

Contact: Center for Youth Development and Research
University of Minnesota
386 McNeal Hall
1985 Buford Avenue
St. Paul, MN 55108

(612) 376-7624

6. Charles Stewart Mott Foundation - Flint, Michigan

Type of Assistance: Philanthropic

Description: Using the processes of education, social welfare and environmental development, the Mott Foundation funds programs aimed at improving the quality of life through individuals and their community. It supports the community education concept which ties all learning together and seeks to involve everyone in the determination of their lives and the life of the community through self-improvement.

Contact: The Charles Stewart Mott Foundation
1200 Mott Foundation Building
Flint, MI 48502

(313) 238-5651

7. Council for Educational Development and Research (CEDaR)
- Washington, DC

Type of Assistance: Professional affiliation, research, advocacy

Description: CEDaR is an association of nonprofit educational research and development organizations. The primary mission of the CEDaR member-institutions is to promote school improvement through their research, development, dissemination, and service activities. Currently, 14 nonprofit organizations belong to the association. Two basic goals guide CEDaR's ongoing efforts: to advance the level of programmatic institutionally-based educational research and development, and to help demonstrate the importance of that research and development to improving education in this country. To this end, CEDaR publishes a quarterly magazine, Educational R & D Report, which features activities highlighting the results of educational research and development. The magazine is free. See Appendix E₁ for a directory of CEDaR Member-Institutions.

Contact: Council for Educational Development and Research

Washington, DC 20005

(202) 638-3193

8. Developmental Economic Education Program (DEEP)

See Joint Council on Economic Education

9. Direct Selling Education Foundation - Washington, DC

Type of Assistance: Education, information, research, materials development, resources

Description: The Direct Selling Education Foundation is a not-for-profit public educational organization based in Washington, DC. Its objective is to serve the public interest in the marketplace through educational, informational and research activities. The Foundation runs consumer conferences, publishes a free quarterly newsletter (At Home with Consumers), develops and distributes consumer information literature in English and Spanish, supports research on consumer and marketplace matters, and maintains a library in Washington, DC.

Contact: Direct Selling Foundation
1730 M Street, NW
Washington, DC 20036

(202) 293-5760

10. 4-H (Head, Heart, Hands, Health) - Cooperative Extension Service,
U.S. Department of Agriculture

Type of Assistance: Education, resources, information

Description: 4-H is the youth education program of the Cooperative Extension Service which is conducted jointly by the U.S. Department of Agriculture, the state land-grant universities, and county governments. The Extension Service was established to educate--to interpret and encourage the practical use of knowledge that comes out of scientific research. Today it is still an agency for change, stressing education for action through organization and leadership by local citizens. Extension 4-H work is conducted locally by "county agents." They plan youth programs with advisory committees of local community leaders in line with local needs. Since needs vary, programs may differ across the nation. In many places, paraprofessionals help agents with volunteers and 4-H groups. 4-H welcomes everyone to participate, regardless of race, creed, color, sex, or national origin. Examples of the kinds of activities engaged in by 4-H participants are: problems of the environment, community development, health, home economics, personal development, community service, leadership, citizenship, agriculture, clothing, home improvement, beautification, safety, aerospace, theatrics,

karate, marketing, conservation, public speaking, home gardening, photography, woodworking, entomology, small engines, first aid, firefighting, job training, consumer education and many, many more. For specific information pertaining to 4-H activities in your area, contact your county Extension agent, your state land-grant university (see Appendix E2 for a listing), or the address below.

Contact: Extension Service
U.S. Department of Agriculture
Washington, DC 20250

11. Freedoms Foundation at Valley Forge - Valley Forge, Pennsylvania

Type of Assistance: Awards for excellence in private enterprise education, education

Description: The Foundation is a nonpolitical, nonsectarian, nonprofit organization underwritten by tax-deductible contributions which promotes an understanding of America's political, social, spiritual and economic institutions and fosters responsible citizenship. The Foundation sponsors extensive educational activities toward this end. Cash incentive awards are granted to educators whose outstanding innovative classroom techniques or projects instill in their students a deeper understanding of the positive role private enterprise institutions play in improving the standard of living for all citizens. An annual program offers up to twenty awards of \$7,500 each and one of \$15,000 for an unusually meritorious entry.

Contact: Freedoms Foundation at Valley Forge
Valley Forge, PA 19487

(215) 933-8825

12. Free Enterprise Institute - Amway Corporation, Ada, Michigan

Type of Assistance: Resources, education, information, materials development

Description: The Free Enterprise Institute of the Amway Corporation is an educational organization which has been assigned the task of explaining the reciprocal relationship between personal and economic freedom as the economic basis of a vigorous culture.

Contact: The Free Enterprise Institute
Amway Corporation
7575 East Fulton Road
Ada, Michigan 49355

(616) 676-6986

13. Future Business Leaders of America - Phi Beta Lambda (FBLA)

Type of Assistance: Education, resources, information

Description: FBLA is a nonprofit educational association made up of students pursuing careers in business or business education. It is composed of three divisions: FBLA for high school students, PBL for postsecondary students, and an alumni division formed from both groups. The purpose of the organization is to bring business and education together in a positive working relationship. It offers programs and services that create a forum in which students, educators and business people learn about one another.

Organizational goals include: promoting competent, aggressive business leadership; understanding American business enterprise; establishing career goals; encouraging scholarship; promoting sound financial management; developing character and self-confidence; and facilitating the transition from school to work. There are more than 210,000 active members in over 10,000 chartered chapters throughout the 50 states, American Samoa, Canal Zone, Guam, Puerto Rico, the Virgin Islands and U.S. Department of Defense schools in Europe.

Contact: Future Business Leaders of America -
Phi Beta Lambda, Inc.
P. O. Box 17417 - Dulles
Washington, DC 20041

(703) 860-3334

14. Joint Council on Economic Education (JCEE) - New York, New York

Type of Assistance: Information, networking, education, materials development, research

Description: The Joint Council on Economic Education is an independent, nonprofit, nonpartisan, educational organization incorporated in 1949 to encourage, improve, coordinate and service the economic education movement. The Council's principal medium for expanding and improving economic education is a network of 50 State Affiliated Councils and 241 Centers for Economic Education operating at colleges and universities. In cooperation with the International Paper Company Foundation, the Council sponsors an Annual National Awards Program for the Teaching of Economics. It also develops curriculum materials, improves teacher training, identifies new curriculum patterns, and shares research and implementation procedures through the Developmental Economic Education Program (DEEP).

See Appendix E₃ for a 1983 Directory of Affiliated Councils and Centers which also contains all members of the National Association of Economic Educators.

Contact: Joint Council on Economic Education
Public Information Department
1212 Avenue of the Americas
New York, NY 10036

15. National Association of Economic Educators (NAEE) - Atlanta, Georgia

Type of Assistance: Professional affiliation, networking

Description: The National Association of Economic Educators includes directors, assistant/associate directors, and field consultants affiliated with Centers of Economic Education and State Councils on Economic Education. The Association states its purposes as: (1) to cooperate with the Joint Council on Economic Education in planning, implementing, and evaluating activities and programs of the Joint Council which are conducted through affiliated Councils and Centers; (2) to provide a forum for the communication and exchange of ideas and information among those interested in and concerned with economic education in the United States; (3) to serve as the principal professional organization of the economic education movement; and (4) to promote programs in economic education that are objective, nonpolitical, nonpartisan, academically free and responsible. An elected Executive Committee, consisting of three Directors of Councils of Economic Education and three Directors of Centers of Economic Education, serve to propose policies and procedures to the NAEE membership of approximately 350. If you would like more information concerning NAEE, refer to Appendix E₃ for the Center or Council nearest you, or use the national address listed below.

Contact: National Association of Economic Educators
Georgia State University
University Plaza
Atlanta, GA 30303-3083

(404) 658-2520

16. National Coalition of Hispanic Mental Health and Human Services Organizations (COSSMHO) - Washington, DC

Type of Assistance: National Hispanic youth business awareness and motivation

Description: A model demonstration project mobilizing public and private resources in Washington, DC, and San Antonio, Texas, to provide youth with business career information and motivation. The National Hispanic Youth Institute is the aspect of COSSMHO which provides a focal point for developing comprehensive services for youth.

Contact: COSSMHO
1015-15th Street, NW
Suite 402
Washington, DC 20005

(202) 638-0505

17. Oklahoma Council on Economic Education (OCEE) - Stillwater, Oklahoma

Type of Assistance: Information, education

Description: The Oklahoma Council on Economic Education is an independent, nonprofit, nonpartisan educational organization dedicated to increasing economic understanding among Oklahomans. Leadership and funding comes from the business, labor, agriculture, government, and education sectors of the state's economy. OCEE is affiliated with the National Joint Council on Economic Education.

Contact: Oklahoma Council on Economic Education
112 Business Building
Oklahoma State University
Stillwater, OK 74078

(405) 624-5204

18. Texas Bureau for Economic Understanding - Arlington, Texas

Type of Assistance: Education, research, materials development, information

Description: The Texas Bureau for Economic Understanding was established as a nonprofit organization in 1954 for the following purposes to which it still adheres: to endeavor to increase the degree and extent of intelligent devotion to the American free enterprise economic system by increasing individual understanding of the fundamental and significant laws, concepts, policies, and practices which characterize and sustain our system and make it superior to other economic systems; to promote, stimulate, and assist in increasing general understanding of the relationship between the American political, economic, and social systems and the Constitution of the United States; to carry on research and study; and to develop, prepare, acquire and disseminate informational materials toward the furtherance of these purposes; to cooperate with educational institutions and leaders and with other groups toward the attainment of these purposes; including the financing of and participation in educational activities carried on under the direction of competent patriotic educators, and the development and conduct of educational activities for adults not affiliated with educational institutions; to combat the acceptance and spread of doctrines designed to reconstruct our economic and social orders along socialist or collectivist lines, and to endeavor to persuade other Americans to do likewise.

Arlington, TX 76011
(817) 265-0983

STAGE TWO: DEVELOPMENT
TECHNICAL AND BUSINESS SKILLS

1. American Industrial Arts Student Association (AIASA) - Reston, Virginia

Type of Assistance: Networking, information, education

Description: AIASA is the vocational organization for elementary, junior high and senior high school students who are enrolled in or who have completed industrial arts courses. There are approximately 33 charter state associations affiliated with the national organization. AIASA is designed to develop the leadership and personal abilities of students as they relate to the industrial-technical world, as well as to inspire students to respect the dignity of labor and to appreciate craftsmanship. AIASA also assists students in making informed and meaningful occupational choices.

7. Foxfire Fund, Inc. - Rabun Gap, Georgia

Type of Assistance: Experiential education, consulting

Description: Foxfire began as an English project in Rabun Gap, Georgia, resulting from Eliot Wiggington's attempts to make writing enjoyable and meaningful for his students. Students began by recording mountain folklore, history, and culture, and published their first volume of Foxfire with a \$400 donation from the community. The Foxfire program now has seven full-time teachers, has published seven books, and has expanded into an extensive and varied four-million-dollar nonprofit organization run almost entirely by students. Mr. Wiggington travels several days each week lecturing and assisting others interested in implementing programs of this type, always emphasizing that students handle all aspects of the program, including business functions.

11. Junior Achievement, Inc. - Stamford, Connecticut

Type of Assistance: Experiential education, resources

Description: Junior Achievement, Inc. is a nonprofit corporation headquartered in Stamford, Connecticut that is the "Umbrella" for some 250 Junior Achievement operating areas in all 50 states and 16 foreign countries. The purpose of Junior Achievement and its five major programs is to provide practical and realistic education and experience in the private enterprise economic system. Adult volunteers (advisors) assist young people to form their own companies during a school year, operating just as any other business would.

Other Junior Achievement programs are:

Project Business - a flexible economic education program for 8th and 9th grades

Business Basics - high school JA officers make presentations to 5th and 6th grade students

Economic Awareness - describes several programs designed to deliver business and economic education information to the general public

Applied Market - is a program for college students. It provides a variety of practical and theoretical business and economic education activities. Presently, many business majors are receiving college credit for participating as advisors in the JA high school program

15. Office Education Association (OEA) - Columbus, Ohio

Type of Assistance: Education, resources

Description: OEA is a national voluntary association for students enrolled in vocational business and office occupations education. It is a cocurricular activity that is an integral part of the educational program which is designed to develop leadership abilities, interest in the free enterprise system, and competency in office occupations within the framework of vocational and career education. OEA is divided into four district categories: secondary, postsecondary, collegiate, and alumni. OEA is made up of local chapters within state associations. Regular publications include the OEA Communique (a quarterly journal), the Local Advisor's Bulletin (bimonthly bulletin between the months of September and June), The World of OEA (reference manual), It's a New Year (annual chapter handbook), Competitive Events Guidelines, and the OEA Week Promotion booklet and National Leadership Conference publication. Also available is the Related Materials Service which offers items to supplement classroom instruction.

Acting as liaison between business and industry and the OEA Board of Directors is the National Business Advisory Council. The Council is composed of representatives from different segments of the business world. OEA encourages involvement of business and industry at all levels of the organization to promote the sharing of information, needs, ideas, trends and so forth. Community involvement is encouraged through service, citizenship activities, and economic awareness activities.

10. Opportunities Industrialization Centers of America, Inc. (OIC/A) - Michigan State Council - Lansing, Michigan

Type of Assistance: Job Training and Placement

Description: OICs of America, Inc. is a community-based, self-help skills training and community revitalization program founded by Dr. Leon H. Sullivan, Chairman of the National Board of Directors of OIC/A. From its beginning as an employment and training program in Philadelphia, it has grown into a total economic development and job creation movement which serves an interracial cross-section of the American unskilled, unemployed and disadvantaged in more than 140 communities. Since 1964, OICs have trained over 600,000 people and have placed approximately 70% in meaningful jobs. Over 1/3 of OIC trainees were on welfare before coming to OIC, but alumni have contributed an estimated \$600 million to the national economy in tax dollars alone. Training is provided in 160 different skill areas, and a close working relationship is maintained with all levels of government and local business.

The state of Michigan has five OICs that work together under the direction of the Michigan State Council of the OICs of America. This Council is in the process of developing a major project targeted toward young women with children, a group with traditionally low participation rates due to lack of support services for child care and transportation. The project, to be entitled Michigan Opportunities for Mothers, will provide young

clients with training in the provision of child care services, remedial education, parenting skills, enrichment training, entrepreneurial skills training, and supportive services. The major outcome of this project is to assist graduates to establish their own at-home day care centers as well as cooperatively-owned centers. A unique feature of the project is that mothers will bring their children to the training center which will be a licensed day care facility operated by OIC.

11. Public/Private Ventures (P/PV) - Baltimore, Maryland

Type of Assistance: Research, consulting, education

Description: P/PV seeks effective approaches to meeting the needs of disadvantaged citizens for job training, education, and economic opportunity. The organization conducts research, develops programs and assists both the public and private sectors in a broad range of activities designed to help people, especially youth, become self-sufficient. It is a national, not-for-profit corporation which has worked in over 40 cities with programs that serve community and business needs while helping individuals become productive members of the work force. Examples of P/PV programs are: (a) The Summer Training and Education Program for disadvantaged youth which provides work experience and intensive remedial education; (b) Youth Conservation and Service Corps Programs; (c) Ventures in Community Improvement which trains disadvantaged youth and women in construction (and other nontraditional occupations for women) while making permanent improvements in public housing and buildings; (d) State Employment Initiatives for Youth which emphasizes the coordination of state resources to help students make a successful transition from school to work; (e) a Study of School/Business Partnerships to evaluate existing cooperative and adopt-a-school programs; and (f) the Development Training Institute which helps individuals engaged in community economic development gain the skills to plan, finance and manage development ventures in low-income neighborhoods.

13. YOUTHWORKS - Washington, DC

Type of Assistance: Education, job placement

Description: YOUTHWORKS is a nonprofit organization which provides an alternative job training and placement service to meet employment needs in Washington area business and trade associations. Each Spring several hundred low income and minority youth applicants between the ages of 16 and 20 are screened and interviewed to participate in this program. Successful applicants attend a four-day training seminar and become part of a talent pool available to employers. At any time during the school year YOUTHWORKS has a ready supply of part-time or permanent entry-level help available, but the emphasis is on summer employment. Pre-employment training focuses on employer expectations, communication skills, job searching techniques, attitude development and life management skills. YOUTHWORKers are periodically evaluated throughout the term of employment. Any youth not meeting standards of performance will be counseled and if he/she fails to improve will be dropped from the program. If the student is let go during the first four weeks of employment, YOUTHWORKS will reimburse the employer for all wages paid during that time.

DEVELOPMENT OF THE ENTERPRISE

STAGE FOUR: VENTURE
ENTERPRISE DEVELOPMENT

1. American Association of Minority Enterprise Small Business Investment Companies (AAMESBIC) - Washington, DC

Type of Assistance: Venture capital formation, information, resources

Description: This is an association of the privately owned investment companies which participate in the Small Business Administration's Minority Enterprise Small Business Investment Company Program. MESBICs invest in small businesses owned by socially or economically disadvantaged persons. SBA supplies financial assistance in the ratio of \$3 for every dollar of private capital invested by a MESBIC participant. Investments can be in the form of straight loans or equity investments and range from a few thousand to several million dollars. AAMESBIC has several publications available to guide existing and potential MESBICs in the investment process and also publishes Perspective - AAMESBIC Newsletter every month, as well as the Journal of Minority Business Firms.

b. Minority Business Development Agency

1) - Minority Business Development Centers - See Appendix C

2) - Acquisition Assistance Program

Type of Assistance: Financial, technical

Description: Provides technical support services to assist minority buyers of medium- and large-sized manufacturing firms, or high-technology industry such as energy, telecommunications and medical instrumentation. Assistance available at all stages of analysis and negotiation in business acquisition opportunities.

Contact: MBDA Regional Offices
(See Appendix C)

3) American Indian Program

Type of Assistance: Management, technical

Description: Designed to provide American Indians, Eskimos, Aleuts and their tribal governments with business management and technical assistance using consultants through grants or cooperative agreements. Economic self-determination for individual and tribal businesses is the program's goal.

Contact: MBDA Regional Offices
(See Appendix C)

4) Minority Bank Development Program

Type of Assistance: Management, technical, market development

Description: Minority-owned banks are provided the following types of assistance:

- Intensive assistance to executive officers and top-level management
- Market development through the solicitation of deposits and loans from governmental units and the private sector
- Creation of a capital support program

Contact: MBDA Regional Offices
(See Appendix C)

5) Minority Business and Trade Associations (MB & TA)

Type of Assistance: Information services, technical

Description: Program supports MB & TAs which act as advocates for their members and which provide information and technical services to their membership and to the minority business community:

- Cooperative advertising and group benefits
- Business promotion and technical services
- Negotiating trade discounts
- Liaison with MB & TA majority counterparts and with Federal, State and local activities intended to improve the viability of members in respective industries

Contact: MBDA Regional Offices
(See Appendix C)

6) Minority Export Development Consultants

Type of Assistance: Marketing, technical

Description: Provides minority business with exposure to international marketing networks, market information, and products and service delivery assistance:

- Identify potential markets and specific trade leads
- Technical assistance to complete international transactions
- Coordinate public agencies to increase participation by minority business

Contact: MBDA Regional Offices

7) National Minority Supplier Development Council (NMSDC)

Type of Assistance: Access to corporate markets

Description: NMSDC and its affiliated regional councils conduct a national marketing program to attract private sector business opportunities for minority business persons and to increase corporate procurement from minorities.

Contact: National Minority Supplier Development Council
1500 Broadway, Suite 3001
New York, NY 10036

8) Research Program

Type of Assistance: Research, information, contracts for research

Description: The Research Program of the MBDA Office of Advocacy, Research and Information emphasizes analyses and studies which can be used to modify or improve national minority business development policies and programs. The focus of studies is quite broad but must be related to the general concepts of business formations, expansion and failure or to the potential of minority-owned firms to contribute to socioeconomic development. There is also a need for careful exploration of sociological, demographic, institutional and other variables affecting minority business development. An annual contract research competition is announced in November/December of each year with contracts awarded the following June. Approximately one-half million dollars is awarded each year to five or six successful applicants.

18. Volunteer Urban Consulting Group, Inc. (VUCG) - New York, New York

Type of Assistance: Consulting, management assistance

Description: The Volunteer Urban Consulting Group was formed in 1969 by the Harvard Business School Club of New York. Its initial focus was minority economic development. In 1973, VUCG expanded its services to nonprofit organizations, and in 1975 to municipal agencies and arts and cultural organizations. Funding comes from private and corporate contributions as well as from public sources. VUCG has a full-time staff as well as access to several hundred volunteer experts in various areas depending upon the needs of its clients and attributes much of its success to the ability to match client needs and consultants. VUCG is constantly improving, updating and expanding its services to meet the current needs of the organizations it serves.

DEVELOPMENT OF THE ECONOMIC ENVIRONMENT

1. American Enterprise Institute for Public Policy Research (AEI) - Washington, DC

Type of Assistance: Research, information

Description: The American Enterprise Institute for Public Policy Research is a nonpartisan, nonprofit, publicly supported research and educational institution based in Washington, DC, with academic outreach programs throughout the world. It is dedicated to the principle that the competition of ideas is fundamental to a free society. The Institute strives to be a marketplace of ideas where scholars, public officials, business leaders, journalists and others are offered a free and open forum to debate the vital issues of public policy.

AEI's programs consist of Economic Policy Studies, Education Policy, Energy Policy, Fiscal Policy, Government Regulation, Health Policy, International Programs, Legal Policy Studies, National Defense Studies, Political and Social Processes, and Regional/Philosophy/Public Policy. Current special activities include the Center for Hemispheric Studies, Competing in a Changing World Economy Project, Legislative Analyses, Neighborhood Revitalization Project, and Academic Outreach.

Associates of AEI receive the following publications: The AEI Economist (a monthly newsletter), Public Opinion (a bimonthly magazine), and Regulation: The AEI Journal on Government and Society (a bimonthly magazine). A complete listing of publications available through AEI can be obtained at the address below.

3. Corporation for Enterprise Development (CfED) - Washington, DC

Type of Assistance: Research, information, resources, materials development, advocacy

Description: CfED is a national nonprofit organization exclusively devoted to the research, development and dissemination of entrepreneurial policy initiatives at the local, state and federal levels. Its programs reduce unemployment by stimulating enterprise development, particularly in poor communities and neglected market sectors. As the U.S. link in the Local Employment Initiatives Project of the Organization for Economic Corporation and Development (OECD's), CfED is part of a 16-nation effort to facilitate the international exchange and development of job creation and enterprise development strategies. CfED is currently conducting a state policy demonstration project for the Governors of Michigan, Ohio, and South Carolina in cooperation with the Council for State Planning Agencies entitled "State Entrepreneurial Economic Strategy Development and Demonstration Project (SEEDS)." CfED is also involved in the "HUB Program on Women's Enterprise." The Entrepreneurial Economy is a monthly newsletter produced by CfED.

6. Minority Business Opportunity Committee (MBOC) - Honolulu, Hawaii

Type of Assistance: Information, education/training, procurement

Description: Minority Business Opportunity Committees were established in 1970 as standing committees of each of the Federal Executive Boards, which are made up of the senior officials of Federal agencies in each locality. They exist in many cities and states and their structure and programs will vary according to local needs or priorities. MBOCs are responsible for supporting and

implementing the national minority enterprise programs within the Federal Government. In general, MBOC activities are oriented toward establishing and advancing programs within the government and private sector which improve the availability of: procurement opportunities, bonding and financing, education and training, technical advice and other business resources. The Minority Business Development Agency has been designated as the "lead agency" for MBOCs.

8. State Job Training and Coordinating Council - Boston, Massachusetts

Type of Assistance: Executive-level advisory

Description: The Massachusetts State Job Training and Coordinating Council is currently made up of 46 representatives from state and local government, education, business and industry who work together under the Job Training Partnership Act to coordinate all efforts in the State of Massachusetts to prepare and place in jobs the JPTA clients as well as unskilled youth, older workers, displaced workers and so on. Massachusetts is in the middle of a four-year plan to develop a comprehensive State employment policy which coordinates all existing state resources to meet employment training and placement goals. Important factors in this plan are that strong Private Industry Councils have been established, a Partnership Center created to provide expert assistance, and cooperative programs established with the Employment Service, Bay State Skills Corporation, Department of Public Welfare, Department of Education, the Executive Office of Communities and Development, the Executive Office of Elder Affairs, and the Massachusetts Rehabilitation Commission.

JOINT COUNCIL ON ECONOMIC EDUCATION:
DIRECTORY OF AFFILIATED COUNCILS
AND CENTERS/MEMBERS OF THE
NATIONAL ASSOCIATION OF
ECONOMIC EDUCATORS

The Joint Council is an independent nonprofit, nonpartisan, educational organization incorporated in 1949 to encourage, improve, coordinate and service the economic education movement.

The Joint Council's principal medium for expanding and improving economic education is a network of 50 state Affiliated Councils and 256 Centers for Economic Education operating at colleges and universities.

This Directory of Affiliated Councils and Centers contains all the members of the National Association of Economic Educators (NAEE), Associates and Assistants, Joint Council staff and regional representatives.

Any changes or additions to the Directory should be sent to: Joint Council on Economic Education, Public Information Department, 2 Park Avenue, New York, New York 10016. (212) 685-5499.

SPECIALIZED CENTERS FOR ECONOMIC EDUCATION

A specialized center serves as an informational resource unit, a national clearing house, and/or a repository within a specific and defined area of responsibility in the national economic education effort. Such centers exist to serve a particular need of the network and its constituents.

**CENTER FOR DEVELOPMENT OF ECONOMICS EDUCATION
JUNIOR HIGH SCHOOL (Grades 7-8)**

Center for Economic Education
University of the Pacific
School of Education
Stockton, California 95211

Dr. Ronald A. Banaszak
Director
(208) 946-2463

SPECIALIZED CENTER FOR ELEMENTARY ECONOMIC EDUCATION

University of South Florida
LIB 623
Tampa, Florida 33620

Dr. Dick J. Puglisi
Director
Mr. C.C. (Ted) Hagen
Assistant
(813) 974-2175

**NATIONAL CENTER FOR THE IMPROVEMENT OF INSTRUCTION
AND CURRICULUM DEVELOPMENT IN THE TEACHING OF ECONOMICS**

Center for Economic Education
Illinois State University
Department of Economics
Normal, Illinois 61761

Dr. Bernard J. McCamey
Director
(309) 438-2106

NATIONAL DEPOSITORY FOR ECONOMIC EDUCATION AWARDS

Illinois State University
Milner 184
Normal, Illinois 61761

Mr. George E. Palmer
Director
(309) 436-3355

**SPECIALIZED CENTER FOR THE CAPSTONE HIGH
SCHOOL COURSE IN ECONOMICS**

Center for Economic Education
Governors State University
College of Business & Public Administration
Park Forest South, Illinois 60466

Mr. John S. Morton
Director
(312) 534-5000 Ext. 2241

NATIONAL CENTER FOR COMPUTER ASSISTANCE IN ECONOMICS

Center for Economic Education
Mankato State University
Department of Economics
Mankato, Minnesota 56001

Dr. Paul J. Thompson
Director
(507) 389-2711

**NATIONAL CENTER FOR GAMES AND SIMULATIONS IN
ECONOMIC EDUCATION**

Center for Economic Education
University of Minnesota
1189 Business Administration Building
Minneapolis, Minnesota 55455

Dr. Bruce R. Daigaard
Director
(612) 373-4489

SPECIALIZED CENTER FOR AGRICULTURAL MATERIALS

The Tri-College
Center for Economic Education
306 Ceres Hall
NDSU
Fargo, North Dakota 58106

Dr. A. Clyde Vollmers
Director
(701) 237-8170

**NATIONAL REPOSITORY OF CHILDREN'S STORIES IN
ECONOMICS**

Center for Economic Education
Saint Cloud State University
College of Business
Saint Cloud, Minnesota 56301

Dr. Robert H. Hendricks
Director
(612) 255-2157

**NATIONAL DEPOSITORY AND SPECIALIZED CENTER FOR
MATERIALS ON WORLD ECONOMICS**

Center for Economic Education
College of St. Thomas
Saint Paul, Minnesota 55105

Dr. M.A. Selim
Director
Sister Maria Herbert
Associate Director
(612) 647-5855

**NATIONAL CENTER FOR PERSONALIZED INSTRUCTION
IN BUSINESS AND ECONOMICS**

Empire State College
Center for Business
and Economic Education
Empire State College
State University of New York
P.O. Box 130
Old Westbury, New York 11568

Dr. George G. Dawson
Director
(516) 997-4700

**NATIONAL CENTER FOR AUDIOVISUAL MATERIALS
FOR TEACHING ECONOMICS**

Center for Economic Education
Oregon State University
Milam Hall, Room 157
Corvallis, Oregon 97331

Professor Charlotte T. Harter
Director
(503) 754-3211

NATIONAL CENTER FOR WORLD-OF-WORK ECONOMIC EDUCATION

Center for Economic Education
North Texas State University

AMERICAN VOCATIONAL ASSOCIATION:

SELECTED MATERIALS AND
ORDER BLANK

A Bountiful New Crop of AVA Resources to Help You in Key Areas.

Private Sector Partnerships

New this fall. . .

Two AVA products to help you build partnerships between vocational education programs and business and industry in your community

- Information Briefs
- Promotional Flyer
- Press Releases
- Editorial
- Window Sign
- Slides/Script
- Certificate Recognition

AVA Resource Kit Vocational Education and Business: A Working Partnership

A newly-developed packet containing a series of materials to help you work more effectively with business in your community. This valuable information-packed resource is right in tune with the new push to build creative partnerships with business and industry. The kit includes:

- Five practical, four-page information briefs, providing nuts and bolts facts on: "Effective Vocational Advisory Councils"; "Coordinating a Curriculum Review"; "Vocational Education/Business Partnerships that Work" and "A Private Sector Look at Education."
- A set of 16 attractive color slides with script for use in making the case concerning the value of partnerships. Script is locally adaptable, and may be supplemented with your own slides and facts.
- Set of 10 information-packed flyers, focusing on the benefits to be gained from partnerships. This

attractive hand-out, designed to use with a personal presentation, explains the various types of cooperative arrangements possible. (Can also be purchased separately in bulk.)

- Materials outlining steps to follow to qualify for a new certificate recognition to be offered by AVA to programs whose curriculum has been reviewed and approved by their local advisory committees.
- Set of 10 small window signs for distribution to businesses who are working with vocational education programs. Sign reads, "We support vocational education." (Bulk quantities available.)
- A set of model press releases that can be adapted for use in publicizing special events involving business and industry.
- A sample editorial that can be submitted for publication in your local newspaper.

AVA 1984 Yearbook Collaboration: Vocational Education and the Private Sector

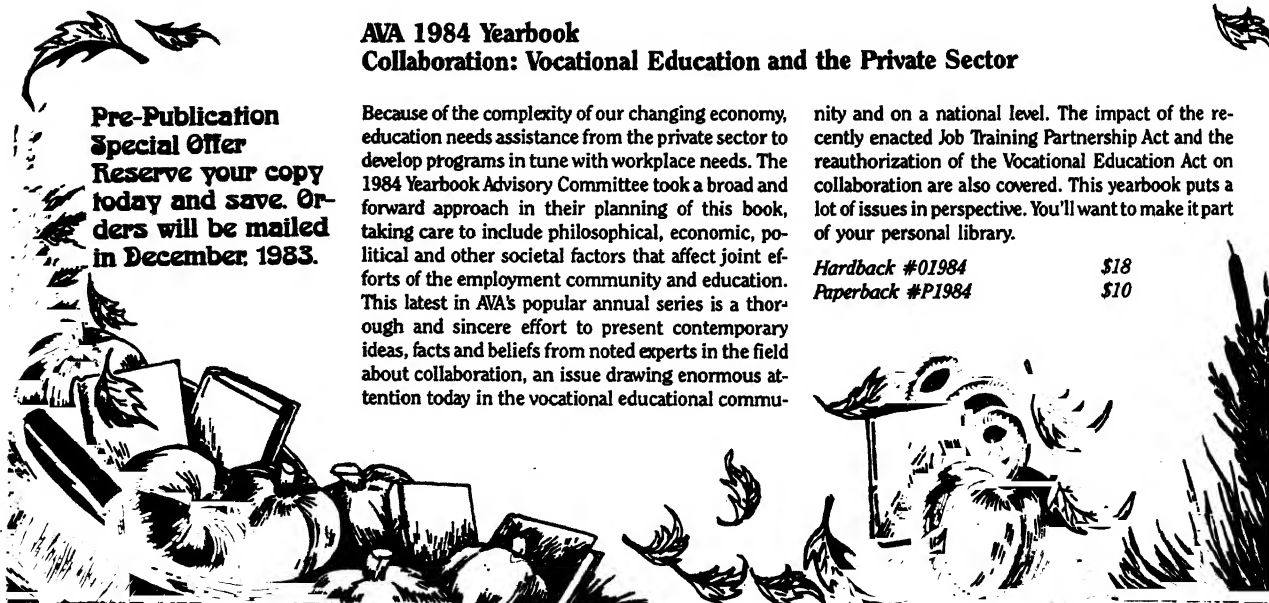

**Pre-Publication
Special Offer**
Reserve your copy
today and save. Or-
ders will be mailed
in December, 1983.

Because of the complexity of our changing economy, education needs assistance from the private sector to develop programs in tune with workplace needs. The 1984 Yearbook Advisory Committee took a broad and forward approach in their planning of this book, taking care to include philosophical, economic, political and other societal factors that affect joint efforts of the employment community and education. This latest in AVA's popular annual series is a thorough and sincere effort to present contemporary ideas, facts and beliefs from noted experts in the field about collaboration, an issue drawing enormous attention today in the vocational educational commu-

nity and on a national level. The impact of the recently enacted Job Training Partnership Act and the reauthorization of the Vocational Education Act on collaboration are also covered. This yearbook puts a lot of issues in perspective. You'll want to make it part of your personal library.

Vocational Education in the Comprehensive High School

AVA offers a series of materials on one of the hottest topics on today's education agenda.

Assessing the Needs

By Henry David, 1983

A well-known educational researcher and author summarizes and gives some insightful perspective on the future of vocational education in the comprehensive high school based on hearing papers presented at an American Vocational Association Board of Directors hearing on the subject. This paper capsulizes innovative approaches and techniques presented by hearing speakers on how to address challenges facing vocational education in this setting. Directors of comprehensive high school programs in vocational education will find this paper a useful resource in program planning.

#10283

\$7

An Agenda for Improvement

This action-oriented publication offers a series of guiding principles for developing strong vocational education programs in the comprehensive high school. Conclusions are drawn from presentations made by leading educators at a conference on the topic sponsored by AVA. The publication includes a comprehensive series of recommendations for actions that will result in improvement in vocational education programs in this setting. A must for any educator who is concerned about making vocational education in the comprehensive high school more effective and relevant to the needs of students and employers.

#10383

\$8

Making the Case for Excellence

Four articles, taken from the popular Executive Directions series written by AVA Executive Director Gene Bottoms and originally published in the

association's journal *VocEd*, set forth a pro-active agenda for educators to follow in responding to the mandate for excellence in secondary education. These columns look at the impact of technology and other societal changes on program planning and provide concrete ideas for implementing change. The series is an excellent resource to use as background information for local industry, school boards, in community forums and with other audiences who need to become more aware of vocational education's needs and possible new directions for programs in the comprehensive high school.

Articles are available in an attractive, presentation quality form in bound sets of four or individually, in quantities of 100 copies or more.

Series Titles:

"Strengthening Technological Innovation" #10583

"No Quick Fix Can Lead to Excellence" #10683

"Quality Takes Commitment and Direction" #10783

"Voc Ed Belongs on the National Agenda for Excellence" #10883

Bulk orders of individual titles \$10 per 100

Sets of all four reprints #10483 \$30 per 100

Facts and Figures

A useful two-page overview of facts about vocational education programs in the comprehensive high school setting. Includes information on enrollment, funding, teacher requirements, placement of students, student organizations and economic benefits. Useful as background material for school boards, press, industry, community groups and others who need information about programs.

#FA-04

\$10 per 100. Minimum order of 100.

Changing Nature of Work

Stimulating material about workplace changes.

Careers Tomorrow: The Outlook for Work in a Changing World

Edited by Edward Cornish, 1983, World Future Society.

Gaze into the fascinating future of work without a crystal ball. This illustrated, 160-page paperback features twenty-four articles on the future of work by prominent futurists, work experts and educators. Selected from *The Futurist Magazine*, titles include: Robots in the Work-

place, Careers with a Future: Where the Jobs Will be in the 1990s; The Great Depression of the 1980s: How it Might Begin; Disappearing Jobs: The Impact of Computers; How Microelectronics May Change the Workplace, A Guide to Computer Shopping; the Electronic Office and Electronic Meetings. Essential reading for anyone who will be planning vocational programs or counseling people for jobs in the future.

#A-85

\$6.95

Apprenticeship

Outstanding materials to help vocational educators enhance their ability to offer related instruction for apprenticeship programs.

Apprentice Core Modules

Developed by Conserva, Inc., with funding from the Office of Vocational and Adult Education, U.S. Department of Education, 1983.

Designed for use in the first and second years of apprenticeship related subjects training, these ten self-instructional, self-paced modules are suitable for either instructor-supervised or independent study arrangements. The series emphasizes the principles, concepts and information that apprentices must know and use in areas such as mathematics, safety, physical science and communication skills. Illustrations and applied examples amplify written materials. Self-tests are included to prove mastery of the subject matter in each section. For any instructor who needs good materials for related apprenticeship training.

Titles include:

A Basic Core Curriculum, #A-60; Introduction to Apprenticeship, #A-61; Basic Mathematics, #A-62; Basic Safety I, #A-63; Basic Safety II, #A-64; Basic Measurement, #A-65; Sketching, Drawing and Blueprint Reading, #A-66; Basic Physical Science, #A-67; Working in Organizations, #A-68; Interpersonal Skills and Communication, #A-69 and complete set, #A-70; \$5 per module; \$45 for complete set.

Instructor Training Modules

Developed by Conserva, Inc., with funding from the Office of Vocational and Adult Education, U.S. Department of Education, 1983.

A series of teaching materials designed to help vocational instructors learn how to give apprentices the theoretical and technical knowledge base they need. These ten self-instructional, self-paced modules comprise an instructional system for preservice and inservice staff development. The materials are written to train related subjects instructors in the critical teaching skills necessary.

Titles include:

Introduction to Related Subjects Instruction and In-Service Training Materials, #A-71; Planning the Apprenticeship Program, #A-72; Planning Related Subjects Instruction, #A-73; Developing Instructional Materials for Apprentices, #A-74; Presenting Information to Apprentices, #A-75; Directing Learning Activities for Instruction, #A-76; Providing for Individual Learner Needs, #A-77; Controlling Instructional Settings, #A-78; Evaluating Apprentice Performance, #A-79; Communicating with Apprentices, #A-80 and complete set, #A-81; \$5 per module; \$45 for complete set.

Beginning Teaching

Help for the difficult challenges faced by new teachers.

Learning How to Teach

By David Goetsch, 1983

Although part-time technical teachers are usually experts in their own fields, they are often unskilled in the techniques and principles necessary to be good teachers. This 110-page book, comprised of four self-paced learning modules, is designed for these new teachers. Units cover the most effective teaching techniques recognized by the profession, and allow new instructors to gain practical insights and skills in just over 12 hours. Self-tests and activities designed to demonstrate practical applications of the concepts introduced are included for each module. Use it as part of your new teacher orientation program, the basis of a course for technical experts in your community who want to teach seminars or classes on their own, or a reference guide to develop your own teacher education program.

#10183

\$15

The Vocational Instructor's Survival Guide

By David Goetsch, 1982, originally developed for the State of Florida Department of Education.

Teaching responsibilities go far beyond classroom instruction. This guide offers help to beginning instructors for carrying out all the other duties standard textbooks seldom cover. This book helps instructors rise to the challenges of student recruitment, placement and follow-up responsibilities with scores of suggested strategies, techniques and approaches for improving effectiveness in these critical areas. Developing contacts with the business community is an important focus. Sample materials applicable to every vocational area are included. An appendix has sample letters, forms, checklists. Practicing and prospective vocational instructors in every field will find this book an important resource.

#11083

\$12

Entrepreneurship

Valuable resources for a growing aspect of all vocational education programs.

A Teacher's Guide for Entrepreneurship Instruction

By Vivien Ely, 1983

This comprehensive guide to entrepreneurship instruction identifies appropriate entrepreneurship concepts for introduction to students from elementary school age through adult levels and gives detailed help for offering appropriate instruction. It stresses specific preparation skills required for embarking on a entrepreneurial career and shows how to plan appropriate instruction for each instructional level. A suggested teaching outline for a 16-unit entrepreneurial course is a detailed blueprint for carrying out a workable instructional program. An extensive guide to good resource materials and contacts is another valuable feature.

#10983

\$15

Entrepreneurship Training Components (ETC)

Developed by American Institutes for Research with funding from the Office of Vocational and Adult Education, U.S. Department of Education, 1981.

As more people venture out as entrepreneurs, the demand for more and better training courses is rising. ETC booklets give students specific, down-to-earth ideas about how they can use their job skills to run their own businesses. Modules are designed for secondary, postsecondary and adult education audiences in seven major vocational education disciplines—agriculture, business and office, health, marketing and distributive, occupational home economics, technical and trade and industrial. Both student and teacher modules are available for each occupation covered. Some introductory materials on entrepreneurship training are also available. (See order form for complete listing of titles.) These comprehensive booklets provide an excellent basis for self-study or course instruction.

*Teacher modules—\$3 each; Student modules—\$6 each;
Complete Set—\$200 (all disciplines)*

Curriculum Materials

Aids for livening up the curriculum in some key areas.

The Ups and Downs of the Job Search

By Sharon Sperling Connolly, 1983

Here's a great new classroom resource—a game which lends a little levity to the process of planning a job search. As students move across the game board in search of a job, they run into placement counselors, state agencies and others who can help or hinder their search. The game reinforces the need for adequate training and education in order to advance. Useful as part of occupational training programs in service, clerical, medical, creative and manual/machine career areas. Also an innovative addition to any career education class. The first player to go around the game board completely and land on the "winner" space wins the game, and maybe a better chance in the real game of job hunting. Comes with game board and pieces, job information cards and instructions.

#A-82

\$9

Adult Roles and Functions

Developed with funding from the West Virginia Board of Education, Bureau of Vocational, Technical and Adult Education.

Everything from how to budget for a new baby to how to control weight is covered in this real-life centered course for young people on the realities of assuming adult roles. Designed for use in eleventh and twelfth grade home economics classes, the competency-based, non-laboratory course fills an important educational gap by zeroing in on many of the tasks for which we don't traditionally train students. Seven content areas are covered—Family Relations, Consumer Education, Home Management, Career, Housing, Nutrition and Parenting. A teacher's section with master list of concepts, essential competencies and outcomes, resource list and scheduling suggestions is included. Visual aids, activity suggestions and class exercises complete the training package. Material can be used as the basis for a two-year course in its entirety, or a short-term course made up of selected units. Materials have been extensively field tested, and the program has received national recognition as an outstanding model for teaching students about adult responsibilities.

#A-83

\$20

Planning for Economic Development

Another outstanding addition to AVA's valuable library of economic development materials.

A Report of Quick-Start Economic Development Programs

By Marcel DuVall, prepared for the Office of Vocational and Adult Education, U.S. Department of Education, 1983.

If your community has been hard-hit by unemployment, a quick start economic development program might be a solution. This report is useful to planners who are interested in attracting new economic ven-

tures and industries. The study, which profiles methods used by twenty states, show that quick-start programs to meet specific employer needs do make a difference. Find out how programs are planned, financed, and coordinated, and what economic impact the activities have had in each state. A useful resource directory of economic development contacts in each state is also included.

#A-84

\$12

Serving Special Populations

A look at how vocational education and the private sector can work together to improve efforts to train members of minority groups for employment.

Education for Tomorrow's Jobs

Edited by Susan Sherman, National Academy of Science

Findings from a study focusing on collaborative efforts between vocational education and private-sector employers to improve the employability of young people, specifically minority students living in economically depressed areas. The report highlights challenges faced by vocational educators in carrying out this task and makes recommenda-

tions for addressing those challenges. The report has implications for program planners and for persons involved in implementing the Job Training Partnership Act. The study was completed by the National Academy's Committee on Vocational Education and Economic Development in Depressed Areas in response to a charge from the U.S. Department of Education.

National Vocational Education Week*

*Get started early to plan for Vocational Education Week—1984—
with these valuable publicity planning aids.*

Vocational Education Week '84 Publicity Kit

AVA's popular Publicity Kit has been greatly expanded for 1984. The kit includes everything you'll need to pull off some exciting activities and promotion for Vocational Education Week celebrations in February—sample news releases, public service announcements, proclamations, a message from the President of the United States, a sample editorial and a flyer providing a lively overview of vocational education nationwide. All are based on the theme for Vocational Education Week 1984, "Vocational Education: Creating Partnerships for Excellence". A series of nine tip sheets showing how to plan and carry out a wide range of activities are a major kit component. A planning calendar with suggested activities and a blank calendar with space for writing in local activities will make scheduling easy. A page of handsome clip art, new this year, will help you highlight the theme in your printed materials. Order now so you can start planning your activities early.

BANK OF AMERICA: SMALL BUSINESS REPORTER SERIES
1984 ORDER BLANK AND PRICE LISTING

About the Series

The *Small Business Reporter*® provides straightforward, practical information on owning and operating a small business. It is for all those who need information about small business—the business owner, of course, but also bankers, attorneys, accountants, consultants, industry and trade associations, schools, and libraries.

As a result of thorough research, including extensive field interviews, *Small Business Reporters* are authoritative as well as objective. Emphasis is placed on California-based operations, but most material is applicable to enterprises throughout the United States.

Business Operations describe the principles and practices at work in various aspects of business management. Topics relate to problems encountered by business people in all fields.

Business Profiles deal with specific types of small business, discussing investment requirements, operating ratios, operational formats, and problems, trends, and opportunities in the business.

Professional Management reports discuss the business concerns involved in setting up a veterinary, medical, dental, or accounting practice.

Topic selections are based on the needs of the small business community as reflected by changes in market conditions and requests from readers.

Single copies of any report listed in this index are available free at Bank of America branches in California. To order reports by mail, please see the reverse side for mail order charges.

APPENDIX E₁₀

NATIONAL ALLIANCE OF HOMEBASED BUSINESSWOMEN - DIRECTORY
- MEMBERSHIP FORM

National Alliance of Homebased Businesswomen

Purposes:

The purposes of the National Alliance of Homebased Businesswomen are to:

- Emphasize, encourage, and stimulate personal, professional, and economic growth among women who work from, or wish to work from, their homes
- Project a positive image of women with homebased businesses
- Provide a forum for the discussion and exchange of homebased business information and experiences
- Provide publications disseminating current information and exchanging views on mutual concerns
- Provide a support network of professional contacts, education, and encouragement for women with homebased businesses
- Showcase members' goods and services

Benefits to members:

- The *Alliance*, a quarterly newsletter, with articles about helpful business information, news of members' achievements, and information about new resources and ideas for businesses
- An Annual Meeting that includes seminars on business subjects, an opportunity for members to showcase their goods and services and to help decide the future directions and activities of NAHB
- A quarterly Meeting-by-Mail from the board of trustees, keeping members informed about what the board is doing for them and providing a place for members to speak out on issues that concern them
- An Annual Directory of all members published in November and updated quarterly
- Local chapters for networking with other members
- A certificate of membership, suitable for framing and displaying

Membership:

There are three categories of membership:

Member: A person with a revenue-producing homebased business; has the right to vote, to become an officer or trustee, and to become a member of a national committee.

Associate Member: A person who has not yet established a revenue-producing homebased business; may not vote or hold national office but may vote and hold office in a chapter if the chapter so rules.

Supporting Member: Any person not included under general or associate membership or any corporate body that gives tangible support to NAHB; may not vote or hold office in NAHB.

Membership fees can be deducted as a business expense. Membership is on an individual, professional basis, just as the benefits are on an individual basis.

Member: \$30

Associate Member: \$30

Supporting Member: a contribution of money, goods, or services.

Prices shown were in effect in October 1983. Prices of Government publications are subject to change without notice and the prices charged on your order will be those in effect when your order is processed.

A 25-percent discount is given for quantities of 100 or more of the same publication to a single address. For foreign mailings, please add 25 percent to prices shown above.

The publications listed above may also be purchased from U.S. Department of Commerce field offices. If one is located in your city, consult your telephone directory for the address.

A companion form, SBA-115A, lists Free Publications and is available without charge from SBA, P.O. Box 15434, Fort Worth, Texas 76119.

APPENDIX F

A FLOWCHART FOR PLANNING AND IMPLEMENTING A NEW VENTURE

A FLOWCHART FOR PLANNING AND IMPLEMENTING A NEW VENTURE

SOURCE: Hollingsworth, A. Thomas and Herbert W. Hand (1979), *A Guide to Small Business Management*, Philadelphia, Pennsylvania: W. B. Sanders Co., pp. 20.

APPENDIX G

CHARACTERISTICS OF ENTREPRENEURS

DEFINITION OF ENTREPRENEUR

Entrepreneur is derived from the French word "Entreprendre" which means "to undertake". The entrepreneur undertakes to organize, manage and assume the risk of business. He is an individual who creates, owns and manages a business firm. The entrepreneur is an extraordinary person who arranges and manages any enterprise, especially a new or untried business. According to Frank Carney, founder of Pizza Hut, Inc.:

Entrepreneurs are the cornerstone of the American Enterprise System, the self renewing agents for our economic environment. Normally defined as risk takers in new venture creations, entrepreneurs are uniquely optimistic, hard driving, committed individuals who derive great satisfaction from being independent. Starting a new business requires more than just an idea; it requires a special person, an entrepreneur, who uses sound judgement and planning along with his risk taking to insure the success of his own business. (Christy and Jones, 1982)

A precise definition of an entrepreneur (entrepreneuse, the feminine form of the word) is difficult. Webster identifies him/her as "one who organizes a business undertaking, assuming the risks for the sake of profit." More clearly expressed, an entrepreneur is one who recognizes opportunity; he is an innovator/developer who assumes risk in a competitive marketplace in order to provide a needed product or service--and to realize an adequate reward (profit) for his efforts. He is a catalyst for change, a salesman, a competitor with himself in quest of his own goals. He is a tireless worker, is pleasantly aggressive, and is an independent thinker who tempers a "can do" spirit with careful analyses of successful techniques in management and marketing strategies. And he is, first and foremost, a small business owner who, by virtue of his positive influence on the preservation of our political and economic heritage, is the unsung hero in American society--yesterday, today, and tomorrow (Christy and Jones, 1982). Mary Hudson, President of Hudson Oil Company, indicated that:

...entrepreneuse is a seldom used feminine version of the word entrepreneur. Increasingly, the opportunities for and recorded successes of women in new business ventures offer great encouragement to those with vision, courage, and management skills. It is a tough world, but women can and are succeeding admirably in growing numbers. (Christy and Jones, 1982)

According to Brent Barry, President of BRB, the doors of business opportunities for the minority person are opening with increasing frequency. Because of the lack of a long track record in successful small business operations, minorities are finding that there are some hurdles which sometimes must be jumped, especially in arranging financial backing, which may prove at

first discouraging. But these, too, can be overcome. There is a definite need for more minority venture creations, but minorities should follow the strategies of all erstwhile entrepreneurs: careful study, planning, and development before launching an enterprise (Christy and Jones, 1982).

Characteristics of Entrepreneurs

Numerous studies have been conducted to determine the "personal qualities" and "traits" needed to be a successful entrepreneur. One rather extensive survey of entrepreneurs concluded with the following advice:

Be aggressive, be competitive, be goal-oriented, be confident, be egocentric, make decisions, be an achiever very early in life, be a loner in your final decision, put family and friends second to business, be an opportunist, do not be security-oriented, be persistent, have determination, be an optimist (to an extreme), have desire to achieve, be hyperactive mentally, be a dreamer, be a calculated risk-taker, want power, learn from previous mistakes, be a perfectionist and be intuitive. (Clayton, 1982)

In addition, entrepreneurship has been defined as the interaction of the following eight skills: inner control, planning and goal-setting, risk-taking, innovation, reality perception, using feed-back, decision-making and human relations. Entrepreneurs are highly independent. Over 75% of all entrepreneurs had parents or other role models who were self-employed. Educators should assume the role of facilitators (not teachers) and help potential entrepreneurs to manage their own learning (Scanlon and Flexman, 1980).

SELF-EVALUATION FOR POTENTIAL ENTREPRENEURS

There are a number of tests that purport to measure entrepreneurial potential. They ask questions related to subjects as diverse as your need for independence, your marital status, your sex, your sports interests, and your planning ability. However, in reviewing most of these approaches, it has been found that few of them attempt to predict success, only activity.

The following self-appraisal form refers to those areas that are important to success and can be controlled or affected by the individual.

If the statement is *rarely* true of you, score 1.

If the statement is *usually* true of you, score 2.

If the statement is almost *always* true of you, score 3.

	Score
1. I have firmly established my personal objectives.	_____
2. My personality is the type that fits my business.	_____
3. I tend to get things accomplished within reasonable time constraints.	_____
4. I can change my objectives as my markets dictate.	_____
5. I have common sense.	_____
6. I would like to achieve something worthwhile.	_____
7. I enjoy being responsible for getting things accomplished.	_____
8. I like to operate alone and make decisions on my own.	_____
9. Risky situations do not pose an unusual threat to me.	_____
10. I can deal with uncertainty.	_____
11. I can take and use negative comments from others.	_____
12. I can sell myself and my business.	_____
13. There is little chance for me to fail.	_____
14. I have the energy needed to accomplish the task.	_____
15. I am truly excited about the business.	_____
16. I have a record of good health and miss little work because of sickness.	_____
17. My business does not violate my social status.	_____
18. My family is firmly committed to long hours and hard effort in regard to the business.	_____
19. I get the job done with little wasted time.	_____
20. I can select individuals to assist me in my weak areas.	_____
21. I am able to get people working <i>with</i> me.	_____
22. I have a high level of self-discipline.	_____
23. I can appraise the world in a realistic manner.	_____
24. I have the skill and experience necessary for my business.	_____

A score of 60 to 72 is good, 48 to 58 is fair, and under 48 is poor. It should be apparent that a high score is not a guarantee of success; many other factors must also be given consideration. However, if you have been both honest and objective in your answers, you may gain some insight into the degree your personal characteristics may affect the success of your business. A low score should certainly make you reconsider whether or not you want to own a small business.

APPENDIX H

ENTREPRENEUR QUOTIENT, SUCCESS QUOTIENT, CAREER QUOTIENT -

NATIONAL RESEARCH CENTER FOR
UNIVERSITY AND COLLEGE ADMISSIONS

DETERMINE YOUR EQ

DEFINITION:

An "EN-TRE-PRE-NEUR" is an individual who creates, develops, and manages a business venture, with personal risk, for a potential profit.

DESCRIPTION:

The EQ, more commonly known as the Entrepreneur Quotient, is a self-directed learning tool. It is not a test, but rather a method by which an individual can compare his own personal characteristics with those of successful entrepreneurs.

INSTRUCTIONS:

Answer each question to the best of your ability. There is no time limit. Correct answers are given to each question to further stimulate your interest.

INTERPRETATION:

Remember, this is not a test. If you cannot answer any of the questions, do not be alarmed. You can learn to be an entrepreneur. For those individuals who prefer a scoring format, the procedure below provides rough guidelines.

CORRECT NUMBER

100

If you're not already an entrepreneur, you should be.

85

You're compatible. Get started.

70

You have potential. Study the rules.

55

You're behind, but you can still make it.

40

You don't seem to be interested, but that doesn't mean you can't make it.

25

You still have a chance. Go for it.

0

You're probably dead.

1. As a child, did you have a paper route, sell candy, magazine subscriptions, or shine shoes for money?
☐ YES ☐ NO
2. Did you come from a family that owned a business?
☐ YES ☐ NO
3. Do you have a relative who is in business?
☐ YES ☐ NO
4. Have you ever worked for a small firm where you had close contact with the owner?
☐ YES ☐ NO
5. Are you between the ages of 16 and 44?
☐ YES ☐ NO
6. Have you ever worked for a large company where you worked closely with a top manager?
☐ YES ☐ NO
7. Have you ever been fired from a job?
☐ YES ☐ NO
8. Do you have experience in organization, planning, budgeting, personnel, marketing, advertising, administration, evaluation?
☐ YES ☐ NO
9. If you are married, is your spouse supportive of the personal and financial risks involved in starting a business?
☐ YES ☐ NO
10. Do you have a library of "self-help" success books?
☐ YES ☐ NO
11. Are you respected by your peers at work and by your friends in other areas of your life?
☐ YES ☐ NO
12. Are you inquisitive, inventive, creative, innovative, and aggressive?
☐ YES ☐ NO
13. Do you enjoy solving problems?
☐ YES ☐ NO
14. Would you rather be your own boss?
☐ YES ☐ NO
15. Do you like to make things happen?
☐ YES ☐ NO
16. Do you enjoy taking personal and financial risks?
☐ YES ☐ NO
17. Were you a first-born child in your family?
☐ YES ☐ NO
18. Are you male or female?
☐ FEMALE ☐ MALE
19. Are you married or single?
☐ MARRIED ☐ SINGLE
20. Do you consider yourself a free and independent spirit?
☐ YES ☐ NO
21. Do you have a high need for achievement?
☐ YES ☐ NO
22. Did you have a good relationship with your father?
☐ YES ☐ NO
23. Small business employ over 50% of the workforce, generate 50% of all new jobs and account for 44% of the gross national product.
☐ TRUE ☐ FALSE
24. Do you take rejection personally?
☐ YES ☐ NO

-
25. Do you like to move around a lot?
☐YES ☐NO
26. Is it true that entrepreneurs make good managers?
☐YES ☐NO
27. To be a successful entrepreneur, an individual needs a lot of good luck.
☐TRUE ☐FALSE
28. Successful entrepreneurs often use the advice of expert outside consultants.
☐TRUE ☐FALSE
29. Do you believe that you can control your own destiny?
☐YES ☐NO
30. Are you a consistent goal setter, and results-oriented individual?
☐YES ☐NO
31. Have you ever been forced to move, gone through a divorce, or suffered the death of a spouse or parent?
☐YES ☐NO
32. Do you have specific experience in the area of business you plan to go into?
☐YES ☐NO
33. Personal savings is the most important source of start-up funds for entrepreneurs.
☐TRUE ☐FALSE
34. Do you have managerial skills?
☐YES ☐NO
35. Are you willing to work longer hours for the same salary you now make?
☐YES ☐NO
36. Do you have a college degree or special skills and knowledge from a vocational or technical school?
☐YES ☐NO
37. Do you know how to raise money for starting a business?
☐YES ☐NO
38. Do you like people?
☐YES ☐NO
39. Can you make quick decisions?
☐YES ☐NO
40. Do you have a high energy level?
☐YES ☐NO
41. Do your friends and acquaintances place a great deal of faith and trust in you?
☐YES ☐NO
42. Do you follow through with implementation when a decision has been made?
☐YES ☐NO
43. Do you believe in your own power to accomplish goals?
☐YES ☐NO
44. Are you willing to change your negative habit patterns?
☐YES ☐NO
45. Do you have high moral and ethical standards?
☐YES ☐NO
46. Do you have a good idea or product and/or know how to get one?
☐YES ☐NO
47. Do you know how to tap the power of your subconscious mind?
☐YES ☐NO
48. Are you dedicated and committed to being in business for yourself?
☐YES ☐NO
49. Do you know how to develop a business plan for presentation to a group of investors?
☐YES ☐NO
50. Can you inspire and motivate other individuals?
☐YES ☐NO
51. Do you know how to use radio, TV, direct mail, and space advertising?
☐YES ☐NO
52. Do you know what the four P's of marketing are?
☐YES ☐NO
53. Are you familiar with the OPM principle?
☐YES ☐NO
54. Do you know how to multiply your talents?
☐YES ☐NO
55. Do you know how the 20/80 rule affects success?
☐YES ☐NO
56. Have you ever made an assessment of your personality characteristics?
☐YES ☐NO
57. Have you ever determined your net worth?
☐YES ☐NO
58. Do you know what the 12 laws of universal success are?
☐YES ☐NO
59. Have you ever explored your career potential?
☐YES ☐NO
60. Do you believe in the power and success of self-directed learning?
☐YES ☐NO
61. Do you wake up happy 99% of the time?
☐YES ☐NO
62. Do you provide a period during each day for thinking, studying, planning, or relaxation?
☐YES ☐NO
63. Do you consider yourself ambitious?
☐YES ☐NO
64. Do you enjoy power, control and authority?
☐YES ☐NO
65. Would you be willing to quit your job today and start at the bottom?
☐YES ☐NO
66. Do you know how to determine the "break-even" point?
☐YES ☐NO
67. Do you know what motivates customer behavior and buying habits?
☐YES ☐NO

-
68. Student organizations such as ATA, VICA, DECA, FFA and others help students learn about entrepreneurship.
☐TRUE ☐FALSE
69. Do you know where to get information on franchising?
☐YES ☐NO
70. Do you know the rules of buying an existing business?
☐YES ☐NO
71. Are you willing to follow a proven success system even if it differs from yours?
☐YES ☐NO
72. The National Federation of Business is the largest small business organization in the United States.
☐TRUE ☐FALSE
73. Can you accept failure without admitting defeat?
☐YES ☐NO
74. Do you know how to project cash flow?
☐YES ☐NO
75. Do you know how to read a balance sheet and profit and loss statement?
☐YES ☐NO
76. Are you familiar with the current business and tax laws?
☐YES ☐NO
77. Are you familiar with the laws affecting recruitment and selection of personnel?
☐YES ☐NO
78. Do you know, or are you willing to learn how to sell?
☐YES ☐NO
79. Do you consider yourself enthusiastic, imaginative, and tenacious?
☐YES ☐NO
80. Are you willing to participate in both the profits and losses of a business?
☐YES ☐NO
81. Do you know how to protect your ideas from thieves?
☐YES ☐NO
82. Do you have a savings account?
☐YES ☐NO
83. Are you familiar with the principles of bartering?
☐YES ☐NO
84. Are you familiar with the rules and laws pertaining to investments?
☐YES ☐NO
85. Are you familiar with the 30,000 occupational titles in the United States?
☐YES ☐NO
86. Do you know how to get free publicity for your product or service?
☐YES ☐NO
87. Are you dissatisfied with your present employment or school work?
☐YES ☐NO
88. Women entrepreneurs represent about 7% of all self-employed.
☐TRUE ☐FALSE
89. Minority entrepreneurs represent about 5.5% of all self-employed.
☐TRUE ☐FALSE
90. On the average, incorporated self-employed persons make more than self-employed proprietors.
☐TRUE ☐FALSE
91. On the average, women entrepreneurs make less than men.
☐TRUE ☐FALSE
92. Do you know where to find business and operating ratios for specific industries?
☐YES ☐NO
93. Are you familiar with the differences between a general corporation, partnership, sub-chapter S, and proprietorship?
☐YES ☐NO
94. Do you know how to find adult training programs in entrepreneurship?
☐YES ☐NO
95. Are you familiar with the services offered by the SBA?
☐YES ☐NO
96. Are you familiar with the services offered by the Minority Business Development Agency and the Minority Business Development Centers?
☐YES ☐NO
97. Are you familiar with Federal government contracting and R&D monies available to small business?
☐YES ☐NO
98. If you are a parent of a teenager, are you familiar with entrepreneur programs available in high schools and colleges?
☐YES ☐NO
99. Are you familiar with business control systems such as accounting, recordkeeping, financial analysis, bookkeeping, profit centers, collections, forecasting, etc.?
☐YES ☐NO
100. Do you know the secrets of working with bankers, accountants, and attorneys?
☐YES ☐NO
101. The failure rate of most small business start-ups is about 80% within the first three years.
☐TRUE ☐FALSE
102. Immigrants have a high rate of entrepreneurship in the United States.
☐TRUE ☐FALSE
103. Over 90% of all business in the U.S. are small, employ fewer than 20 persons, and are organized as sole proprietorships.
☐TRUE ☐FALSE
104. The source of all creative ideas is based upon universal energy that flows through our brain and is activated by our subconscious mind.
☐TRUE ☐FALSE

No portion of the EQ may be copied, in any fashion, by any method, without the written permission of the publisher. Other self-scoring Career Life Planning Forms include the SQ: Success Quotient; the OQ: Occupational Quotient; and the CQ: Career Quotient. Individual copies of any one form may be purchased for \$3.00 each or in volumes of 30, ordered at the same time for \$1.00 each plus postage and handling. Please make all checks or money orders payable to IDEA, Suite 316, 8800 Blue Ridge Boulevard, Kansas City, Missouri 64138.

COMPARE YOUR SQ

DESCRIPTION:

The "SQ" is short for SUCCESS QUOTIENT. . .a highly specialized checklist of words that describe successful human behavior.

INSTRUCTIONS:

Quickly read each word and honestly ask yourself if this characteristic applies to you. Then give yourself a score between 1 and 10 with 10 being high. Continue doing this until you have matched each word with your own personal image of yourself. When you have finished, count up the total score by adding all of the chosen word numbers. Total points equal 2,250.

INTERPRETATION:

This is not a test, and there are no right or wrong answers. You have only compared yourself with known characteristics of successful persons. The closer you are to 10 on each scale, the better your chances are of leading a successful life. If you do not like your current self image as it relates to success, don't complain. . .learn to change it by changing your attitudes, developing skills, and becoming self-directed through the study of success methods, imitating a mentor, reading success books, going back to school, changing jobs, and giving up negative habits.

Successful people are not successful by accident. They have learned to live by and apply the laws of success. These individuals are found in all walks of life. Age, sex, and ethnic background never make a difference. They are known by their images, reputations, and achievements. They include students, housewives, secretaries, businessmen, professionals, laborers, millionaires, writers, artists, poets, teachers, and government workers.

Various studies of successful individuals throughout history have shown that, as a group, they exhibit the characteristics as found in the SQ. In addition, their success has always been defined, very simply, as "the progress an individual makes towards a predetermined and worthwhile goal."

In the literature of history, they are often referred to as scholars, champions, victors, winners, heros, lions, tigers, leaders, entrepreneurs, creators, innovators, and eagles. They dream, have mighty visions, are classified as mavericks, and are known to be performance oriented. They fly higher than most, live on the edge of the future, and are known by the goals they achieve. You too can become one. . .if you are willing to put forth the effort.

DISCOVER YOUR CQ

DESCRIPTION:

The CQ is a self-scoring test of an individual's knowledge in the world of work. The 114 test items were structured around seven career steps from self evaluation to placement. Individuals cannot only test their own job market knowledge, but they can find the answers to their most pressing job search questions. The CQ is useful as a self-directed learning device as well as a motivational tool for stimulating group discussion in a career seminar.

INSTRUCTIONS:

Although this is a knowledge test, try not to be nervous. The answers to each question are given beneath each question. In some cases, there can be additional items added to an answer, but in these instances, the answer was not expanded due to a lack of space, and our desire for you to think beyond the test. Sad, but true, an estimated 95 percent of the population will not know the answers to most of these questions. By learning the answers, you can increase your chances of becoming more successful at job hunting and final employment.

1. A person working full time for 35 years, averaging 40 hours/week, for 50 weeks/year, will spend 70,000 hours at work?

F T

2. What government book has the largest list of occupational descriptions?

Dictionary of Occupational Titles

3. List three characteristics of selling:

(1) Opportunity (2) Contact (3) Close

4. List five inexpensive government books that can provide you with a comprehensive view of the work in America?

(1) Guide for Occupational Exploration (2) Occupational Outlook Handbook (3) Exploring Careers (4) Classified Index of Industries and Occupations (5) Selected Characteristics of Occupations Defined in the D.O.T.

5. What are the five stages of the Job Loss grieving process?

(1) Denial (2) Anger (3) Bargaining (4) Depression (5) Acceptance

6. List five future trends that will affect an individual's career development in the next 10 years:

(1) More women working (2) Technological advances (3) Over-supply of talent to available jobs (4) Automation of machines (5) Reduction in work hours

7. List five successful "Careering" Competencies:

(1) Networking (2) Mentoring (3) Risking (4) Connecting (5) Performing

8. List five marketing tools for promoting yourself to an employer:

(1) Resume (2) Interview (3) Telephone (4) Letter (5) Advertisements

9. List five ways of acquiring work skills:

(1) Apprentice (2) Home duties (3) Hobbies (4) School work (5) Volunteer

10. List six major components of a successful plan for finding a job:

(1) Goal (2) Commitment (3) Desire (4) Activities (5) Time (6) Action

11. List three follow-up techniques to an interview:

(1) Phone (2) Letter (3) Visit

12. List those major factors that are necessary for gathering information about a company prior to an interview:

(1) Organizational structure (2) Products (3) Location (4) Size (5) Benefits (6) Requirements (7) Opportunities (8) Education (9) Entrance requirements (10) Salary scales (11) Disadvantages (12) Stability (13) Image (14) Control

13. List five information facts you need to get in a good contact for a job interview:

(1) Name (2) Title (3) Job (4) Book (5) Close

14. List five things you need to know prior to an interview:

(1) Date (2) Time (3) Interviewer (4) Place (5) Directions (6) Job title

15. What sector of the American economy creates the most jobs?

Small businesses

16. What is the major difference between an information interview and a job interview?

The information interview is non-stressful, and non-job seeking.

17. How many job openings are there each year, over a 12-month period?

(1) New jobs: 1-2 million (2) Retirement: 2-3 million (3) Transfer/Turnover/Death/Fired: 19 million

18. What percentage of all jobs require a college degree?

Twenty (20) percent

19. What percentage of all jobs available are listed in the help wanted column of newspapers?

Twenty (20) percent

20. What reason do most people give for not looking for a job?

Rejection

21. List five turning points in a person's life that ultimately affects a career choice:

(1) Marriage (2) Divorce (3) Graduation (4) Children (5) Death of spouse

22. What is a job club?

A supporting network of unemployed persons directed by a teacher/facilitator

23. What are the two most important goals to achieve in a job interview?

(1) To get the interviewer to like you (2) To give you a job

24. What is an approximate range of costs for a business to advertise, hire, test, and interview the average employee?

\$500 - \$1,000

25. What does research show about job search methods and effectiveness rates for managers and engineers actively using a job club?

(1) Job club - 37% (2) Help wanted ads - 15% (3) Employment agencies - 2% (4) Business acquaintances - 16% (5) Professional associations - 4% (6) Position wanted ad - 0% (7) Resumes - 9% (8) Friends/Relatives - 1% (9) State employment office - 1% (10) Former Employer - 12% (11) Direct calls - 14%

26. List four ways people make decisions about their careers:

(1) Impulse (2) Habit (3) Routine (4) Default

27. Out of every 10 students who start college each year, what percent will not finish?

Fifty (50) percent

28. How many occupational titles are there in the United States?

30,000

29. List eight self-evaluation tools that can help you in deciding who you are:

(1) Autobiography (2) Journal (3) Interest survey (4) Values checklist (5) Personality inventory (6) Aptitude tests (7) Occupational survey (8) Physical test

(1) Body odor (2) Dirty nails (3) Unkept shoes (4) Messy hair (5) Inappropriate clothes (6) Gaudy jewelry

31. List five factors important to employers in salary negotiation:

(1) History (2) Current salary (3) Replacement cost (4) Economy (5) Budget (6) Supply/Demand

32. Name three types of resumes:

(1) Historical (2) Functional (3) Biographical

33. List all the steps involved in the careering process:

(1) Self assessment (2) Life stage analysis (3) Occupational information (4) Alternative match (5) Searching methods (6) Decision making (7) Adjustment

34. List the major factors a college uses in the student selection process:

(1) Grades (2) Awards (3) G.P.A. (4) Personality (5) Motivation (6) Recommendations (7) Tests

35. List three ways to increase your income:

(1) Transfer (2) New position (3) Own business

36. List five jobs that do not require a high school diploma:

(1) Bartender (2) Guard (3) Dancer (4) Blacksmith (5) Model

37. List five jobs that require a high school education:

(1) Secretary (2) Electrophaser (3) Locksmith (4) Typesetter (5) Cashier

38. List five jobs that require apprentice training:

(1) Carpenter (2) Machinist (3) Patternmaker (4) Meatcutter (5) Firefighter

39. List five jobs that require two years of college:

(1) Cosmetologist (2) Policeman (3) Programmer (4) Buyer (5) Drafter

40. List five jobs that require a four-year college degree:

(1) Accountant (2) Engineer (3) Teacher (4) Forester (5) Librarian

41. List five jobs that require graduate school:

(1) Physician (2) Minister (3) Professor (4) Psychiatrist (5) Lawyer

42. In most jobs, men make more than women. What is the percent difference?

Forty (40) percent

43. What does research show about job search methods used by blue collar workers?

(1) Employment agencies - 12.2% (2) Newspaper ads - 13% (3) Informal - 63.4% (4) Other - 10.5%

44. List the major resources for learning:

(1) High school (2) Business school (3) Technical school (4) Junior college (5) College (6) Graduate school (7) Correspondence school (8) Workshops (9) Books (11) Apprenticeships (12) Mentors (13) Experience

45. List five ways to build self worth:

(1) Friendships (2) Goal setting (3) Achievements (4) Skill identification (5) Competency development (6) Positive feedback

46. What does research show about job search methods used by white collar workers?

(1) Employment agencies - 8.9% (2) Newspaper ads - 9.9% (3) Informal - 74.5% (4) Other - 6.7%

47. How long does it take to find the average job?

Five - six weeks

48. List six reasons that most people do not find work:

(1) Medical (2) Psychological (3) Attitude (4) Behavior (5) Situational (6) Employment history

49. What are your minimum chances of finding employment through 100 resume solicitations?

95 rejections, 4 interviews, and 1 potential offer

50. How many telephone calls can you expect to make in order to find one job opening?

Fifty (50) minimum

51. What are the main objectives of an information interview?

(1) Getting foot in the door (2) Network contacts (3) Clarifying job requirements (4) Learning about the company

52. List four methods of training for an interview:

(1) Video tape (2) Magnetic tape (3) Role playing (4) Information interview feedback

53. List five major benefits of being employed:

(1) Economic security (2) Recreational (3) Educational (4) Medical (5) Social status (6) Family (7) Mobility (8) Communications

54. List five major social factors associated with unemployment:

(1) Crime (2) Stress (3) Discrimination (4) Illness (5) Alcoholism (6) Family disintegration

55. How many unemployed persons can normally be placed through a job club after 5-9 weeks?

75 - 80%

56. List five positive work habits:

(1) Punctuality (2) Attendance (3) Production (4) Relationships (5) Following instructions/rules

57. What percentage of job seekers do not know the specific skills necessary for a successful job search?

Ninety-five (95) percent

58. List five major interview "Knockout" factors:

(1) Lacks skills (2) Poor manners (3) Bad language (4) No ambition (5) Poor presentation

59. List the six functions of management:

(1) Organization (2) Administration (3) Planning (4) Methodology (5) Budgeting (6) Evaluation

60. According to many employment specialists, the last person to be interviewed has the best chance to get the job?

F T

61. Eighty (80) percent of an iceberg lies beneath the water and controls its forward movement. What analogous part of our personality functions in the same way to move our behavior?

The unconscious mind

62. List three reasons most business fail:

(1) Lack of capital (2) Poor management (3) Bad ideas

63. List six major characteristics of an entrepreneur:

(1) Creative (2) Independent (3) Determined (4) Motivated (5) Competitive (6) Risking

64. What organization offers free testing, free occupational information, and free job placement?

The United States Employment Service

65. Within a 45-year career lifespan, most people will change jobs about nine times?

F T

66. Most hiring is accomplished on the basis of a general formula, using 10% intelligence, 10% skills, and 80% personality?

F T

67. What are the four steps in building a successful philosophy of life?

(1) Image what you want to be (2) Find some friends who have the same vision (3) Decide on which attitudes are important (4) Practice until they become successful habits

68. What are the eight steps in making a decision:

(1) Identify the problem (2) Analyze its parts (3) Rank the alternatives (4) Collect information (5) Interpret the data (6) Re-evaluate (7) Decide (8) Estimate probability of success (9) Act

69. List five sources of occupational information:

(1) Company literature (2) Business directories (3) Telephone yellow pages (4) Books in library (5) Government publications

70. List 12 contact sources for potential jobs:

(1) School (2) Societies (3) Clubs (4) Military (5) Conventions (6) Sports (7) Hobbies (8) Church (9) Acquaintances (10) Businesses (11) Government (12) Medical

71. List 14 measurable human aptitudes:

(1) General intelligence (2) Verbal (3) Numerical (4) Spatial (5) Form perception (6) Clerical (7) Finger dexterity (8) Manual dexterity (9) Eye-hand-foot coordination (10) Color perception (11) Mechanical (12) Academic (13) Artistic (14) Musical

72. List the 10 developmental stages of human life:

(1) Prenatal (2) Birth (3) Infancy (4) Childhood (5) Pre-teen (6) Teen (7) Young adult (8) Adulthood (9) Old age (10) Death

73. List the 10 career stages affecting a person's life:

(1) Birth (2) Home environment (3) Role playing (4) Imagination (5) Exploratory (6) Experiencing (7) Commitment (8) Working (9) Retirement (10) Transition

74. Most occupations can be classified into 12 interest areas based upon similar worker requirements and personality characteristics. What are they?

(1) Artistic (2) Scientific (3) Plants/animals (4) Protective (5) Mechanical (6) Industrial (7) Business detail (8) Selling (9) Accommodations (10) Humanitarian (11) Leading/influencing (12) Physical/performing

75. Personality tests, interest inventories, occupational surveys, and psychological instruments can all predict your future career and success?

F T

76. Grades in school can predict your future occupational success?

F T

77. List six career development theories that explain how most people find their jobs:

(1) Personality (2) Accident (3) Self-concept (4) Publicity (5) Personal needs (6) Life stages

78. List those factors that exert a positive influence on career exploration and development:

(1) Tolerance (2) Objectivity (3) Confidence (4) Judgment (5) Achievement (6) Independence (7) Patience (8) Identification (9) Models (10) Opportunities (11) Maturity (12) Goals

79. List five primary motivating drives for explaining human behavior:

(1) Hunger (2) Mating (3) Thirst (4) Exploration (5) Maternal

80. List five physical working traits that affect career development:

(1) Strength (2) Handling (3) Seeing (4) Touching (5) Balancing

81. List five environmental conditions that affect career development:

(1) Location (2) Hazards (3) Atmosphere (4) Noise (5) Climate

82. List five social climates that affect career development:

(1) Adventurous (2) Competitive (3) Authoritarian (4) Individual (5) Pressured

83. List five leadership traits:

(1) Motivated (2) Determined (3) Disciplined (4) Knowledgeable (5) Confident

84. List 10 factors affecting a person's career life pattern:

(1) Education (2) Heredity (3) Environment (4) Personality (5) Values (6) Temperament (7) Lifestyle (8) Interests (9) Aptitudes (10) Skills (11) Intelligence

85. Define the term Career Development.

It is the process of developing mental pictures about future occupational choices, making decisions based upon matching job characteristics with personality traits, modifying our direction as we pass through various life stages, and fashioning a self identity within the world of work.

86. An individual's career decisions are usually based upon how his personality characteristics interact with his environment at any particular stage of life development?

F T

87. What is an Entrepreneur?

An individual who starts, owns, and manages a business venture.

88. List five skills necessary for a successful job hunt:

(1) Social (2) Methods (3) Motives (4) Investigative (5) Deciding

89. List five marketing concepts necessary to a successful job hunt:

(1) Positioning (2) Targeting (3) Research (4) Advertising (5) Selling

90. List five successful social skills for job searching:

(1) Cooperation (2) Honesty (3) Responsibility (4) Understanding (5) Appreciativeness

91. List five successful motivational skills for job searching:

(1) Initiative (2) Adaptability (3) Disciplined (4) Confident (5) Decisive

92. List five positive emotions that can affect the job search:
(1) Faith (2) Hope (3) Love (4) Romance (5) Enthusiasm
93. What are the 10 laws of success?
Counsel with wise persons (10) Perform with results
Goals (7) Commit to a cause (8) Practice success methods (9)
(4) Praise the soul (5) Develop positive attitudes (6) Set attainable
(1) Know yourself (2) Condition your body (3) Educate your mind
94. List four categories of values that affect the career process:
(1) Rewards (2) Working (3) Moral (4) Survival
95. List five valued items affecting your career development pattern:
(1) Status (2) Power (3) Wealth (4) Independence (5) Adventure
96. List 10 characteristics of high school and college dropouts:
(1) Antisocial (2) Pessimistic (3) Radical (4) Destructive (5)
Disoriented (6) Loveless (7) Hostile (8) Exploiting (9) Hyperactive
(10) Unrealistic
97. List five sources of financial aid for obtaining an education:
(1) Government loans (2) Co-operative education (3) Scholarships
(4) State grants (5) Part-time employment
98. List the elements of a good cover letter seeking an interview:
(1) Get attention (2) Create desire (3) Picture benefits (4) Prove advantages (5) Give testimony (6) Persuade reader (7) Push action (8)
Postscript
99. What are the two main reasons employers hire employees:
(1) To make money (2) To save money
100. What are the signposts that a person passes on the path towards the development of a self image?
(1) Sensory (2) Exploration (3) Differentiation (4) Recognition (5)
Identification (6) Acting (7) Testing (8) Integration (9) Implementation (10)
101. List those factors that influence occupational supply and demand:
(1) Earnings (2) Unions (3) Legislation (4) Training (5) Education
(6) Population (7) Professors (8) Environment
102. List five national resources for occupational information:
(1) U.S. Department of Labor (2) U.S. Department of Commerce
(3) U.S. Civil Service Commission (4) U.S. Employment Service
(5) U.S. Department Health, Education and Welfare
103. What methods do employers use to screen disadvantaged job applicants?
(1) High school diploma - 28% (2) Reading ability - 85% (3)
Writing ability - 85% (4) Personal appearance - 75% (5) Work experience - 26% (6) Job training - 28% (7) Skilled experience - 23%
(8) Job reference - 50% (9) Testing - 35%
104. List the benefits of a college education, other than economics:
(1) Knowledge (2) Skills (3) Thinking (4) Character (5) Citizenship
(6) Wisdom (7) Tolerance (8) Adaptability (9) Relationships (10)
Justice (11) Courage (12) Personality
105. What criteria do employers use for disqualifying disadvantaged workers?
(1) Alcoholism - 35% (2) Drug use - 56% (3) Language problem - 56%
(4) Garbism - 18% (5) Overweight - 20% (6) Other health problems - 59% (7) Arrest record - 25% (8) Prison record - 30%
106. List those skills that will help a person succeed in high school or college:
(1) Reading (2) Writing (3) Studying (4) Listening (5) Speaking (6)
Concentration (7) Organization (8) Library (9) Research (10) Testing
107. List 10 major temperaments that can affect career development:
(1) Attention (2) Adaptability (3) Persistence (4) Curiosity (5)
Flexibility (6) Sensitivity (7) Rhythms (8) Energy (9) Sociability
(10) Humor
108. List the major characteristics of a high school or college graduate:
(1) Social (2) Calm (3) Optimistic (4) Adaptable (5) Idealistic (6)
Disciplined (7) Alert (8) Stable (9) Constructive (10) Satisfied
109. List six myths of the world of work:
(1) More college degrees mean a higher salary (2) If you are trained for a job, you'll get it (3) Only men have a right to work (4) Learning only takes place in schools and colleges (5) If you're a specialist, business will come knocking at your door (6) Occupations are stable over long periods of time
110. In terms of economics only, is a college degree worth the cost?
The amount spent in four years, plus the loss of wages, if invested over the lifetime of a worker, will exceed the cumulative salary over the same period of time.
- Yes No
111. What is Career Education?
It is the process of imparting to others, or assimilating within oneself, theoretical and experiential knowledge and skills that prepare one for survival in future personal, economic, educational, and career roles.

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$160.00 per month.

APPENDIX J

ENTREPRENEURSHIP EDUCATION: ORGANIZING TO DEVELOP
PROGRAMS AND COLLABORATIVE NETWORKS -
INSTRUCTIONS FOR ORDERING

CIMC POLICIES AND PROCEDURES

TELEPHONE ORDERS

Telephone orders may be placed by calling the Curriculum and Instructional Materials Center (CIMC), Oklahoma State Department of Vocational and Technical Education. Please have an authorized purchase order number before you place your order by telephone. The telephone number to call is (405) 377-2000, X258.

All telephone orders require written confirmation. To avoid duplication of orders, mark your order "Confirmation of Telephone Order." Also, please include the teacher's name who will utilize the materials for all school and university orders.

PAYMENT

All orders will be invoiced shortly after materials are shipped. Payment is due upon receipt of invoice. All checks must be drawn upon a U.S. bank and payable in U.S. currency. All prices are subject to change without notice. Shipping charges are added to invoice.

RETURNS

Written authorization to return any material must be obtained from this office. After authorized returned goods are received, credit will be issued at 100 percent of full list price only on current editions of the materials which are unmarked and in resalable condition. All material to receive credit must be returned prepaid within six (6) months of the date of the purchase order.

Items returned to the CIMC that are not in resalable condition or are not authorized for return will be returned to the purchaser without credit.

After authorization has been confirmed, please address all returns to Oklahoma State Department of Vocational and Technical Education, Curriculum/Resale Division, 1500 West Seventh Avenue, Stillwater, Oklahoma 74074. The invoice number on which the materials were billed must be included with the return.

DAMAGED MATERIALS

Credit for goods received in defective condition will be 100 percent invoice price or replacement of defective goods. This office must receive notice of damaged goods within (5) days of the receipt of goods in order for credit to be authorized. In the event that materials were damaged in shipment, claims must be filed against the carrier; the CIMC is not responsible for damage incurred in transit.

For additional information on ordering or returning materials, contact Business Manager, CIMC/State Department of Vocational and Technical Education, 1500 West Seventh Avenue, Stillwater, Oklahoma 74074, (405) 377-2000, X 257.

Please include purchase order and all pages of order form. Mail to above add address.
